

**Living Cell Technologies Limited  
Company Announcement  
Appendix 4C Quarterly Cash Flow Report to 30 June 2010**

- Cash at 30 June 2010 \$3,121,365
- 128% increase in grant revenue
- Further \$2m received on 13 July from underwriters of expiring options

**30 July 2010 – Sydney, Australia, Auckland, New Zealand– Living Cell Technologies Limited (ASX: LCT; OTCQX: LVCLY)**, a global company pioneering the development of cell implants to treat diabetes, announced today the quarterly cash flow report for the quarter ended 30 June 2010. The Appendix 4C is attached. The cash balance at the end of the quarter was \$3,121,365 compared to \$4,090,696 at 31 March 2010. This decrease reflects the continuing development of the lead product DIABECCELL<sup>®</sup>. On 13 July 2010 the company issued a further 9,523,810 shares to expiring option underwriters raising a further \$2,000,000.

Net operating cash outflows in the quarter were \$1,278,190 compared to \$1,257,133 last quarter. Expenditure included \$768,463 on research and development (\$891,261 last quarter) for the supply of DIABECCELL<sup>®</sup> for the clinical trial in New Zealand. Cash received from Government and JDRF grants was \$476,320 (\$209,194 last quarter), showing the first claims under the NZD4m matching grant to scale up production of DIABECCELL<sup>®</sup> announced on 12 February and the Juvenile Diabetes Research Foundation grant announced on 27 April. Receipts from customers were \$379,320 (\$222,613 last quarter) including the Centocor Research & Development Inc. research collaboration.

Capital expenditure was \$43,643 in the quarter, compared to \$112,639 last quarter, reflecting purchase of equipment to reduce risk and scale up production.

During the quarter a further two patients in the New Zealand clinical trial received implants of DIABECCELL<sup>®</sup>, the company's encapsulated insulin producing cells for Type 1 diabetes. On 30 March the New Zealand Data Safety and Monitoring Board approved progressing to the next stage of the Phase II trial with a higher dose. The first patient has dropped his daily insulin dose by 25% while maintaining his usual blood glucose levels and eliminated life-threatening episodes of hypoglycaemic unawareness, a serious disease-related complication without warning symptoms which can lead to accidents and coma. The Phase I/IIa clinical trial in Russia has continued to show positive results and confirmed the safety of multiple implants of DIABECCELL<sup>®</sup>.

**About Living Cell Technologies - [www.lctglobal.com](http://www.lctglobal.com)**

Living Cell Technologies (LCT) is developing cell-based products to treat life threatening human diseases. The Company owns a biocertified pig herd that it uses as a source of cells for treating diabetes and neurological disorders. For patients with Type 1 diabetes, the Company transplants microencapsulated islet cells so that near-normal blood glucose levels may be achieved without the need for administration of insulin or at significantly reduced levels. The Company entered clinical trials for its diabetes product in 2007. For the treatment of Parkinson's disease and other neurological disorders, the company transplants microencapsulated choroid plexus cells that deliver beneficial proteins and neurotrophic factors to the brain. LCT's technology enables healthy living cells to be injected into patients to replace or repair damaged tissue without requiring the use of immunosuppressive drugs to prevent rejection. LCT also offers medical-grade porcine-derived products for the repair and replacement of damaged tissues, as well as for research and other purposes.

## Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
2. The definitions in, and provisions of, *AASB 1026: Statement of Cash Flows* apply to this report except for the paragraphs of the Standard set out below.
  - 6.2 - reconciliation of cash flows arising from operating activities to operating profit or loss
  - 9.2 - itemised disclosure relating to acquisitions
  - 9.4 - itemised disclosure relating to disposals
  - 12.1(a) - policy for classification of cash items
  - 12.3 - disclosure of restrictions on use of cash
  - 13.1 - comparative information
3. **Accounting Standards.** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
