

## Everbright Greentech Secures Three Hazardous Waste Treatment Projects

**9 July 2018, Hong Kong** – China Everbright Greentech Limited (“Everbright Greentech” or the “Company”) (HKSE: 1257) is pleased to announce that it has recently secured Jiangsu Xinyi Hazardous Waste Integrated Treatment Project (“Xinyi Project”) Phase II, Anhui Anqing Solid Waste Integrated Treatment Project (“Anqing Project”) and Jiangsu Zhangjiagang Solid Waste Integrated Treatment Project (“Zhangjiagang Project”), all of which command a total investment of approximately RMB1.322 billion.

Xinyi Project Phase II, which commands an investment of approximately RMB280 million, has a designed annual hazardous waste processing capacity of 40,000 tonnes. Of which, the designed annual incineration processing capacity is 30,000 tonnes and the designed annual physicochemical processing capacity is 10,000 tonnes. To be invested in and constructed on a BOO (Build-Operate-Own) model for a concession period of 30 years, the project will be mainly responsible for processing hazardous waste and industrial solid waste in Xinyi City and its surrounding areas.

Anqing Project, which commands an investment of approximately RMB576 million, will be jointly invested and constructed by Everbright Greentech and its partners. The project has a designed annual hazardous waste processing capacity of 90,000 tonnes in total, including a designed annual incineration processing capacity of 40,000 tonnes, annual safe landfill disposal capacity of 30,000 tonnes, annual physicochemical processing capacity of 10,000 tonnes, and annual integrated utilisation capacity of 10,000 tonnes. The project will focus on processing hazardous waste, industrial solid waste and other types of solid waste in Anqing City and its neighboring areas. It will be invested in and constructed on a PPP (Public-Private Partnership) model, with a concession period of 30 years.

Zhangjiagang Project commands an investment of RMB466 million, with a designed annual hazardous waste landfill disposal capacity of 40,000 tonnes and a storage capacity of 550,000 m<sup>3</sup>. The project will be mainly responsible for collecting and processing hazardous waste in Zhangjiagang City and Suzhou City. It will be invested in and constructed on a BOT (Build-Operate-Transfer) model for a concession period of 30 years.

## Press Release

**China Everbright Greentech Limited**  
*(Incorporated in the Cayman Islands with limited liability)*  
(Stock Code: 1257)

**Mr. QIAN Xiaodong, Deputy General Manager of China Everbright International Limited and CEO of Everbright Greentech**, said, “Everbright Greentech has seen good news rolling in on its market expansion, which has bolstered the Company’s confidence in its new round of development. In 2018, with environmental inspections being further regularised and regulations on hazardous waste being continuously tightened, the demand for hazardous waste treatment further increases. This has given the Company the opportunity to expand its hazardous waste treatment business. Since its first hazardous waste treatment project commenced operation in 2006, Everbright Greentech has been upholding its business principle of ‘operating safely and stably in compliance with relevant emission standards’. As a result, the Company has recorded zero safety- or environment-related accident for many years, and has earned trust from the local communities. Everbright Greentech will continue to develop every hazardous waste treatment project into a demonstration project with high standards, with an aim of realising efficient, safe and harmless treatment of hazardous waste for the local areas where its projects are located.”
