I. ABOUT THIS REPORT

As a renowned company in China, China Ocean Industry Group Limited (the “Company”) and its subsidiaries (collectively, the “Group”) stringently adhere to their environmental and social responsibilities.

Since the business case for a strong Environmental, Social and Governance (“ESG”) proposition becomes more compelling on the global stage, the Group believes that sustainable, resilient and reliable stewardship and development are essential to the Group’s long-term success. With a clear concept genuinely engrained in the business development, the Group has relentlessly been driving the acceleration of ESG integration and promotion throughout the organisation by taking into account its material social, environmental, economic and governance-related impacts. As sustainability is an inextricable part of business, the Group is deeply aware of the importance of fathoming and addressing the risks arising from the intertwined individual elements, which encompass carbon emissions, climate change, energy and resource use efficiency, labour relations and diversity, dialogues with communities, law compliance and its management robustness. Details of the Group’s management approach in both environmental and social aspects can be found throughout this ESG Report.

This ESG Report covers the environmental and social performance within defined operational boundaries of the Group that includes the Group’s business operations in Hong Kong and mainland China. This ESG Report is prepared in compliance with the ESG Reporting Guide as set out in Appendix 27 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Materiality Assessment

As the ESG risk varies from industries and is subject to the specific business model of the company, the Group undertakes annual reviews in identifying and understanding its stakeholders' main concerns and material interests for the ESG Report. In FY2019, the Group kept engaging its stakeholders in its business development on a continuous basis. In FY2018, the Group performed a materiality assessment survey, which aimed to pinpoint the most pressing issues that may significantly impact the Group's sustainable development. The engagement process ranged from stakeholder identification, analysis, selection, communication, to results evaluation and topic prioritisation. Specifically, material stakeholders were chosen based on their influence and dependence on the Group, and then invited to participate in this online survey that was comprised of numerous well-designed questions to express their concerns on a list of sustainability issues. Through such objective, transparent and decision-useful materiality assessment, the Group could prioritise the material ESG topics and emphasise in the ESG report.

The Group believes that the direction of sustainable development and business strategies should be long-lasting and continual. In alignment with the Group's ongoing sustainable development plans, therefore, the Group decided to continue to use the outcome of the materiality assessment in FY2018, in order to better track its sustainability progress and to maintain the consistency of reporting and development.

With respect to materiality assessment, the Group identified "occupational health and safety", "energy use" and "air and greenhouse gas emissions" as issues of the highest importance to its stakeholders and the Group. This review has helped the Group to evaluate its sustainability issues and highlight the material and relevant aspects so as to align them with stakeholders' expectations.

重要性評估

鑒於不同行業的公司所面對的環境、社會及管治風險有所不同並取決於公司的具體業務模式，本集團每年進行檢討，以識別及了解其利益相關者對環境、社會及管治報告的主要關注點及重大利益。於二零一九財年，本集團持續邀請其利益相關者參與其業務發展。於二零一八財年，本集團進行重要性評估調查，旨在查明或會對本集團的可持續發展造成重大影響的最緊迫的問題。參與過程涵蓋利益相關者的確定、分析、甄選、溝通，乃至結果評估及議題排序。具體而言，本集團依據利益相關者對本集團的影響及依賴程度挑選重要的利益相關者，並隨後邀請彼等參與是次網上調查，就一系列可持續發展性事宜提出其看法。調查包括多項精心設計的問題，透過客觀、透明且對決策有幫助的重要性評估，本集團對本環境、社會及管治報告內的重大環境、社會及管治議題及強調事宜進行排序。

本集團認為可持續發展的方向及業務策略應長遠持久且不間斷，與本集團目前正在實施的可持續發展計劃一致，因此，本集團決定繼續使用二零一八財年的重要性評估結果，以更好地追蹤可持續發展進度及維持報告與發展的一致性。

就重要性評估而言，本集團確定「職業健康與安全」、「能源使用」以及「空氣及溫室氣體排放」是對其利益相關者及本集團最為重要的問題。是項檢討有助於本集團優先評估其可持續議題，並突出重要及相關方面，從而與利益相關者的期望一致。

VI. ENVIRONMENTAL SUSTAINABILITY

The Group has been committed to the long-term sustainability of the environment and community where it operates. The Group stringently controls its emissions and consumption of resources and has complied with all relevant environmental laws and regulations in Hong Kong and the People's Republic of China ("PRC") in its daily operation. All operating regions of the Group have implemented effective energy conservation measures to reduce emissions and resource consumption. The applicable and material laws and regulations with which the Group strictly complied in FY2019 included:

- Environmental Protection Law of the People's Republic of China (中華人民共和國環境保護法);
- Law of the People's Republic of China on the Prevention and Control of Atmospheric Pollution (中華人民共和國大氣污染防治法);
- Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Wastes (中華人民共和國固體廢物污染環境防治法);
- National List of Hazardous Wastes (國家危險廢物名錄);
- Administrative Measures on Registration of Dangerous Chemicals (危險化學品登記管理辦法);
- Law of the People's Republic of China on the Prevention and Control of Water Pollution (中華人民共和國水污染防治法); and
- Waste Disposal Ordinance (Cap. 354 of the Law of Hong Kong).

This section primarily discloses the policies and practices of the Group on emissions, use of resources, the environment and natural resources during FY2019.

