

ColorFuLead Power's Two Full-Color PV Modules Certified by TÜV Rheinland

On June 14, 2024, ColorFuLead Power (Beijing) Technology Co., Ltd. (ColorFuLead Power) received certification from TÜV Rheinland for its single-glazed and double-glazed full-color PV modules at the 17th (2024) International Photovoltaic Power Generation and Smart Energy Conference & Exhibition. The certification marks their compliance with IEC 61215 and IEC 61730 standards and endorses the product quality, safety, and reliability by an internationally recognized certification body. These two products are the first in the industry to receive TÜV's authoritative certification, providing strong support for expanding the domestic market and entering the international market. TÜV is known as "Technischer Überwachungsverein" in German, that is, Technical Inspection Association. TÜV Rheinland is a leading international technical service provider. The TV certificates offered by TÜV Rheinland are widely recognized and trusted around the world as a sign of safety and quality.
