CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this document, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this document.

This document, for which the directors (the “Directors”) of SUNeVision Holdings Ltd. (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this document is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this document misleading; and (iii) all opinions expressed in this document have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

CHAIRMAN'S STATEMENT

SUNeVision continued to be profitable in the first nine months of the financial year 2007/08, recording a profit attributable to equity holders of the Company of HK\$105.7 million for the nine months ended 31 March 2008.

Revenue in the first nine months of the financial year 2007/08 was HK\$295.3 million, HK\$58.4 million higher than in the same period of last financial year. Factors contributing to the increase included higher revenues from the Group's data centre, last-mile connectivity, and commercial property rental businesses. Compared to the same period of last financial year, gross margin improved four percentage points to 47 percent, largely as a result of the increase in revenue and the continuously improving cost of sales.

Other income, being income in addition to revenue from operations, was HK\$14.7 million. This was substantially lower than in the same period of last financial year, where other income consisted primarily of a higher level of interest income before the payment of the one-off special dividend approved by shareholders at the Annual General Meeting last financial year. Operating expenditures were HK\$30.6 million, moderately lower than in the same period of last financial year and once again demonstrating the beneficial effects of continuous cost control.

Profit attributable to equity holders of the Company was HK\$105.7 million. This was moderately higher than in the same period of last financial year, due largely to the aforementioned increase in gross profit and reduction in operating expenditures. The Group's financial position remained strong, with approximately HK\$400 million of cash and interest-bearing securities on hand.

During the period under review, iAdvantage continued to win new business and it renewed existing relationships with top-tier multinational and local firms. Overall data centre occupancy was approximately 85 percent, a solid improvement over the approximate 74 percent occupancy in the same period of last financial year. During the period under review, the Group's other business units continued to strengthen their market positions and trim costs.

In the remainder of this financial year, iAdvantage will seek to fill vacancies remaining in its current data centres in Hong Kong and the Mainland as well as continue to explore new opportunities for growth. The Group's consumer enabling and property-related technology businesses will carry on leveraging the parent company's significant relationships. The Group will seek to improve upon last financial year's recurring profit so that payment of a dividend to shareholders may be considered at the end of the financial year.

The above results ably demonstrate the ongoing dedication and hard work of the board, management, and every member of staff. I am most grateful to them and also deeply appreciative of the trust and support the Company continues to receive from its shareholders.

Kwok Ping-luen, Raymond