VI. 環境可持續性

本集團一直致力於其營運所處的環境及社區的長期可持續發展。本集團嚴格控制排放物及資源消耗，並於其日常營運過程中遵守香港及中華人民共和國（「中國」）的所有有關環境法律及規例。本集團的所有作業區均實施有效的節能措施以減少排放物及資源消耗。本集團於二零一九財年嚴格遵守的適用及重要法律及法規包括：

- 《中華人民共和國環境保護法》；
- 《中華人民共和國大氣污染防治法》；
- 《中華人民共和國固體廢物污染環境防治法》；
- 《國家危險廢物名錄》；
- 《危險化學品登記管理辦法》；
- 《中華人民共和國水污染防治法》；及
- 《廢物處置條例》（香港法例第354章）。

本節主要披露本集團於二零一九財年在排放物、資源使用、環境與自然資源方面的政策及常規。

A.1. Emissions

Air Emissions

In FY2019, the Group adamantly abided by government laws and regulations regarding environmental protection in the daily operation.

Shipbuilding business & Steel structure engineering and installation business

In FY2019, air emissions from the shipbuilding and steel structure engineering business were mainly generated from the production process. The Group used diesel and gasoline as its major energy sources for the production process. The business segment generated a small amount of air emissions due to the use of paint spray, the amount of which was too small to be considered. The exhaust gases from the production process were under strict control and in strict compliance with the local regulations after filtration.

To reduce the amount of air emissions, the Group took a variety of effective measures in its daily operations in FY2019. Specifically, the mature environmental management system was set up in each of the manufacturing bases. The Manufacturing Department established a management team that specialised in environmental protection and energy-saving matters, while each manufacturing base allocated specific staff in charge of the operation of environmental protection and energy-saving facilities. Further, in order to reduce the emission of air pollutants, the Group adopted sealing operations for processes that may generate exhaust fumes during the production process and installed dust removal devices.

Intelligent car-parking and automotive electronics & Trading and financial service business

In these business segments, air emissions were mainly generated from car use in daily operations. Due to the nature of the business, gasoline was the major energy resource consumed during operations. The Group encouraged the employees to choose public transport means instead of driving private vehicles, and to consider low-carbon lifestyles, thereby mitigating their impacts on the environment.

A.1. 排放物

空氣排放物

於二零一九財年，本集團的日常營運堅定執行環保相關的政府法律法規。

造船業務以及鋼結構工程及安裝業務

於二零一九財年，造船及鋼結構工程業務的空氣排放物主要來自生產過程。本集團已採用柴油和天然氣作為生產過程的主要能量來源。業務分部因使用油漆噴霧會產生少量空氣排放物，其數量過少而不予考慮。生產過程中的廢氣會作嚴格控制及於過濾後嚴格遵守地方法規。

為減少空氣排放物數量，本集團已於二零一九財年於日常營運過程中採取多項有效措施。具體而言，各生產基地已設立成熟的環境管理系統。生產部門已成立專注於環境保護及節能事項的管理團隊，而各生產基地分配負責環境保護及節能設施運行的專責員工。此外，為減少空氣污染物排放，本集團對生產過程中可能產生廢氣的流程採用密封作業，並安裝除塵裝置。

智慧停車及汽車電子以及貿易及金融服務業務

就該業務分部而言，空氣排放物主要來自日常營運中汽車的使用。因該業務性質使然，汽油為營運過程中的主要能耗來源。本集團已鼓勵僱員使用公共交通工具代替駕駛私家車，並考慮低碳生活方式，從而減輕其對環境的影響。

The types of air emissions generated from the Group were mainly nitrogen oxides (“NO_x”), sulphur oxides (“SO_x”) and Particular Matter (PM) from the production process and the use of vehicles. In FY2019, the Group generated a total of 401.3kg SO_x, 1,073.3kg NO_x, and 179.1kg PM.

Greenhouse Gases (“GHGs”)

The GHG emissions of the Group mainly came from the indirect emissions of electricity consumption, and the production and transportation process. To reduce the amount of GHGs from the Group, the Group has been persevering with measures for carbon offset, and focusing its efforts on tree planting since its inception. As GHG emissions are positively correlated to electricity consumption, the Group insisted on reducing the electricity consumption in its daily operation through effective measures, which are further explained in the subsection headed “Electricity” under section A.2. Use of Resources of this ESG Report.

In FY2019, the total GHG emissions of the Group descended substantially as the business was undergoing strategic restructuring, which led to a drastic drop in electricity consumption. With the efforts of the Group in controlling the use of vehicles for business travel and goods transportation, the GHG emissions from mobile combustion sources declined by around 16.3%.

Wastewater

Wastewater produced by the Group mainly came from the operations of factories and daily consumption from its staff in offices and canteens. The quality of wastewater must meet the national and local requirements before being discharged. Specifically, the domestic wastewater was discharged to the sewage pipe directly, while industrial wastewater was collected separately in special containers and sent to the professional treatment company for further treatment.

