MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

The unaudited revenue of the Company and its subsidiaries (collectively the “Group”) for the three months ended 30 June 2022 (the “Financial Period”) was approximately HK\$27.6 million, representing an increase of approximately 89.0% from approximately HK\$14.6 million for the corresponding period last year. Such increase in the unaudited revenue was mainly due to the increase in the sales of liquefied natural gas (“LNG”) during the Financial Period.

The Group’s unaudited loss attributable to the owners of the Company was approximately HK\$6.0 million for the Financial Period compared to the profit attributable to the owners of the Company of approximately HK\$131.6 million for the corresponding period last year. The turnaround from profit to loss attributable to the owners of the Company during the Financial Period was mainly attributable to the absence of the one-time significant gain on debt restructuring of approximately HK\$140.9 million arising from the scheme of arrangement entered into between the Company and its creditors in the corresponding period last year. If this one-time gain is deducted, the operating loss attributable to the owners of the Company was actually decreased from approximately HK\$9.3 million in the corresponding period last year to approximately HK\$6.0 million in the Financial Period. The decrease in the operating loss attributable to the owners of the Company was mainly attributable to the decrease in administrative expenses.

The board (the “Board”) of the Directors does not recommend to pay dividend for the Financial Period.

BUSINESS REVIEW

During the Financial Period, the Group was principally engaged in the following businesses: (i) trading of refined oil and chemicals business; and (ii) power and data cords business.

In terms of the geographical market performance, the United States and the PRC contributed to approximately 19% (2021: approximately 35%) and approximately 77% (2021: approximately 59%) of the Group’s total unaudited revenue respectively, while the remaining approximate 4% (2021: approximately 6%) came from its other markets.

TRADING OF REFINED OIL AND CHEMICALS BUSINESS

Based on the Group's and management's experience and customer relationship in the field of the clean energy industry, the Group seizes the opportunity of the national carbon neutrality and carbon peak. By proactively promoting the clean energy trading business, connecting upstream gas resources and seeking downstream market space, the Group will match the supply and demand for clean energy in order to reach natural gas trading relationships. The Group will generate income using the price difference caused by the seasonality and fluctuation of the natural gas market, and develop cooperation and broaden the customer base for future development.

During the Financial Period, the Group's unaudited revenue from sales of LNG was approximately HK\$14.9 million (2021: Nil).

POWER AND DATA CORDS BUSINESS

The three key product groups for power and data cords business were (i) power and data cords for mobile handsets and personal care products; (ii) medical control devices; and (iii) power cords and inlet sockets for household electric appliances. Each product group has its own types of products. During the Financial Period, the Group manufactured over 40 types of power and data cords for mobile handsets and personal care products, and over 450 types of power cords and inlet sockets for household electric appliances. The Group will also continue to involve in the assembly and sale of medical control devices, which are primarily used by patients in hospital wards and the related accessories.

(I) POWER AND DATA CORDS FOR MOBILE HANDSETS AND PERSONAL CARE PRODUCTS

Power and data cords for mobile handsets and personal care products consist of 2-pin cables and connectors and are generally used for power charging to mobile handset and personal care products. The diameters of stranded copper wires are ranged from 0.26 mm to 2.4 mm and carry low voltage electricity of up to three amperes. In accordance with its customers' specifications, the Group manufactures over 40 different types of power and data cord for mobile handsets and personal care products.

During the Financial Period, the Group's unaudited revenue from power and data cords for mobile phones decreased by 27% to approximately HK\$5.9 million (2021: approximately HK\$8.1 million). The decrease was due to the increase in competition and the increased in popularity of multiple function cables so that the demand for traditional cables has decreased.

(II) MEDICAL CONTROL DEVICES

Medical control device is a bedside multi-function device for patients in wards. The medical control device products of the Group consist of pillow speaker, bed control, bed cable and call cord. Pillow speaker could be produced with different specifications from simple version of 1-button pillow speaker capable for emergency communication and lighting control functions to advanced version of 26-button pillow speaker capable for emergency communication, television, and lighting temperature control in a ward. The pillow speakers sold by the Group are in the form of dismantled parts and components including all necessary components for a pillow speaker such as power cable, PCB and plastic body etc. for further assembly by customers after delivery. Materials used for the manufacturer of medical control device are sourced by the Group based on the requirements of, and have been approved by, its customer, which is a medical equipment manufacturer in the United States. Although the Group will occasionally provide advice and input, the design of the medical control device originates from the customer who will closely monitor and have overall control and the ultimate decision on matters relating to the design, use of materials and ultimate assembly of medical control devices. All parts and components of the medical control devices manufactured by the Group's medical control device products were exported to the customer for further assembly and processing into its final products for sales to hospitals and clinics. Testing will also be conducted by the customer to ensure the final products comply with the relevant US regulatory requirements.

During the Financial Period, the Group's unaudited revenue from medical control devices was approximately HK\$5.2 million (2021: approximately HK\$5.2 million).

(III) POWER CORDS AND INLET SOCKETS FOR HOUSEHOLD ELECTRIC APPLIANCES

Power cords for household electric appliances are generally non-halogen free and carry normal voltage electricity up to 250 volt. Different countries have different safety, power voltage and environmental standards for household electric appliances and there are more than 10 types of sockets in widespread use around the world. Plugs with different number of prongs on power cords are used in different countries. For instance, the European Union standard plugs manufactured by the Group are mainly 250 volt plugs with cylindrical prongs while the US standard plugs manufactured by the Group are 125 volt plugs with strip-like prongs. Some of the Group's power cords and inlet sockets for household electric appliances with safety approvals and/or certificates such as CSA, VDE, PSE, ASTA, CCC bear the trademark "SUN FAIR". Some of the Group's products meet eleven types of international safety standards including UL, CSA, VDE, NEMKO, SEMKO, FIMKO, SEV, DEMKO, OVE, KEMA, CCC, and ENEC.

During the Financial Period, the Group's unaudited revenue from power cords and inlet sockets for household electric appliances was approximately HK\$1.6 million (2021: approximately HK\$1.3 million).

OUTLOOK

During the Financial Period, although global economic picked up in a faster pace, the economic has not fully recovered to the level before the COVID-19 outbreak. Unsynchronised global epidemic prevention and control, uneven economic recovery, intensified political and economic games and unsure monetary policy have all increased uncertainty.

The Chinese government has committed to realise carbon peak in 2030 and carbon neutrality by 2060. As a major energy consuming country, the fundamental key to achieve "double-carbon" target is to change the development pattern of energy industry with utilisation of technology and innovation, acceleration in transformation to and substitution with clean energy and increase in energy efficiency so as to minimise the impact to the atmosphere and environment.

As an emerging energy corporation, the Group's corporate mission is to "Benefit People's Livelihood with Clean Energy and Technology and Innovation". We focus on the development of clean energy industrial chain and sensitively utilise the R&D results of frontier technology in order to explore and advance industrialisation in energy technology and to connect and integrate with quality projects and resources in China and overseas, through which the Group could create massive synergy between capital, technology, business and operational management. Therefore, the Group will strive to establish its core competitiveness in the fields of new energy materials, energy saving and environmental protection and digital technologies for energy safety, and develop into a technological energy corporation with prominent influence and reputation within the industry.
