

Dabieshan Power Company Wins Another National Energy Efficiency Benchmarking Award

China Electricity Council announced the energy efficiency benchmarking result of coal-fired units for 2018 in mid-May. The No.2 unit of Dabieshan Power Company, which operates under China Power, won the Outstanding Award of 600MW Supercritical Pure Condensed Wet Cooling Unit AAA Grade. The company has received this award for 10 years running since 2010.

Over the years, Dabieshan Power Company has been dedicated to benchmarking management and daily management of production and operation and equipment maintenance, exercising comprehensive supervision and control over energy consumption indicators for production and operation processes, technology transformation, equipment maintenance and operation adjustment to enable units to stay in a good condition at all times.