本集團產生的空氣排放物類型主要為生產過程及汽車使用產生的氮氧化合物、硫氧化合物及顆粒物。於二零一九財年，本集團共產生硫氧化合物401.3千克、氮氧化合物1,073.3千克及顆粒物179.1千克。

溫室氣體

本集團的溫室氣體排放主要來自電力消耗的間接排放，以及生產及運輸過程。為減少本集團產生的溫室氣體，本集團自成立以來一直堅持碳補償措施，並致力於植樹。由於溫室氣體排放量與電力消耗呈正相關關係，本集團力圖通過有效措施減少日常運行中的用電量，有關措施於本環境、社會及管治報告第A.2.節資源使用的「用電」分節中作進一步闡釋。

於二零一九財年，由於本集團的業務進行策略性重組，導致用電量大幅減少，故其溫室氣體排放總量大幅下降。在本集團控制公務旅行及貨物運輸車輛使用的努力下，移動源燃燒產生的溫室氣體排放量下降約16.3%。

廢水

本集團產生的廢水主要來自工廠的運營以及辦公室員工及餐廳的日常消耗。廢水的水質必須符合國家及地區的規定後才能排放。尤其是，生活廢水直接排放至排污管，而工業廢水則單獨儲存於特殊容器並運送至專業處理公司進行進一步處理。

In FY2019, the Group generated a total of 123.2 m³ of wastewater. The sharp decrease in wastewater generation was mainly attributed to the decline of production and strategic business restructuring. A small amount of hazardous wastewater of 11.2 m³ was generated from factories of shipbuilding business and was scientifically treated before being discharged to the wastewater treatment plant. Since wastewater generation is positively correlated to the water consumption, the Group adopted specific measures to reduce the water consumption, which are further explained in the subsection headed “Water” under section A.2. Use of Resources of this ESG Report.

Solid Wastes

Given the business nature, solid wastes produced by the Group can be divided into general waste and hazardous waste. In FY2019, the general solid wastes included domestic and commercial solid wastes that were generated by the employees during working hours, waste paper, outmoded office appliances and other non-hazardous solid wastes. The general solid wastes were normally collected in rubbish bags and sent to the local recycling & treatment plants.

Hazardous wastes, which were mainly generated from the shipbuilding business and steel engineering and installation business, were collected and sealed in specific containers and sent to professional treatment companies regularly. The hazardous wastes included paint buckets, waste mineral oil, waste oil drums, paint residue, electroplating sludge, waste batteries, waste ink cartridges, waste lamps, waste film, and oily rags. For the treatment of hazardous waste, the Group has signed a pollutant recycling agreement with professional manufacturers to regularly recycle the industrial wastes. The relevant department of the Group also regularly inspected and supervised the performance of on-site environmental pollution control. Since the total amount of hazardous solid waste was too small to be recorded, no quantitative measurement was performed.

於二零一九財年，本集團產生合共123.2立方米的廢水。廢水的大幅減少乃主要由於產量的下降及策略性業務重組所致。工廠造船業務所產生的少量11.2立方米的有害廢水，經科學處理後排放至廢水處理廠。由於廢水產生與水資源消耗量呈正相關，本集團已採納具體措施減少水資源消耗，進一步措施載於本環境、社會及管治報告第A.2.節資源使用的「用水」分節中。

固體廢棄物

鑒於業務性質，本集團產生的固體廢棄物可分為一般廢棄物及有害廢棄物。於二零一九財年，一般固體廢棄物包括僱員於工作時間產生的生活及商業固體廢棄物、廢紙、廢棄的辦公室設備及其他無害固體廢棄物。一般固體廢棄物通常使用垃圾袋收集並送往當地回收及處理廠。

有害廢棄物主要產生自造船業務、鋼結構工程及安裝業務，該等廢棄物將蒐集及封裝於指定容器內，定期送往專業處理公司。有害廢棄物包括油漆桶、廢棄礦物油、廢油桶、漆渣、電鍍污泥、廢電池、廢墨盒、廢燈具、廢膠片及油氈。就有害廢棄物處理而言，本公司已與專業製造商簽訂污染物回收協議以定期回收工業廢棄物。本集團相關部門亦定期對現場環境污染治理情況進行檢查監督。由於有害固體廢棄物總量太小而無法記錄，因此並無進行定量計算。

The Department of Transportation was mainly in charge of the collection, storage and transportation of all the solid wastes. The Planning Department was responsible for the disposal by delegating the qualified companies to treat all the hazardous wastes, while the Department of Security supervised all the procedures from waste generation to disposal.

To reduce the environmental impacts of solid wastes, the Group implemented various measures in its daily operations. The Group kept incorporating the concept of recycling used paper and stationaries such as lunch boxes, bottles and cans into operations. The Group prohibited the use of disposable paper cups. In FY2019, the Group generated a total of 254 tonnes of non-hazardous solid wastes. In particular, the Group has always been committed to the application of the “3R” principle – reduce, reuse and recycle. During the year under review, a total of 960 tonnes of metal waste was recycled by the Group for further treatment before being reused for other operations.

Noise

In compliance with the law and regulations in the PRC, the Group conducted noise detection around the operation site to meet the requirement of the Emission Standard for Industrial Enterprise Noise at Boundary (工業企業廠界環境噪聲排放標準) (GB12348-2008).

運輸部主要負責收集、儲存及運輸所有固體廢棄物。規劃部負責處置，指派合資格公司處理所有有害廢棄物，而安全部負責監督廢棄物從產生到處置的全過程。

為降低固體廢棄物的環境影響，本集團於其日常營運中落實多項措施。本集團堅持將回收廢紙、餐盒及瓶罐等固體物之理念融入營運中。本集團禁止使用一次性紙杯。於二零一九財年，本集團產生合共254噸的無害固體廢棄物。尤其是，本集團一直堅持應用「3R」（即減少(reduce)、再用(reuse)及回收(recycle)）原則。於回顧年度內，本集團回收合共960噸金屬廢棄物，並於再用於其他營運前進行進一步處理。

噪音

根據中國法律及法規，本集團已於經營場所周圍進行噪音檢測以符合《工業企業廠界環境噪聲排放標準》(GB12348-2008)之規定。

All the electricity consumption by the Group came directly from the regular operations of both the operating factories and offices. The Group continued its practice to keep a comprehensive record of its electricity consumption. The total electricity consumption of the Group amounted to 319,000 kWh in FY2019. To ensure the effective use of electricity, the Group formulated internal policies, with which all subsidiaries of the Group stringently conformed to save energy. The Group's electricity saving policies included but were not limited as follows:

In the offices and parking lots:

- Modify the set temperature of air conditioners in the offices based on the season;
- Clean office equipment such as refrigerators, air conditioners and shredders regularly to ensure their efficiency;
- Replace the outmoded facilities to increase the electricity utilisation efficiency;
- Engage employees in energy management and conservation and bring forward brilliant ideas for energy-saving;

用電

本集團的所有電耗直接來源於運營工廠及辦公室的日常營運。本集團一如既往存置其電耗的詳細記錄。於二零一九財年，本集團的總電耗為319,000千瓦時。為確保有效用電，本集團已制定內部規例，並要求本集團所有附屬公司嚴格遵守以節約能源。本集團的節電規定包括但不限於以下各項：

於辦公室及停車場：

- 根據季節需要調整辦公室內的空調的設定溫度；
- 定期清洗冰箱、空調及碎紙機等辦公室設備，以維持其性能；
- 更換陳舊設備，以提高用電效率；
- 聘用員工進行能源管理及保護，並收集有關節能的寶貴意見；
- 使用貼有節能標籤的電器；及
- 辦公照明安裝LED燈代替高電耗燈。

In the factories:

- Limit the use of electric heaters for the industrial need, and employees must receive the permission of the relevant department in advance;
- Turn off idle machines timely;
- Arrange the operation of machines appropriately and repair them immediately;
- Install a solar heating system in the dormitory;
- Optimise the operational procedures by replacing the spraying production line, ovens and refrigeration equipment with more efficient ones;
- Install power compensation devices to reduce power loss;
- Minimise the use of high-power equipment during production; and
- Stagger the peak electricity consumption period and arrange energy-intensive production processes at night to save electricity.

In FY2019, the total electricity consumption dropped dramatically due to the reduction of production and strategic business restructuring.

於工廠：

- 限制使用工業用電加熱器，員工使用必須事先取得有關部門的許可；
- 及時關閉閒置機器；
- 合理安排機器運作，並及時進行維修；
- 在宿舍安裝太陽能加熱系統；
- 以更高效率的設備代替噴塗生產線、烤箱及製冷設備，優化操作程序；
- 安裝功率補償裝置，以減少功率損耗；
- 在生產過程中盡量減少使用大功率設備；及
- 錯開用電高峰期，夜晚安排高電耗生產程序以節約電力。

於二零一九財年，由於生產減少及策略性業務重組，總電耗急劇下降。

Water

In FY2019, water consumed by the Group was mainly from domestic use by its employees during the working hours and industrial use for production. The total water consumption of the Group was 112,000 m³ in FY2019. In order to strengthen its employees' awareness of water conservation, the Group utilised online resources to promote the importance of water conservation among staff, and established a reward and penalty mechanism to motivate all employees to save water. To further improve the utilisation efficiency of water resources, the Group formulated internal policies, including but were not limited to the followings:

- Recycle used water in daily practice if possible;
- Adopt low-flow faucets or showers in the office and staff living areas. Once there is a leaking problem, the Group will send a plumber immediately; and
- Allocate resources and manpower to inspect the water supply system regularly.

In FY2019, the amount of water withdrawal declined significantly as compared to the figure in FY2018 due to the reduction of production and strategic business restructuring.

Energy

The Group consumed diesel and gasoline as its primary energy resources in FY2019. The diesel consumption came from the production process of shipbuilding and steel engineering. The diesel and gasoline consumed by the Group's operations during FY2019 amounted to 67,540 litres and 11,990 litres, which fell by 75% and 89% respectively due to the strategic business restructuring.

用水

於二零一九財年，本集團的用水主要來源於員工在工作時間產生的生活用水及生產時產生的工業用水。於二零一九財年，本集團的總用水量為112,000立方米。為加強員工的節水意識，本集團利用線上資源向員工宣傳節水的重要性，並設立獎罰機制以鼓勵全體僱員節約用水。為進一步提高水資源的利用率，本集團已制定內部規例，包括但不限於以下各項：

- 日常過程中盡可能地循環用水；
- 在辦公室及職工生活區採用低流量水龍頭或淋浴頭，倘出現漏水問題，本集團將即時派遣水管工維修；及

於二零一九財年，由於生產減少及策略性業務重組，取水量較於二零一八財年急劇下降。

能源

於二零一九財年，本集團主要消耗柴油及汽油。柴油消耗來源於造船生產過程及鋼筋工程。二零一九財年本集團營運所用柴油及汽油分別為67,540升及11,990升，因策略性業務重組分別下降75%及89%。

To avoid unnecessary fuel consumption, the Planning Department formulated the plan for procurement based on the actual production volume. Relevant departments were responsible for examining and recording the consumption of fuels, while users kept their consumption records and proactively took fuel-saving measures.

