

FOR IMMEDIATE RELEASE

6 April 2006

**Gross Generation and Net Generation of China Power
Increased by approximately 73.2% and 71.2%
in the First Quarter of 2006 compared with the same period of 2005**

China Power International Development Limited (the “Company”, Stock Code: 2380) today announced its gross generation and net generation for the first quarter of 2006.

According to its preliminary statistics, the consolidated gross generation of the power plants of the Company (excluding the power plant of its associated company) for the first quarter of 2006 amounted to 6,071,831MWh, representing an increase of approximately 73.2% compared to the same period of last year. Consolidated net generation was 5,613,367MWh, representing an increase of approximately 71.2% compared to the same period of last year.

The increase in the gross generation of the Company for the first quarter of 2006 was mainly attributable to (1) the acquisition of Shentou I Power Plant and technical upgrades of No. 2 generation unit of Pingwei Power Plant and No.2 generation unit of Changshu Power Plant, resulting to an increase in total installed capacity of the Company by 1,260MW; (2) the strong demand for electricity in regions where the power plants of the Company are located in the first quarter of 2006; (3) the strengthened management of the production has improved the operation conditions of the power generation units.

The respective gross generation of the power plants of the Company and its associated company for the first quarter of 2006 was as follows:
