NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30th June, 2007

1. BASIS OF PREPARATION

The unaudited interim financial statements for the six months ended 30 June 2007 have been prepared in accordance with Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and the applicable disclosure requirements of Appendix 16 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

The interim financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual financial statements for the year ended 31 December 2006. They have been prepared on the historical cost basis, except for certain property, plant and equipment and financial instruments, which are measured at fair value.

2. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied in preparing the interim financial statements are consistent with those applied in preparing the Group's financial statements for the year ended 31 December 2006. The adoption of the new/revised Hong Kong Financial Reporting Standards ("HKFRS"), which collective term includes all applicable individual HKFRS, HKAS and Interpretations issued by the HKICPA, that are relevant to the Group and effective from the current period did not have any significant effect on the financial position or performance of the Group.

The Group has not early adopted the new/revised HKFRS issued by the HKICPA that are not yet effective for the current period. The Group has already commenced an assessment of impact of these new/revised HKFRS but is not yet in a position to state whether they would have any significant impact on its results of operations and financial position.

3. TURNOVER AND SEGMENT INFORMATION

Business segments

For management purposes, the Group is currently organised into three major operating divisions — sealed lead acid batteries and related accessories, lithium-ion batteries and nickel batteries with substantially all of the activities conducted in the People's Republic of China (the "PRC"). These divisions are the basis on which the Group reports its primary segment information.

Note:

Electricity control devices division is no longer a reportable segment and thus, related segment revenue and segment result for the six months ended 30th June, 2006 have been grouped as "Others" to conform to the current period's presentation.

4. GAIN ON DEEMED DISPOSAL OF INTERESTS IN SUBSIDIARIES

During the period, the Group recognised a gain of RMB1,895,000 on deemed disposal of a subsidiary following the dilution of the Group's interest in a subsidiary, Harbin Coslight Power Company Limited ("HCP") from 91.45% to 87.49%.

In May 2007, the Group's interest in a subsidiary, Harbin Coslight Storage Battery Company Limited ("HSB"), was diluted from 100% to 89.48% as a result of capital injection into HSB by independent third parties of approximately RMB155.6 million. As a result, a gain on deemed disposal of RMB61,952,000 was recognised in the income statement.

5. DISCOUNT ON ACQUISITION OF ADDITIONAL INTEREST IN A SUBSIDIARY

In April 2007, the Group acquired further equity interest in HCP at a cash consideration of RMB47,560,000, resulting in an increase of the Group's shareholding in HCP from 87.49% to 98.52% and a discount on acquisition amounting to RMB1,607,000 as recognised in the income statement. The consideration of RMB47,560,000 had not been paid and was recorded in other payables as at the balance sheet date.

The charge comprises:		
PRC Enterprise Income Tax	**3,206**	6,771
Deferred tax charge (credit)	**2,550**	(19)
	5,756	6,752

No provision for Hong Kong Profits Tax has been made as the Group's income neither arises in, nor is derived from, Hong Kong.

Pursuant to the relevant laws and regulations in the PRC, certain of the Company's PRC subsidiaries are entitled to exemption from PRC Enterprise Income Tax for the first two years commencing from their first profit-making years of operation and thereafter, a 50% reduction for the following three years. In addition, one of the Company's PRC subsidiary is entitled to exemption from PRC Enterprise Income Tax for the three years commencing from 2005.

Major operating subsidiaries of the Company are subject to PRC Enterprise Income Tax in the PRC in the current period. These subsidiaries received official designation by the local tax authority as a "New and Technologically-Advanced Enterprise" and a foreign-invested enterprise engaged in manufacturing activities. As a result, the effective tax rate for these major operating subsidiaries was 10% for the period (six months ended 30th June, 2006: 10%).

9. DIVIDENDS

On 31st May, 2007, a dividend of HK5 cents (2006: HK5 cents) per share, shown in the condensed financial statements as RMB0.05024 (2006: RMB0.05147) per share, amounting to approximately RMB21,755,000 (six months ended 30th June, 2006: RMB22,291,000) was paid to shareholders as the final dividend for 2006.

The directors do not recommend the payment of a dividend for the six months ended 30th June, 2007 (six months ended 30th June, 2006: Nil).

10. EARNINGS PER SHARE

The calculation of basic earnings per share is based on the profit attributable to equity holders of the Company for the period of RMB116,476,000 (six months ended 30th June, 2006: RMB60,115,000) and the weighted average number of shares in issue of 433,080,000 (six months ended 30th June, 2006: 433,080,000) during the period.

Diluted earnings per share has not been presented because there were no dilutive potential shares in issue during the six months ended 30th June, 2007 and 2006.

11. ADDITIONS TO PROPERTY, PLANT AND EQUIPMENT

During the period, the Group spent approximately RMB32,007,000 (six months ended 30th June, 2006: approximately RMB15,565,000) on additions to manufacturing plant in order to expand its production capability.

In the opinion of the directors, the fair value of the Group's buildings, plant and machinery, furniture, fixtures and equipment and motor vehicles as at 30 June 2007 was not materially different from that as at 31 December 2006. Consequently, no revaluation surplus or deficit has been recognised in the current period.

12. TRADE AND OTHER RECEIVABLES

The credit terms given to the customers vary from 3 months to 9 months from the final inspection acceptance and are generally based on the financial strength of individual customers. The following is an ageing analysis of trade receivables at the balance sheet date:

14. BANK AND OTHER BORROWINGS

During the period, the Group obtained new bank borrowings of RMB308,376,000 and repaid bank and other borrowings of RMB137,435,000. At the balance sheet date, the bank and other borrowings of the Group are interest-bearing at rates ranging from 3% to 10% per annum and have maturity periods ranging from 3 months to 4 years. Approximately RMB305 million of the Group's bank and other borrowings are secured.

INTERIM DIVIDENDS

The Board does not recommend the distribution of interim dividend for the six months ended 30th June, 2007 (2006: NIL).

MANAGEMENT DISCUSSION AND ANALYSIS

RESULTS

For the period ended 30th June, 2007 (the "Period"), turnover of the Group amounted to RMB908,607,000 (2006: RMB743,381,000), representing an increase of approximately 22% as compared with the corresponding period last year. The profit attributable to equity holders of the Company for the Period amounted to RMB116,476,000 (2006: RMB60,115,000) which represents an increase of approximately 94% over the corresponding period last year. By adopting vertical method of production and stringent control on production cost, even though raw material price reached historical high during the Period, the gross profit margin of the Group has been maintained at 26.4% as compared with 29.0% in the corresponding period last year. Earnings per share for the Period amounted to RMB0.2689 (2006: RMB0.1388).

BUSINESS REVIEW

Sealed lead-acid ("SLA") products

During the period under review, the SLA battery business of the Group continued to show outstanding performance, with an increase of 26% of delivery volume as compared with the corresponding period last year, and an increase of approximately 8% of average selling price. The SLA battery business again scaled a new height during the Period with a turnover of approximately RMB638,332,000 (2006: RMB466,978,000), representing an increase of approximately 37% over last year. The increase was attributable to the constant growth of business of telecommunication operators in PRC and the strong demand from customers such as Huawei Techonologies Company Limited. During the period under review, the raw material price remained historical high, which brought pressure on gross profit margin of the Group, and the Group continued to implement stringent cost control measures and adopt vertical method of production to reduce production cost and enhance production efficiency. In addition, the Group actively reviewed pricing plan on a regular basis with its customers, and expected to shift the cost burden to customers. The mild decrease in gross profit margin is mainly due to the surge of raw material price and the increase of sales to OEM customers which have lower gross profit margin but shorter credit period.

Lithium-ion batteries

Lithium-ion battery is the second major product of the Group which accounts for 19% of the Group's turnover during the period under review. The operating environment for domestic handset manufacturers continued to show improvement. During the Period, the Group produced and sold approximately 16 million pieces of cells, representing an increase of 14% as compared with last year, with a turnover of approximately RMB174,721,000 (2006: RMB157,403,000), representing an increase of approximately 11% as compared with last year. The increase was attributable to the increase in the number of purchase order of lithium-ion batteries as a result of the restructuring of domestic handset manufacturers for the purpose of acquiring a larger market share in both the domestic and overseas markets. Notwithstanding the highly competitive operating environment and the upsurge of raw material costs, the gross profit margin of lithium-ion batteries improved slightly during the Period as compared to the corresponding period of last year. The increase of gross profit margin was attributable to the decrease of unit production cost as a result of the substantial increase of production volume and the improvement in quality control during the Period.

Mineral products

The group has a permit to mine for lead, zinc and other metal deposits in certain mineral mines located in Faso Lane, Primorsky Territory of Russia ("Faso Lane Mines") with approximately 300,000 tonnes of metal deposits. In addition, the Group also has a permit to mine for lead, zinc, copper and metal deposits in certain mineral mines located in Altai Krai, Siberia of Russia ("Altai Krai Mines") with approximately 545,000 tonnes of metal deposits. The Group expects that approximately 50,000 to 60,000 tonnes of metal can be mined each year and amongst which, the lead extracted will be consumed internally for the Group's core business. This upstream integration will be one of the major growth drivers in the future years, both as a new income source bringing significant profit contribution as well as helping the Group to secure a steady supply of raw materials. During the period under review, all pre-work of Faso Lane Mines was completed and the relevant approval was granted by Russian Government, and it is under pre-construction phase now. The pre-design plan of Altai Krai Mines was completed and is subject to the relevant approval from Russian Government.

FINANCIAL REVIEW

Assets and liabilities

As at 30th June, 2007, the Group has total assets of RMB3,252,156,000 (31.12.2006: RMB2,851,046,000) which were financed by current liabilities of RMB1,794,507,000 (31.12.2006: RMB1,438,206,000), non-current liabilities of RMB46,470,000 (31.12.2006: RMB140,168,000), shareholders' equity of RMB1,254,019,000 (31.12.2006: RMB1,159,298,000) and minority interests of RMB157,160,000 (31.12.2006: RMB113,374,000).

