

FOR IMMEDIATE RELEASE

10 October 2006

**Gross Generation and Net Generation of China Power
Increased by 32.02% and 31.28% in the first three quarters of 2006
compared with the corresponding period of 2005**

China Power International Development Limited (the “Company”, Stock Code: 2380) today announced its gross generation and net generation for the first three quarters ended 30 September 2006.

According to its preliminary consolidated statistics of the power plants of the Company (excluding the power plant of its associated company), the consolidated gross generation for the first three quarters ended 30 September 2006 amounted to 18,362,141MWh, representing an increase of 32.02% compared with the same period of last year, while the consolidated net generation was 16,969,317MWh, representing an increase of 31.28% compared with the same period of last year.

The increase in the gross generation of the Company for the first three quarters of 2006 was mainly attributable to (1) the acquisition of Shentou I Power Plant which took place last year and technical upgrades in the first quarter of 2005; (2) the strong demand for electricity in regions where the power plants of the Company are located; (3) the strengthened management of the production and improved operating conditions of the power generation units.

The respective gross generation of the power plants of the Company and its associated company for the first three quarters ended 30 September 2006 and for the third quarter of 2006 were as follows:
