

Pu'an Power Generation Successfully Passes the CNAS On-Site Evaluation and Received the Letter of Approval

On 20 November, Pu'an Power received the letter of approval from China National Accreditation Service for Conformity Assessment (CNAS).

Since the coal inspection center of the company obtained CNAS certification on 30, August 2019, the company has improved the laboratory construction in strict accordance with the requirements of the *Accreditation Criteria for the Competence of Testing and Calibration Laboratories*, and actively completed the rectification of non-conformance items.

From 17 to 19 August, China National Accreditation Service for Conformity Assessment (CNAS) experts conducted on-site re-evaluation of the company's coal inspection center.

Pu'an Power has successfully obtained CNAS certification, indicating that its coal inspection center has reached the management level and detection capability accredited by the nation. It not only provides accurate detection capability for the company's fuel, reflects the professionalism, impartiality and authority of the in and out of plant coal acceptance, but also shows the overall image of Pu'an Power's fuel acceptance team to the society.