The Group also consumed other gaseous resources that supported the production process as well in FY2019. The gases consumed by the Group included compressed air, oxygen, carbon dioxide gas, acetylene gas, nitrogen, argon, steam and other gases for the production process. Gases purchased by the Purchasing Department were carefully examined and recorded. Users were required to strengthen the inspection of gas pipelines to prevent any air discharge and leakage. The Group was also responsible for checking the gas storage containers and organising maintenance work on a regular basis.

Paper

In FY2019, paper was one of the major natural resources used by the Group, especially for operations in its offices. To reduce the consumption of paper, the Group adopted the following practices:

- Set duplex printing as the default mode for most network printers when printouts are necessary;
- Promote the idea of “Think before print” by using posters and stickers in the offices;
- Place boxes and trays beside photocopiers as containers to collect single-sided paper for reuse and used paper for recycling;
- Reuse the back of single-sided documents for printing or as draft paper; and
- Recycle used stationery whenever possible.

為避免不必要的油耗，規劃部已根據實際產量制定採購計劃。有關部門負責檢查及記錄所消耗的燃油，而相關用油單位亦須存備用油記錄，並積極採取節油措施。

於二零一九財年，本集團亦使用支持生產程序的其他燃氣資源。於生產過程中，本集團消耗的氣體包括壓縮空氣、氧氣、二氧化碳、乙炔氣、氮氣、氫氣、蒸汽及其他氣體。採購部門購買的氣體已經過仔細的檢查及記錄。使用者須加強對燃氣管道的檢查，以防止任何氣體溢出及洩漏。本集團亦負責檢查儲氣罐及定期組織維護工作。

紙張

於二零一九財年，紙張為本集團（尤其是辦公室營運）所使用的其中一項主要自然資源。為減少紙張消耗，本集團已採納以下措施：

- 需要打印時，將大部分網絡打印機的預設模式設定為雙面打印；
- 在辦公室使用海報及便利貼推行「印前三思」的理念；
- 在複印機旁放置箱及盤，收集單面印刷的紙張以供再利用及收集用完的紙張以供回收利用；
- 重複使用舊的單面印刷文件的背面進行列印或作為草稿紙；及
- 盡可能回收利用曾使用的文具。

In FY2019, the total consumption of paper resources reached 4,750 kilograms, which moderately increased when compared to that in FY2018 due to more administrative work in the reporting year. Embracing the concept of the “3R” principle, the Group put great emphasis on the recycling of used paper and a total of 460 kilograms of paper were recycled in FY2019.

於二零一九財年，紙張資源消耗總量達4,750千克，較二零一八財年略有增加，原因是報告年度內行政工作增加。秉持「3R」原則的理念，本集團重視回收利用廢紙，於二零一九財年共回收460千克紙張。

提供安全的工作環境

保護僱員免受傷害及保護彼等的健康乃本集團成功的關鍵。本集團一直致力於維持並持續發展僱員工作中的健康、安全及福利。於二零一九財年，本集團不斷為其僱員創造一個乾淨、整潔、無煙、無害、無危險、安全健康的工作環境。具體而言，本集團的職業健康與安全由本集團的安全部門負責，該部門指派特定的安全人員不時對工廠及部門進行現場檢查，以確保本集團的常規符合政府的監督，同時確保本集團為其僱員提供健康安全的工作環境。管理層及員工每日必須遵循內部生產安全管理規則及政策開展工作，有關規則及政策包括一系列職業健康與安全措施，如消防安全、化學品管理及應急管理等方面的政策以及安全獎懲制度。關於危險化學品的處理，本集團要求僱員根據其化學性質將其分開堆放，以減少事故風險，同時將危險化學品的處理及處置外包予合資格供應商，以最大程度地減少因不當處理而產生的任何風險。本集團亦定期安排負責特殊工種的員工進行體檢，並要求彼等在上崗前持有有效的證書，以確保彼等熟悉所有操作流程。不同部門須承擔的責任有整體指示。本集團亦制定應急計劃，並每年至少安排一次演習。此外，本集團會發佈安全公告、橫幅、標語及警告標識，以提醒僱員注意安全。

Further, the Group established a training centre in Shandong to help employees build their occupational development schemes and provide technical training courses.

The Group encouraged outstanding employees to attend external training for enhancing their competitiveness and expanding their capacity through continuous learning. The Group also invited external organisations and experts to provide job-related training to its employees.

In FY2019, over 1,500 hours of training courses were provided by the Group to its employees.

B.3. 發展及培訓

本集團重視培訓，認為培訓對提高本集團的整體經營效率至關重要。為透過賦能、團隊及培訓培養員工，本集團為員工安排全面的培訓及發展計劃，以加強員工的工作相關技能及知識。

本集團為新聘員工提供綜合入職培訓，幫助彼等了解企業文化、業務流程、工作健康與安全、管理制度及集團發展。本集團為工作崗位培訓設立內部導師制度，旨在幫助應屆畢業僱員履行其工作職責。對於具備充足經驗的僱員，本集團制定年度培訓計劃，以通過講座及在線學習網站加強其工作相關的技能及知識。

本集團亦採用移動應用程式作為學習平台。具體而言，有關部門將通過內部網絡共享有益的學習資料。除此之外，本集團已於山東省設立培訓中心，幫助僱員建立職業發展計劃及提供技術培訓。

本集團鼓勵優秀僱員參加外部培訓，通過不斷學習提高競爭力及提升能力。本集團亦邀請安排外部培訓機構及培訓人員為其僱員提供工作相關培訓課程。

於二零一九財年，本集團向其僱員提供超過1,500個課時的培訓課程。

B.4. Labour Standards

The Group strictly abided by the Employment Ordinance (Cap. 57 of the Law of Hong Kong), Labour Law of the People's Republic of China (中華人民共和國勞動法), Labour Contract Law of the People's Republic of China (中華人民共和國勞動合同法) and other related labour laws and regulations in Hong Kong and the PRC to prohibit any child or forced labour employment during the year under review.

