The Leased Assets are not revenue generating assets with identifiable income stream. The Purchase Price represents approximately 95.02% of the appraised value, which was determined after arm's length negotiation between the parties with reference to the risk profile, asset condition and financing costs.

The cost method determines the value of an appraised asset by estimating its replacement cost and deducting various estimated depreciation factors that currently exist in the appraised asset. Based on the valuation, the total appraised replacement cost of the Leased Assets is approximately RMB237.75 million (equivalent to approximately HK\$271.04 million). The newness rate of the appraised asset is determined after taking into account the economic life of the appraised asset, the remaining service life of the appraised asset and the status of the appraised asset through an on-site inspection. The newness rates for the Leased Assets, evaluated by the Valuer, are approximately 88.53%.

The Purchase Price will be satisfied by the general working capital of the Group.
