

China Comservice Exhibited at China International Big Data Industry Expo 2018 and Held Smart Product Release Conference

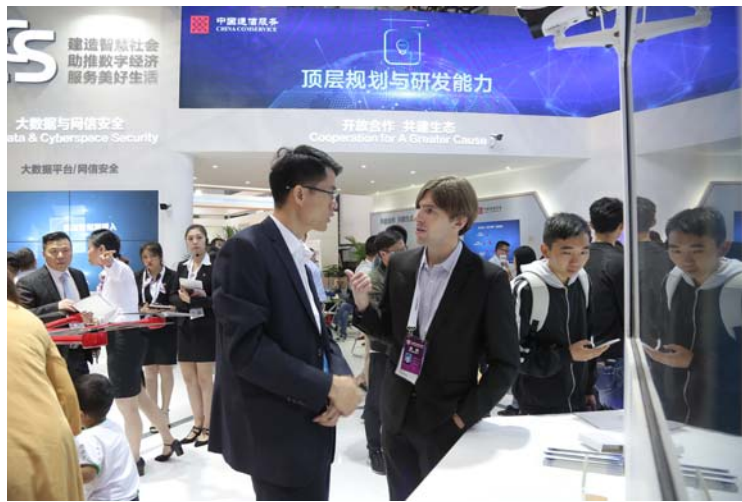

01 Jun 2018

During May 26-29th, 2018, China International Big Data Industry Expo 2018 was held in Guiyang. China Comservice exhibited at the expo with the theme of "Building Smart Society, Boosting Digital Economy, Serving a Good Life".

China Comservice showcased its innovations and development in various smart solutions, including Smart City, Smart Park, Internet of Things (IoT), Big Data, Information Security, Cloud Computing, Smart Security, Smart Safety, Smart Operation, Smart Water Conservancy, Smart Transportation and large-scale event communications support.

In the afternoon of 27th May, China Comservice held Smart Product Release Conference and Industrial Ecology Cooperation Summit. We invited more than 600 officials and guests from State Administration of Radio and Television, Chinese Academy of Sciences (CAS) and 23 provinces, autonomous regions and municipalities. During the summit, Vice Governor of Guizhou Province, management from China Comservice delivered speeches respectively, and representatives from CAS made keynote presentations. China Comservice also formally introduced its "China Comservice Smart Product" and explained its products from its role and positions in 4 perspectives, including builder for the new generation infrastructure facilities, Big Smart City products portfolio and innovative platform, provider of Big Data application services, as well as manager of the Smart Operation service. Later, Comservice Capital Holding Company Limited, a subsidiary of China Comservice, signed a strategic cooperation agreement with CASH Capital (Beijing) Investment Management Co, Ltd.; China Comservice signed strategic cooperation framework agreement with CAS Belt and Road Industry Alliance, CAS Smart City Industry Alliance and Institute of Microelectronics of CAS, respectively; China Science and Culture Communication Industry Alliance granted China Comservice Sci-tech Information Technology Co.,Ltd. , a subsidiary of China Comservice, as "Big Data Innovation and Application Center".

China Comservice also invited more than 10 top-ranked business partners in innovative and high-tech businesses, and promoted the building of Smart Ecosystem with an open attitude across different sectors in the society. Facing the digital economy era in future, China Comservice will cooperate with different partners with a view to building smart society, boosting digital economy and serving a good life.