To combat illegal employment on child labour, underage workers and forced labour, the Group's human resources staff required job applicants to provide valid identity documents before the confirmation of employment to ensure that the applicants were lawfully employable. If any untrue or invalid information is provided, the Group will terminate the employment according to relevant laws. The Group put child labour and compulsory labour policies in its staff manual to eliminate the labour risks. The Human Resources Department of the Group was responsible for monitoring and ensuring compliance with the latest relevant laws and regulations that prohibit child labour and forced labour.

During the year under review, the Group was not in violation of any of the relevant laws and regulations, in relation to the prevention of child and forced labour that has a significant impact on the Group.

為防止非法聘用童工、未成年勞工及強制勞工的問題發生，在確定僱傭關係之前，本集團的人力資源部員工會要求應徵人員提供有效的身份證明文件，確保應職人員為合法可受僱的人士。倘提供任何失實或無效資料，本集團將根據相關法律終止僱傭。本集團將童工及強制勞工政策寫入其員工手冊以杜絕勞工風險。本集團的人力資源部負責監控並確保本集團遵守禁止童工及強制勞工的最新相關法律及法規。

於回顧年度內，本集團在防止童工及強制勞工方面，並無違反任何對本集團有重大影響的相關法律及法規。

OPERATING PRACTICES

B.5. Supply Chain Management

As a socially responsible enterprise, it is critical for the Group to maintain and manage a sustainable and reliable supply chain that makes minimal negative impacts on the environment and society. In FY2019, the Group systematically assessed and mitigated social, environmental, health & safety, and ethical risks in its supply chain. Each of the operating subsidiaries within the Group monitored the quality of its suppliers and their supply chain practices on a strict and continuous basis. The Group partnered with suppliers who are expected to share its values of respecting people and running business with integrity and excellence. Due to the nature of the business, the trading and financial service business involved only a few numbers of suppliers, which to a certain degree hence was not discussed in detail in this part. In FY2019, the Group partnered with over 400 suppliers in its business operations. In order to maintain the stability of the supply chain and business, the Group maintained stable communications with various suppliers and signed contracts with them to establish long-term cooperative relationships. The Group contacted suppliers through various communication methods such as emails and on-site visits, and managed the catalogue of qualified suppliers reasonably. About 50-90% of suppliers maintained a stable, safe and effective cooperation and communication mode with the Group. In addition, in order to ensure that the Group can reduce its impact on the environment from the entire value chain, in terms of green procurement policies, the Group prioritised high-quality materials that have low environmental pollution and are internationally recognized.

營運慣例

B.5. 供應鏈管理

作為一間對社會負責任的企業，維持及管理可持續及可靠的供應鏈，以盡量減低對環境及社會造成的負面影響，對本集團而言至關重要。於二零一九財年，本集團系統地估計並降低其供應鏈的社會、環境、健康及安全以及道德風險。本集團內各營運附屬公司嚴格持續監察其供應商的質素及供應鏈慣例。本集團與預期擁有共同價值觀（即尊重他人、誠信經營、追求卓越）的供應商合作。由於業務性質，貿易及金融服務業務僅涉及少數供應商，因此可在一定程度上不在本節作詳細討論。於二零一九財年，本集團於其業務營運中與逾400名供應商合作。為維持供應鏈及業務的穩定性，本集團與不同供應商保持穩定溝通，並與彼等簽訂合約，建立長期合作關係。本集團通過電郵及實地考察等各種溝通方式與供應商聯繫，並合理管理合資格供應商目錄。約有50%至90%的供應商與本集團維持穩定、安全及有效的合作與溝通模式。此外，為確保本集團能夠減少整個價值鏈對環境的影響，在綠色採購政策方面，本集團優先選擇環境污染程度低及國際公認的優質材料。

Shipbuilding business & Steel structure engineering and installation business

Despite the reduction of production and strategic business restructuring, the policies of the business segments in maintaining a stable supply chain never changed.

The Group set up strict policies for supplier management. Specifically, the Group adopted the directory management and blacklist system and required suppliers to meet the China Classification Society (“CCS”) standard. Relevant environmental protection certificates, product production qualification certificates, the supplier’s reputation, past performance and credit agency records were all important factors that the Group considered when selecting suppliers. The Group necessitated its well-selected suppliers to be legitimate in providing high-quality products at a reasonable price. Suppliers in compliance with relevant environmental laws and regulations of the PRC are the prior choice of the Group.

The Procurement Department of the Group conducted surveys of potential suppliers in terms of their product quality, price, production capacity, reputation and their social and environmental responsibility during the selection process. According to the assessment, the Group blacklisted the supplier who was found to have serious problems with law compliance, delivery, health and safety or environmental risks. The qualified suppliers were added to the approved supplier list after an in-depth assessment based on the criteria explicitly set by the Group. All the qualified suppliers shall provide a copy of the business license, approval, qualification or inspection certificate, quality assurance certificate or product certificate, and other certificates that can prove the suppliers’ ability. The Group also required its suppliers to obtain specific industry qualifications if necessary.

