

China Power Holds 2024 Technical Skills Competition Summary and Recognition Conference

In early November 2024, China Power held the 2024 Technical Skills Competition Summary and Recognition Conference at Jiangsu Changshu Power Generation Company Ltd. Mr. He Xi, Chairman of China Power, attended and delivered a speech. Mr. He fully acknowledged the company's recent efforts in technical skills training and competitions. He emphasized that accelerating the development of a highly skilled workforce is a practical approach to achieving shared progress for both the company and its employees.

Mr. He stressed that a world-class enterprise must be supported by a world-class industry, which in turn requires a first-rate talent pool. Moving forward, efforts in technical and skills training must focus on immediate needs while planning for long-term development. These efforts should align with China Power's new strategic goals, balancing talent cultivation with high-quality development. The company aims to strengthen its foundational work in skills development, using training and competitions as vital pathways for selecting and nurturing talent. By prioritizing specialized and effective training for emerging industries, China Power seeks to develop urgently needed high-skilled professionals, cultivate more master craftsmen, and enhance the role of leading experts. The goal is to foster an environment where talent flourishes, people can fully utilize their potential, and every talent finds its optimal role, ultimately creating a world-class workforce for China Power.
