

Shentou Power Generation Company and Taiyuan North Central High-tech Industrial Development Zone Sign Strategic Cooperation Agreement

On July 1, 2021, the delegation of Shentou Power Generation Company met with Mr. Du Xiaoling, Director of Management Committee of Taiyuan North Central High-tech Industrial Development Zone. The parties reached a consensus on in-depth technical exchanges and cooperation in the fields of integrated energy services, multi-energy complementarity, electric energy storage, hydrogen energy and smart microgrid, and signed a framework agreement on strategic cooperation.

Mr. Zhang Jin, GM of Shentou Power Generation Company, briefly introduced the implementation of China's "3060" carbon targets and CPID's annual development tasks and expressed his gratitude for the support and assistance given by the Management Committee of Taiyuan North Central High-tech Industrial Development Zone. He also expressed that Shentou Power Generation Company would take Taiyuan North Central High-tech Industrial Development Zone as a key development area, give full play to its industrial technology and capital advantages, focus on the user side, build a smart energy system with multi-energy complementation of "source, grid, load, storage, and charging", provide green power for the smart park, help the park achieve its carbon targets as soon as possible, create an intelligent manufacturing industry base, and boost the "civilized, rich, open and beautiful" construction of Taiyuan.

Mr. Du Xiaoling welcomed Mr. Zhang Jin and his delegation, introduced the development of Taiyuan North Central High-tech Industrial Development Zone and the characteristics and advantages of "one zone and two parks", and expressed his recognition towards the development idea of Shentou Power Generation Company. Mr. Du said that Taiyuan North Central High-tech Industrial Development Zone would treat Shentou Power Generation Company as a long-term, stable and important strategic partner and give maximum support and assistance in industrial planning, supporting policies, resource allocation and coordination.
