Electricity Sold for the First Half of 2018

China Power International Development Limited (the “Company”) announces that based on the Company’s preliminary statistics, the combined total electricity sold of the Company and its subsidiaries (collectively, the “Group”) for the six months ended 30 June 2018 amounted to 33,095,069MWh, representing an increase of 11.66% compared to the same period last year.

The electricity sold in the first half of 2018 increased over the corresponding period last year mainly due to (1) the higher electricity demand in the provinces where the Group’s coal-fired power plants are located, (2) some individual coal-fired power plants obtained more electricity sale from market-biddings, and (3) the Group’s new hydropower, wind power and photovoltaic power clean energy plants and stations continued to contribute to the overall increase in the total electricity sold during the period.

The total electricity sold of the Group’s various types of power plants for the six months ended 30 June 2018 are as follows:

Wholly-owned or controlled power plant	Total Electricity Sold (MWh)					
	First Half of 2018	First Half of 2017	Changes	Second Quarter of 2018	Second Quarter of 2017	Changes

Notes:

- (1) "Sichuan Hongye", a hydropower plant its record was previously grouped under another hydropower plant named "Lixian Hua Cheng". Their power generation had been reporting separately since October 2017, and their comparative figures for the first half of 2017 and the second quarter of 2017 were restated.
- (2) Power projects that were acquired through acquisition of Guangxi Company and Shandong Company (please refer to the announcement of the Company dated 31 May 2018) in May 2018:

Power Plant	Type of Power Plant	Installed Capacity (MW)	Affiliated Company
Changzhou	Hydropower	630	Guangxi Company
