MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

For the three months ended 31 July 2007, the turnover of the Group was HK\$177,132,000 (2006: HK\$172,764,000), registering a 2.5% increase as compared with that of the corresponding period last year. During the period under review, the Group reported a gross profit of HK\$36,490,000 (2006: HK\$34,643,000), with gross profit margin of 20.6% (2006: 20.1%) which was similar to that of the same period last year. The prices of metal raw materials and energy cost still stayed high and the escalating costs of production and operations in Mainland China continued during the period under review. With its persistence in improving production flow and undertaking research and development on applied materials, the Group was able to maintain its gross profit margin level. Profit attributable to equity holders of the Company for the period was HK\$7,124,000 (2006: HK\$6,841,000).

As at 31 July 2007, accounts receivable of the Group was HK\$174,897,000 (31 July 2006: HK\$173,773,000), just slightly up by 0.6% as compared with that of the corresponding period last year, which mainly resulted from a relatively higher turnover of the Group during the period. Inventories of the Group climbed to HK\$102,525,000 (30 April 2007: HK\$79,574,000), posing a 28.8% increase as compared with that as at the financial year-end date of last year, which was mainly caused by the rises in raw materials and finished goods. The Group will endeavor to continue to improve the management of purchasing, production and logistics so as to lower the inventory level. During the period, the Group's general and administrative expenses amounted to HK\$20,997,000 (2006: HK\$18,534,000), up 13.3% as compared with that of the corresponding period last year, mainly due to a reversal of provision for impairment of accounts receivable amounting to HK\$1,166,000 made in the same period last year. Excluding this reversal, the general and administrative expenses for the period was slightly up by approximately 6.6% as compared to that of the corresponding period last year.

FINANCIAL REVIEW

Fund Surplus and Liabilities

As at 31 July 2007, the Group's bank balances and cash (denominated mainly in Hong Kong dollar, United States dollar and Renminbi) was HK\$26,080,000 (30 April 2007: HK\$31,586,000). The banking facilities amounting to HK\$265,319,000 were secured by mortgages on the Group's certain land and buildings, pledges of the Group's bank deposits and available-for-sale financial assets, and corporate guarantees provided by the Company and its certain subsidiaries. In addition, the Group is required to comply with certain restrictive financial covenants imposed by the major financing banks. As at 31 July 2007, the Group could comply with such financial covenants, which indicates that the Group's financial position remained satisfactory.

As at 31 July 2007, the Group's total borrowings granted from banks and financial institutions amounted to HK\$264,945,000 (30 April 2007: HK\$263,301,000), of which HK\$231,852,000 (30 April 2007: HK\$224,972,000) will be repayable within one year and HK\$33,093,000 (30 April 2007: HK\$38,329,000) will be repayable within a period of more than one year but not exceeding five years. As at 31 July 2007, the Group's gearing ratio* was 0.68 (30 April 2007: 0.70). The gearing ratio declined reflecting the effect of the Group's continuous stringent control on its financial resources.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW *(continued)*

Fund Surplus and Liabilities (continued)

On 17 September 2007, the Company and a group of banks entered into a 3-year transferable term loan facility agreement of up to an aggregate amount of HK\$300,000,000. Part of the facility amounting to approximately HK\$81,000,000 will be applied to prepay all of the Company's outstanding indebtedness under a HK\$243,000,000 transferable term loan and revolving credit facility agreement dated 27 April 2005 and the balance thereof will be used as general working capital of the Group, thereby enabling the Group to develop its business in the future. It is expected that the facility will be drawn down in the second quarter of this financial year. In addition to the provision of more working capital to the Group, the facility will also serve the purpose of improving the structure of the term of the Group's borrowings.

Financial Resources and Capital Structure

For the three months ended 31 July 2007, the Group's net cash outflow (decrease in cash and cash equivalents) was HK\$17,446,000 (2006: HK\$5,746,000). MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW *(continued)*

Exchange Risks

The Group's business is mainly conducted in Mainland China, Hong Kong and South-east Asia. The major revenue currencies are primarily denominated in Hong Kong dollar, Renminbi and United States dollar; whilst the major currencies in purchase commitments are primarily denominated in Hong Kong dollar, Renminbi, United States dollar and Japanese Yen. The current appreciation trend of Renminbi has posed a negative impact on the Group's profit. However, in view of the mild and somewhat predictable fluctuation in Renminbi, the Board is of the view that it is not necessary for the Group to purchase any highly cost foreign exchange futures or options contract for hedging against exchange risks for the time being and will continue to closely monitor the fluctuations in exchange rates of the currencies. The Group's borrowings are mainly settled in Hong Kong dollars. The Board believes that there is no substantial exchange risk.

FUTURE PLAN AND PROSPECTS

The Group aims at keeping pace with its customers for joint development as well as giving immediate responses to the needs of its customers' development regions and the market demands to expand its related production business. The Group has commenced to construct a plant with usable area over 26,000 square meters in the neighbouring areas of Zhongshan plant in this quarter. It is expected that the construction of the plant will be completed in the first quarter of the next financial year. The plant will provide the Group with more spacious areas for development of its core business in the future. It will not only enhance the existing production capacity of coil products and its accessories, including ferrite magnetic cores and plastic accessories, but can also improve the existing production mode with better arrangement in production flow to effectively raise the quality of its products.

On 17 September 2007, the Company and a group of banks entered into a 3-year transferable term loan facility agreement of up to an aggregate amount of HK\$300,000,000. The facility will further strengthen the base of development for the Group. The facility amounting to approximately HK\$81,000,000 will be applied to prepay all of the Company's outstanding indebtedness under a HK\$243,000,000 transferable term loan and revolving credit facility agreement dated 27 April 2005. In addition, the Group plans to purchase production facilities for an aggregate amount of approximately HK\$100,000,000 in the coming 30 months to increase the productivity of its core business, including raising the production capacity for coil products, manganese-zinc ferrite and plastic accessories by 30%, 35% and 30%, respectively, and an amount of approximately HK\$40,000,000 will be reserved for meeting the requirements of its customers in regional development.

EMPLOYEES

The Group employed approximately 8,200 (2006: 7,600) employees as at 31 July 2007. The remuneration of the employees is determined by reference to market benchmark, individual performance and work experience, subject to periodic review, while bonus entitlement depends on the Group's results and employees' individual performance. Other employee benefits include pension scheme and medical insurance. Subsidies on training and education are also provided. Under the share option scheme of the Company, options may be granted to eligible employees to subscribe for shares in the Company.
