3Macau enhances the overall mobile experience in line with market trends and promotes Macau as a smart city

Macau – 25 March 2018 – Hutchison Telephone (Macau) Company Limited (3Macau), the Macau mobile telecommunications division of Hutchison Telecommunications Hong Kong Holdings Limited (the Group, stock code: 215), invited journalists to a Media Spring Luncheon on 22 March. The objective was to introduce 3Macau’s latest service plans and development plans for the future, while demonstrating gratitude for coverage over the last year.

3Macau CEO Wai-Ming Ho said: “3Macau made a move to facilitate unhindered connectivity in support of the Guangdong-Hong Kong-Macau Bay Area development plan by offering the FUN Sharing Macau-HK-mainland China Unlimited Data Plan. This enables customers to share their data entitlements throughout Macau, Hong Kong and mainland China – and all at an attractive price.”

He added: “What’s more, 3Macau is offering a variety of rewards to encourage customers to upgrade to smoother 4G service for a better mobile communications experience.”

Dedicated to network enhancement for a superior mobility experience

3Macau has channelled resources into improving network quality and reach over recent years, especially in terms of reinforcing back-up equipment and power systems. Our network now covers more than 99% of outdoor areas throughout Macau, with coverage being extended to include large infrastructure projects, as well as new hotels and resorts. 3Macau is also deploying additional indoor antennae and base stations throughout public venues to improve service.

A diversity of offerings are satisfying customer needs according to the latest trends

3Macau constantly provides a diversity of innovative products and services, exemplified by launch of “FUNShare Service” at the beginning of this year. The service has been warmly welcomed by the market and allows customers to share data entitlements and voice minutes among accounts of the same name. 3Macau also launched an exclusive monthly plan for customers desiring the popular Razer Phone handset from Razer™, the leading gaming lifestyle brand.

3Macau will continue to ensure customers enjoy a comprehensive and high-quality mobile communications experience by introducing a wide range of services, while offering a variety of smartphones according to a highly-favourable price-to-performance ratio – all in step with market trends.

Keeping up to speed with roaming demand, 3Macau increased the number of Unlimited Roaming Data Daily Pass destinations at the beginning of this year by including geographies such as Canada, Mexico, Switzerland, Argentina and Pakistan. This means customers can

enjoy travel adventures throughout 61 travel hotspots using the Unlimited Roaming Data Daily Pass – all for as little as \$48 without having to swap SIM cards.

Drawing on the Group's resources to introduce business solutions designed to assist Macau's transformation into a smart city

3Macau has been drawing on the Group's resources to introduce business solutions in support of promoting Macau's development as a smart city. For example, 3Macau is collaborating with Check Point – an expert in network safety – to promote the SandBlast mobile device security solution throughout large corporations. In addition, 3Macau is working with Greensafety Technology – a member of the Hong Kong Science and Technology Parks Incubation Programme – to introduce a smart motorist-tracking system. 3Macau's reliable and far-reaching network is ideal for carrying data relating to motorists and driving conditions to a central system for real-time monitoring and to facilitate safety alerts.

3Macau pursues a philosophy of innovation and continuous improvement, a key factor of which is listening to customers and responding in a timely manner to enhance the overall quality of mobile service.