Liquidity, financial resources and capital structure

During the Period, the Group adopted prudent treasury policies in managing cash resources and bank borrowings. As at 30th June, 2007, the Group has bank and cash balances amounted to RMB266,308,000 (31.12.2006: RMB274,555,000). The total bank and other borrowings of the Group as at 30th June, 2007 were approximately RMB1,053,590,000 (31.12.2006: RMB882,649,000), of which RMB1,016,590,000 (31.12.2006: RMB751,649,000) will be due to repay within 12 months and the remaining RMB37,000,000 (31.12.2006: RMB131,000,000) will be due to repay after 12 months. These borrowings carry interest ranging from 3.00% to 10.00% (31.12.2006: from 2.34% to 10.00%) per annum. As at 30th June, 2007, approximately 82% (31.12.2006: 79%) of the Group's bank and other borrowings were denominated in Renminbi and 18% (31.12.2006: 21%) were denominated in Hong Kong dollars. All bank and other borrowings were used to finance the Group's capital expenditures and working capital requirements.

According to the Group's current level of cash balances, working capital resources and banking facilities, the Board is confident that the Group has sufficient resources to meet its future business expansion and repay bank borrowings on schedule.

Gearing and liquidity ratio

The Group's gearing ratio, defined as the ratio between total bank borrowings and shareholders' equity, was 0.84 (31.12.2006: 0.75). The current ratio of the Group, represented by a ratio between current assets over current liabilities, was 1.35 (31.12.2006: 1.41), reflecting the abundance of financial resources.

Charges on group assets

As at 30th June, 2007, certain property, plant and equipment, trade receivables and bank deposits of the Group with carrying value of RMB229,851,000 (31.12.2006: RMB237,608,000), RMB76,866,000 (31.12.2006: RMB94,966,000) and RMB50,000,000 (31.12.2006: Nil), respectively, were pledged to secure bank borrowings of approximately RMB304,601,000 (31.12.2006: RMB731,679,000). In addition, certain bank deposits of RMB89,218,000 (31.12.2006: RMB54,817,000) were pledged to secure trade financing facilities granted to the Group.

Foreign currency risk

The Group did not have any significant exposure to foreign currency risk as most of the Group's operations are in the PRC and transactions are denominated in Renminbi.

PROSPECTS

SLA battery business will remain the focus of the Group's future development. The Group will keep the growth momentum of SLA battery business, and continue to maintain its leading position among the peers. As it is increasingly mature to issue the third generation mobile telecommunication services ("3G") license in the PRC, some telecommunication operators have commenced construction of 3G networks. Given simultaneous operation of both the second generation mobile telecommunication services ("2G") and 3G, in addition to meet the demand of existing 2G networks, additional SLA batteries will be required to build new 3G networks as back-up power supply. As a result, the demand for SLA batteries will be significantly increased by the launch of 3G in the PRC in the future as well as the continuing investment in the existing 2G networks by telecommunication operators. With increasing demand of OEM customers, OEM business will become another growth driver of the Group. In January 2007, the Group entered into a global framework agreement with Vodafone Group ("Vodafone") in relation to provision of SLA batteries produced by the Group to Vodafone. In light of increased demand for SLA batteries of both telecommunication operator customers and OEM customers, the Group is confident that the SLA battery business will continue to grow and make more contributions to the turnover and profit of the Group.

Due to the high utilization rate of the existing SLA battery production lines, the Group has started the construction of a new SLA battery production base in Xinqing Science and Technology Park of Doumen District, Zhuhai City. The civil infrastructure will be completed by the end of the year. Upon commencement of operation of the new SLA battery production base in 2008, the overall production capacity of the Group will be increased by 1,200,000 kVAH. It is anticipated that the SLA batteries produced in the new production base will mostly be sold to OEM customers located in Southern China which can result in a saving in transportation cost and the profitability enhanced. Before the completion of the new production base in Zhuhai, the Group will continue to utilize the remaining resources of Dongbei Storage Battery Company Limited to satisfy the existing orders.

In view of the raw material price continued to rise, the Group negotiated with major customers to transfer part of the impact of raw material cost increase to them. Therefore the Group expects that the gross profit margin of SLA batteries can be maintained with improvements in light of the high raw material price in the second half of 2007.

The Group expects that the lithium-ion battery business will continue to expand in the market. As the operation of domestic handset manufacturers is increasingly stable, the Group will continue to gain both the domestic and overseas handset manufacturers as customers to enhance its profitability. In order to increase gross profit margin of its major products, the Group will continue to take measures to enhance production efficiency and reduce production cost.

The Group will make investments to develop special lithium-ion battery for fueling electric bicycles. At present, the sales volume of electric bicycles in the PRC exceeds 10 million per annum, with rapid growth and encouraging prospects. The batteries for fueling electric bicycles currently are traditional lead-acid batteries, which are bigger, heavier and not environmental with shorter life. Lithium-ion batteries are smaller, lighter and environmental with longer life, enjoying the edge of replacing the traditional lead-acid batteries.