造船業務及鋼結構工程及安裝業務

儘管減產及策略性業務重組，業務分部於維持穩定供應鏈方面的政策從未改變。

本集團建立嚴格的供應商管理政策。具體而言，本集團採用名單管理及黑名單制度，並要求供應商符合中國船級社（「CCS」）標準。甄選供應商時，相關環保證書、產品生產資質證書、供應商的聲譽、過往表現及信貸機構記錄均為本集團考慮的重要因素。本集團要求其經甄選供應商依法提供高質量、價格合理的產品，並優先選擇遵守中國相關環保法律及法規的供應商。

本集團採購部門在甄選過程中會對潛在供應商的產品質量、價格、產能、聲譽以及社會及環境責任進行調查。根據評估，倘發現供應商在法律合規、交付、健康與安全或環境風險方面存在嚴重問題，本集團會將其列入黑名單。合資格供應商在經過按照本集團明確設立的標準深入評估後會被添加至核准供應商名單內。所有合資格供應商須提供營業執照、審批、資格或檢驗證書、質量保證證書或產品證書以及其他可證明供應商能力之證書的副本。本集團亦要求供應商取得特定行業資格（如必要）。

To ensure the stability of the supply chain, at least two suppliers were selected for each raw material. In FY2019, the Group strengthened its monitoring and follow up of corrective actions to improve the control of its suppliers. Specifically, the Group performed an annual evaluation of the suppliers in terms of top management turnover, production capacity, changes in manufacturing techniques, raw materials and quality assurance ability to track their performances and law compliance. Random inspections before accepting the raw materials were conducted as well to check if they are consistent with the product-related quality certificates and test reports. If the supplier's products do not meet the Group's requirements after the official delivery, the Group reserves the right to adjust the orders and ask suppliers for economic compensations according to the mutually-agreed contract.

The Group regularly provided quality management training and advice to suppliers at meetings. The Group maintained close liaison with its suppliers to ensure suppliers' compliance with local laws and regulations in operations and adherence to their business ethics such as the prohibition of the employment of child labour and forced labour. To facilitate better cooperation and communication between the Group and suppliers, suppliers were required to promptly update their inventory information and price through social networks, telephone calls and other tools.

為確保供應鏈的穩定性，各原材料至少選擇兩名供應商。於二零一九財年，本集團加強其對糾正措施的監控及跟進，以改進對供應商的控制。具體而言，本集團對供應商的高層變動、產能、製造技術變動、原材料及質量保證能力方面進行年度評估，以追蹤彼等的表現及法律合規情況。原材料驗收前亦進行隨機抽查，以檢查是否與產品相關質量證書及檢測報告一致。倘供應商的產品於正式交付後未能符合本集團的要求，本集團有權調整訂單並根據雙方協定的合約要求供應商作出經濟賠償。

本集團定期在會議上向供應商提供質量管理培訓及意見。本集團與供應商保持緊密聯繫，以確保供應商在經營過程中遵守當地法律及法規，並遵守彼等的商業道德準則，例如禁用童工及強迫勞工。為促進本集團與供應商之間更好的合作與溝通，供應商須透過社交網絡、電話及其他工具及時更新其存貨資料及價格。

The Group strived to reduce its environmental impacts along its value chain as well. The product quality standards of the Group clearly stated the specific environmental requirements of the Group. The Group performed interviews with its suppliers to assess their environmental risks, the history of pollution-related accidents, and their awareness of environmental protection.

Intelligent car-parking and automotive electronics

The Group's intelligent car-parking and automotive electronics business included two segments, which were intelligent car-parking and parking lot construction.

For the intelligent car-parking service, raw materials purchased by the Group were PCB, wiring harness, electronic components, galvanized sheet, and structural plastic. The Group set up internal regulations including Purchasing and Outsourcing Procedure (外協外購工作流程) to manage the supply chain and Supplier Field Assessment Report (供應商實地評鑒報告) to select suppliers.

Suppliers were chosen based on the needs for product development and the optimisation of the supplier management system. The Procurement Department went through the information of new suppliers such as the quality and price of products and completed the Supplier Basic Information Form (供應商基本概況表). The relevant departments formed a team to evaluate the pre-selected potential suppliers and filled out the supplier evaluation form in the Supplier Strength Evaluation Form (供應商實力評估表). Evaluations mainly covered product quality, production capacity, reputation, qualification, transportation management and their social and environmental responsibilities. Potential suppliers should at least possess ISO9000 certificates and meet ISO14000 environmental management standards and provide product samples.

本集團亦致力減少其價值鏈的環境影響。本集團產品質量標準明確規定本集團的具體環境要求。本集團與供應商進行會談，以評估供應商的環境風險、污染相關事故記錄以及環保意識。

智慧停車及汽車電子

本集團的智慧停車及汽車電子業務包括智慧停車及停車場建設兩個分部。

就智慧停車服務而言，本集團採購的原材料包括印製電路板、線束、電子元件、鍍鋅板及結構塑料。本集團已制定外協外購工作流程等內部規定，以管理供應鏈及供應商實地評鑒報告，挑選供應商。

供應商乃根據產品開發及供應商管理系統優化需要進行甄選。採購部門檢查新供應商有關產品質量及價格等資料，完成供應商基本概況表。相關部門組成一個小組，對預選潛在供應商進行評估，並於供應商實力評估表填寫供應商評估表。評估主要考慮產品質量、產能、聲譽、資質、運輸管理及其社會與環境責任。潛在供應商須至少具備ISO9000認證及符合ISO14000環境管理標準並提供產品樣品。

Only if the samples of potential suppliers including raw materials, auxiliary materials, components, semifinished products and processed products meet the quality and technical requirements of the Group and pass relevant assessments, can the supplier be marked as qualified suppliers. The qualified suppliers were then required to provide business licenses, tax registration certificate, organization code and other relevant certificates to the Group accordingly.

