Telecommunications

Real estate development and holdings

Retail, manufacturing and other services

and investment

Operations review

The Group's activities are concentrated on five core businesses – ports and related services; telecommunications; property development and holdings; retail, manufacturing and other services; and energy, infrastructure, finance and investment. Although each of the Group's five core businesses was affected to varying degrees by the difficult economic conditions in Asia, all the Group's principal subsidiaries operated profitably during the year. The focus of the Group remains concentrated on its five core businesses to provide future growth and expansion.
