China Power Announced its Total Gross Generation and Total Net Generation for the First 3 Quarters of 2012

China Power International Development Limited (the “Company”, Stock Code: 2380) today announced its gross generation and total net generation for the first 3 quarters of the year ended 30 September 2012.

According to its preliminary statistics, the consolidated total gross generation of the Company (excluding the power plants of its associated companies) amounted to 39,877,712 MWh for the first 3 quarters of the year ended 30 September 2012, representing a year-on-year increase of 1.94% while its consolidated total net generation totalled to 37,821,106 MWh, representing a year-on-year increase of 2.24%.

The increase in the power generation of hydro power plants was attributable to sufficient rainfall while the decrease in the power generation of coal-fired power plants was mainly caused by a weaker power demand during the period.

The respective total gross generation and total net generation figures of the power plants of the Company for the first 3 quarters of the year ended 30 September 2012 are as follows:
