

## **SPIC Fujian Electric Power Completes Record 200,000 Green Certificates Transaction**

On September 23, 2024, SPIC Fujian Electric Power Co., Ltd. ("SPIC Fujian Electric Power") completed its largest green certificate transaction to date, selling 200,000 certificates through the Guangzhou Power Exchange Center. The transaction price exceeded current market rates, marking a significant milestone.

This year, SPIC Fujian Electric Power has closely followed policy changes regarding the application and trading rules for national green certificates, urging its affiliated units to complete tasks such as registration, green certificate applications, and trading. A dedicated team has been closely monitoring green energy and green certificate market trends across regions, identifying demand and actively facilitating transactions. Following its first green energy transaction for residential solar in Guangdong, SPIC Fujian Electric Power has once again created a new green market value.

Looking ahead, SPIC Fujian Electric Power will continue to study green energy policies in depth, seek market opportunities, and ensure that all eligible green certificates are applied for and sold, contributing green power to the high-quality development of enterprises.
