

CPID Signs Strategic Cooperation Agreement with GETO

Recently, Mr. Zhao Yonggang, Vice President of CPID, met with Mr. Gao Yuan, Chairman of GETO New Material Corporation Limited, and his delegation at the headquarters of CPID, and a strategic cooperation agreement was signed.

Mr. Zhao welcomed Mr. Gao and his delegation, and introduced CPID's development profile and strategic layout, focusing on the achievements of CPID in emerging green energy industries such as battery swap for heavy-duty trucks, color PV power and integrated smart energy. Mr. Zhao said that CPID is willing to play the advantages of capital, technology, brand, management, etc., and carry out all-round strategic cooperation with GETO around clean energy project development, color PV power, modern construction and other fields.

Mr. Gao introduced GETO's development performance in green new aluminum mold, protective platform, assembly PC components, etc. Mr. Gao expressed his willingness to deepen and expand cooperation in clean energy market development, energy infrastructure construction, building renewable energy applications, etc., and jointly promote green and low-carbon high-quality development.

At the signing ceremony, Mr. Zhao and Mr. Gao signed the agreement on behalf of their respective sides.
