FIRST QUARTERLY RESULTS ANNOUNCEMENT FOR THE THREE MONTHS ENDED 30 JUNE 2015

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE" AND "GEM" RESPECTIVELY)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of the GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on the GEM, there is a risk that securities traded on the GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on the GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors of Sky Forever Supply Chain Management Group Limited (the "Company" and the "Directors", respectively) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. REVIEW AND PROSPECT

OPERATIONAL REVIEW

The supply chain management service is the main focus of the Group and it is developing. The Group is providing intermediate service between suppliers and customers and it takes advantage of the business networks and resources in order to assist SMEs in various industries to minimize the overall operation cost. Owing to the solid financial background of the Group and the great demand for supply chain service in mainland China, the Group has established many strategic partnerships with other supply chain companies, so as to undertake the operation of purchase and sales based on the services on import and export trade, logistic, customs clearance and storage.

To cope with the growing business of the supply chain management, Shenzhen Qianhai Sky Forever Industry Chain Management Company Limited (a wholly-owned subsidiary of the Company) is collaborating with SAP (Beijing) Software System Company Limited for designing and building up an effective big data platform. The platform will support point to point operation process, real time planning, execution, reporting and analysis function. It is expected that the new system under our development embodies the main idea of supply chain management – centralized purchase, production, sales, settlement and financial management. The system of big data platform is in progress and would be tested, implemented and applied in the trades.

The lightning electromagnetic pulse protection business and energy management business shrunk substantially during the Period as the Group's major customer already completed their projects and the revenue from the maintenance involved was substantially lower than the revenue from the construction of these devices.

FINANCIAL REVIEW

The Group recorded a substantial increase in turnover of approximately 395 times to approximately HK\$1,462,032,000 for the Period as compared to approximately HK\$3,700,000 for the corresponding period in 2014. The increase in turnover was due to the supply chain management services business. The Group has continued to develop business relationship with the business partners and potential partners in the PRC in order to increase and explore the new sources of income.

Save for such new sources of income, the Group experienced a decrease of approximately 85% in the service fee income from lightning electromagnetic pulse protection business and energy management business for the Period as compared with the corresponding period in 2014.

The Group recorded an increase in gross profit from approximately HK\$700,000 in the Period as compared to approximately HK\$663,000 in the corresponding period in 2014. However the gross profit margin decreased from 18% in the corresponding period in 2014 to 0.3% in the Period. The decrease in gross profit margin was mainly due to the low profit margin of supply chain management business. The Group will continue to control the material costs and explore new business so as to improve the gross profit of the Group.

Net loss attributable to equity holders of the Company for the Period amounted to approximately HK\$24,650,000 as compared to HK\$7,936,000 in the corresponding period in 2014. The major component of the Group's expenses were marketing and promotion expenses, rent and rates, salaries and payroll.