To ensure the quality of raw material and components, relevant departments conducted quality examinations of the products and made records. Quality management training programmes were provided for suppliers with advice on production risk management and quality management. The Group referred to its internal Control Process of Unqualified Product (不合格品控制程式) in managing and disciplining those who had a history of products being rejected.

The Group assessed the quality of purchased products, delivery time, coordination and/or service of the qualified suppliers every six months and recorded the results of the assessment in the Supplier Assessment Form (供應商實力評估表). For those who fail the assessment, the Group would provide a second opportunity for them to rectify and reform, and then conducted a second assessment.

僅當潛在供應商提供的樣品(包括原材料、輔助材料、元件、半成品及加工產品)符合本集團的質量及技術要求,並通過相關評估時,供應商方可被列作為合資格供應商。合資格供應商其後須向本集團提供相應的營業執照、稅務登記證、組織機構代碼證及其他相關證書。

為確保原材料及元件的質量,相關部門已對產品進行質量檢測並進行記錄。我們亦為供應商提供質量管理培訓及生產風險管理以及質量管理建議。本集團根據其內部不合格品控制程式,管理及懲戒產品曾遭拒收的供應商。

本集團每六個月評估一次採購產品之質量、交付時間、合資格供應商之協作性及/或服務,並將評估結果錄入供應商實力評估表。本集團將給予未能通過評估之供應商一次整改機會,其後進行第二次評估。

For the parking lot construction service, the suppliers were introduced and recommended through internal staff, outsiders and the internet. The recommended suppliers must meet the qualification of the PRC and have no record of any violation of laws in recent two years. At least two suppliers should be chosen as potential suppliers. After the determination of potential suppliers, professional engineers visited the suppliers to inspect the company's capability.

The raw materials must be qualified with the corresponding material testing report. The received raw materials should be randomly selected for third-party testing and applied to the engineering process after meeting the requirements. During the construction process, entrusted third-party qualified supervision companies supervised the quality of materials, services and projects. In addition, the government built specialised agencies that were responsible for supervising the safety and quality of the construction process.

If any accident occurs, the Group coordinated backup suppliers immediately to support the supplement, aiming to ensure that the production process and product quality were not influenced. Meanwhile, a series of investigations and meetings would be launched in order to identify the cause of the accident and to prevent a similar situation from happening again in the future.

就停車場建設服務而言，供應商乃透過內部員工、外部人員及互聯網推介及引薦。推薦供應商必須符合中國的資格，且近兩年並無任何違法記錄。至少應選擇兩名供應商作為潛在供應商。確定潛在供應商後，專業工程師將探訪供應商，檢查公司實力。

原材料必須符合相應的材料檢測報告。收到的原材料應隨機選擇進行第三方測試，並在滿足要求後應用於工程過程。在施工過程中，受委託的第三方合格監理公司監督材料、服務及項目的質量。此外，政府設有專門機構，負責監督施工過程的安全及質量。

倘發生任何事故，本集團會立即協調預備的供應商進行支援，確保生產過程及產品質量不受影響。同時，亦將啟動一系列調查及會議，查明事故原因並防止今後再發生類似情況。

Trading and financial service business

In addition to environmental and social risks, the innovation in the business model may also bring about and amplifies other risks such as legal risks. As such, the Group has established a risk assessment system, which was jointly established by the Risk Assessment Department, the Commerce Department, and the Asset Management Department, from multiple dimensions of customer risk, industry risk, asset operation risk, and business risk. For instance, in the trading and finance business sector, the Group set up project inspection and follow-up mechanism to keep abreast of the operation of the lessee at any time, so as to avoid false transactions and vicious defaults.

For better supply chain management, the Group divided suppliers into different groups according to the contract term, production scale and product category, in order for more efficient management and timely response in case of any risks or accidents arise.

B.6. Product Responsibility

The philosophy of products and service of the Group is to provide products with good quality up to the specification, keep in good relationship with customers, and pursue mutual benefits to both parties at all times.

貿易及金融服務業務

除環境及社會風險外，業務模式創新亦可能帶來及放大諸如合規風險等其他風險。因此，本集團從客戶風險、行業風險、資產運營風險及業務風險等多個維度，聯合風險評估部門、商務部門及資產管理部門設立風險評估系統。例如，本集團於貿易及金融業務板塊設立項目考察及跟蹤機制，隨時掌握承租人的經營狀況，避免虛假交易及惡性違約。

為優化供應鏈管理，本集團根據合約期限、生產規模及產品類別將供應商分為不同組別，以便更有效地進行管理，並在出現任何風險或事故時及時應對。

B.6. 產品責任

本集團的產品及服務理念為提供符合規格的優質產品、與客戶維持良好關係以及時刻追求互惠互利。
