MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

The unaudited revenue of the Company and its subsidiaries (collectively the “**Group**”) for the nine months ended 31 December 2022 (the “**Financial Period**”) was approximately HK\$372.1 million, representing an increase of approximately 707% from approximately HK\$46.1 million for the corresponding period last year. Such increase in the unaudited revenue was mainly due to the increase in the sales of natural gas during the Financial Period.

The Group’s unaudited loss attributable to the owners of the Company was approximately HK\$16.6 million for the Financial Period compared to the profit attributable to the owners of the Company of approximately HK\$120.8 million for the corresponding period last year. The turnaround from profit to loss attributable to the owners of the Company during the Financial Period was mainly attributable to the absence of the one-time significant gain on debt restructuring of approximately HK\$140.9 million arising from the scheme of arrangement entered into between the Company and its creditors in the corresponding period last year. If this one-time gain is deducted, the operating loss attributable to the owners of the Company was actually decreased from approximately HK\$20.1 million in the corresponding period last year to approximately HK\$16.6 million in the Financial Period.

The board of the Directors (the “**Board**”) does not recommend to pay dividend for the Financial Period.

BUSINESS REVIEW

During the Financial Period, the Group was principally engaged in the following businesses: (i) trading of refined oil and chemicals business; and (ii) power and data cords business.

In terms of the geographical market performance, the United States and the PRC contributed to approximately 0.4% (2021: approximately 37.46%) and approximately 95.0% (2021: approximately 55.24%) of the Group’s total unaudited revenue respectively, while the remaining approximately 4.6% (2021: approximately 7.3%) came from its other markets.

TRADING OF REFINED OIL AND CHEMICALS BUSINESS

The Group seizes the opportunity of the national carbon neutrality and carbon peak initiatives based on the clean energy industry chain. By proactively promoting the clean energy trading business, actively connecting upstream natural gas resources, developing downstream customer markets, the Group will match the supply and demand for clean energy and provide upstream units with downstream customers with stable business and continuous gas consumption; provide downstream customers with natural gas products with strong gas supply guarantee capability and cost competitiveness, so as to achieve the natural gas trading business and obtain trading profits. The Group's natural gas trading business mainly includes pipeline natural gas and liquefied natural gas ("LNG") with the focus on domestic trading, and will actively carry out international business as and when appropriate.

The pipeline natural gas trading business adopts a model of gas in and gas out, and arranges and implements the transmission plan by purchasing with large oil and gas central enterprises, local coalbed methane producers, shale gas producers and other gas suppliers in combination with market demand; it is transmitted through the national and local pipe networks, and received by downstream customers at the local pipe network distribution station. Pipeline natural gas is mainly supplied to urban gas distributors to meet the gas demand of urban gas users.

The LNG trading business adopts a model of liquid in and liquid out. It purchases from the LNG manufacturer. The purchase price is determined based on the change in market price on spot purchase. After the purchase, the LNG is transported by LNG cryogenic tank car from the storage station to the terminal supply stations including LNG gasification station, distributed LNG cylinder station and filling station to meet the gas demand of downstream customers. The users mainly include urban gas companies, industrial and commercial enterprises and other customers.

During the Financial Period, the Group's unaudited revenue from sales of natural gas was approximately HK\$339.4 million (2021: Nil).

POWER AND DATA CORDS BUSINESS

The three key product groups for power and data cords business were (i) power and data cords for mobile handsets and personal care products; (ii) medical control devices; and (iii) power cords and inlet sockets for household electric appliances. Each product group has its own types of products. During the Financial Period, the Group manufactured over 40 types of power and data cords for mobile handsets and personal care products, and over 450 types of power cords and inlet sockets for household electric appliances. The Group also involved in the assembly and sale of medical control devices, which are primarily used by patients in hospital wards and the related accessories.

During the Financial Period, the Group's unaudited revenue from power and data cords business decreased by approximately 29.1% to approximately HK\$32.7 million (2021: approximately HK\$46.1 million). The decrease was due to the increased in competition and the increased in popularity of multiple function cables so that the demand for traditional cables has decreased.

OUTLOOK

During the Financial Period, although global economic picked up in a faster pace, the economic has not fully recovered to the level before the COVID-19 outbreak. Unsynchronised global epidemic prevention and control, uneven economic recovery, intensified political and economic games and unsure monetary policy have all increased uncertainty.

The Chinese government has committed to realise carbon peak in 2030 and carbon neutrality by 2060. As a major energy consuming country, the fundamental key to achieve "double-carbon" target is to change the development pattern of energy industry with utilisation of technology and innovation, acceleration in transformation to and substitution with clean energy and increase in energy efficiency so as to minimise the impact to the atmosphere and environment.

As an emerging energy corporation, the Group's corporate mission is to "Benefit People's Livelihood with Clean Energy and Technology and Innovation". We focus on the development of clean energy industrial chain and sensitively utilise the R&D results of frontier technology in order to explore and advance industrialisation in energy technology and to connect and integrate with quality projects and resources in China and overseas, through which the Group could create massive synergy between capital, technology, business and operational management. Therefore, the Group will strive to establish its core competitiveness in the fields of new energy materials, energy saving and environmental protection and digital technologies for energy safety, and develop into an technological energy corporation with prominent influence and reputation within the industry.

On 22 November 2022, Baineng (Tianjin) Energy Trading Co., Limited* (百能(天津)能源貿易有限公司) (“**Baineng Tianjin**”), a wholly owned subsidiary of the Company, and Dongguan Daosheng Natural Gas Co., Limited* (東莞市道生天然氣有限公司) (“**Dongguan Daosheng**”) entered into a joint venture agreement (“**Joint Venture Agreement**”) pursuant to which Baineng Tianjin and Dongguan Daosheng agreed to establish a joint venture company in Shenzhen for a term of 30 years to develop the trading of natural gas/LNG business in the PRC. Pursuant to the terms of the Joint Venture Agreement, the registered capital of the Joint Venture Company shall be RMB10,000,000 (equivalent to approximately HK\$10,900,000). Baineng Tianjin will contribute RMB6,500,000 (equivalent to approximately HK\$7,085,000) in cash towards the registered capital of the Joint Venture Company. The Joint Venture Company will be owned as to 65% by Baineng Tianjin and will be consolidated into the financial statements of the Company upon its establishment.

The Group shall continue to seek further opportunities to further develop the energy business by way of investment in or acquisition of companies currently engaging in the energy business or submitting tenders or quotations for energy projects. The Directors believe that such strategy will enable to Group to capitalise on its experience and strengthen its position in its energy business to achieve a sustainable growth and maximize returns to the shareholders of the Company (the “**Shareholders**”).
