

## **Qiuping Wind Farm Wins Title of "CSG 2022 Advanced Collective in Power Generation"**

Recently, Qiuping Wind Farm of Xing'an Wind Power Company of SPIC Guangxi was awarded the title of "CSG 2022 Advanced Collective in Power Generation".

The wind farm is located in Xing'an Town, Xing'an County, Guangxi. With a total installed capacity of 596.5 MW and 365 wind turbines, it is the most concentrated wind power project developed and built by SPIC Guangxi in Guangxi and also the largest cluster of wind power projects in South China. In the face of the severe shortage of power supply in 2022, Xing'an Wind Power Company rose to the challenge by executing the dispatching orders, and played an important role in the safe and stable operation of the power grid and the orderly supply of electricity, with outstanding performance in wind power forecast management and production and operation management.

In the future, SPIC Guangxi will continue to strengthen the management of the defect elimination rate and the time required for defect elimination of wind turbines, and spare no effort to improve the quality and efficiency of production, so as to support the strategy of transition, innovation and high-quality development.
