## Prospects and Strategies

The Group's robust sales growth in 1HFY2019 is a testament to both improving consumer sentiment and the continued efforts in executing the strategic priorities. Nevertheless, such growth momentum is expected to be moderated in 2HFY2019, as the escalating comparison base, rising US-China trade tensions and foreign exchange fluctuations could cloud the performance. In light of the macro headwinds, however, the Chinese government has ramped up efforts in deploying a series of measures to stimulate domestic consumption and counteract slowing economy. As such, the Group is cautiously optimistic about the prospect of the jewellery market in Greater China for the foreseeable future.

Chow Tai Fook Jewellery Group Chairman Dr. Henry Cheng remarked, "Growing in a time of change, the Group has always poised to inject vitality in people, products and operations through our persistent investment in innovation and technology that allows us to formulate and execute a winning customer experience strategy. At all events, we remain optimistic about the mid-to-long-term prospects of the jewellery market, on the back of the continuing changes undergoing in Mainland China."

In this context, the Group remains vigilant and strives for excellence in customer experience via the faithful execution of its "Smart+ 2020" strategic framework, with focuses on 1) the rollout of multi-brand strategy and innovative retail experience; 2) the conversion to an agile Customer-to-Manufactory ("C2M") business model to enable customer engagement along the supply chain; 3) the investment in data analytics to drive insights and values along business operations; and 4) the incubation of innovative and entrepreneurial culture across the Group and the jewellery industry.
