

## **Mr. He Xi Meets Mr. Wang Zhenqing, Deputy Secretary of the Party Committee of CINIS**

On August 15, 2023, Mr. He Xi, Chief Engineer (New Energy) of SPIC and Chairman of CPID, met with Mr. Wang Zhenqing, Deputy Secretary of the Party Committee of China Institute of Nuclear Industry Strategy (CINIS), and his delegation at the CPID headquarters, and both sides had a discussion and exchange of views on the new energy development. Mr. Wang Dongrong, Vice President of CPID, attended the meeting.

Mr. He welcomed Mr. Wang Zhenqing and his delegation briefly introduced the development history and strategic plan of CPID, focusing on CPID's active fulfillment of the national requirement for "building a new power system with new energy as the mainstay", and highlighted the achievements made by CPID in recent years in new industries such as integrated smart energy, new-type energy storage, color PV power, green power transportation, rural revitalization, and PEDF. Mr. He said that CINIS is a think tank serving the entire nuclear energy industry and has rich experience in strategic research, intellectual property rights and standard system construction, and hoped that both sides would further strengthen communication and seek opportunities for cooperation, and work together to help the enterprise's high-quality development.

Mr. Wang Zhenqing expressed his admiration for the achievements made by CPID in green and low-carbon transition and development, said that as a subsidiary of China National Nuclear Corporation (CNNC), CINIS attaches great importance to the development of new energy industry under China's carbon peaking and carbon neutrality goals, and as a leading renewable energy company, CPID has rich resources and technological advantages in new energy and new power system, and hoped that both sides would strengthen communication, jointly explore cooperation in new energy business, and strive for breakthroughs in the new energy field and realize joint development.

The meeting was attended by the relevant persons from CINIS and Xinhua Hydropower Company Limited, and the heads of the Strategic Planning Department, Development Department, Science and Innovation Center, New Energy Department, Marketing and Fuel Management Center of CPID.
