(I) MEMORANDUM OF UNDERSTANDING ON POSSIBLE FORMATION OF A JOINT VENTURE

The Board is pleased to announce, on a voluntary basis in order to provide the Shareholders and potential investors updates to the development of its business that, on 4 November 2024 (after trading hours), the Company entered into the MOU with the Strategic Partner for the possible formation of a joint venture in respect of the strategic business cooperation in the field of hydrogen injection cleaning system for motor vehicle's engine.

The MOU

The principal terms of the MOU are as follows:

Date: 4 November 2024

Parties: The Company and the Strategic Partner (the “**Parties**”)

To the best of the knowledge, information and belief of the Directors, having made all reasonable enquiries, the Strategic Partner and its ultimate beneficial owner are third parties independent of the Company and its connected persons (as defined under the Listing Rules).

Strategic Business Cooperation

Pursuant to the MOU, the Company and the Strategic Partner intend to form a joint venture (the “**JV Company**”) with each of them holding 51% and 49% equity interest in the JV Company respectively. Through the formation of the JV Company, the Parties intend to collaborate on the research and development, production and sales of the hydrogen injection cleaning system for motor vehicle's engine. This cooperation aims to address air pollution control for motor vehicles and non-road mobile sources in the PRC, achieving energy-saving, emission reduction, cost reduction, efficiency improvement and contributing to the dual carbon goals of the PRC (the “**Strategic Cooperation**”).

Definitive Agreement

Within one month from the date of the MOU, the Parties will use their best efforts to initiate the preliminary works for the Strategic Cooperation and the formation of the JV Company in order to confirm further details and the terms. The Parties (or their respective designated affiliates) target to enter into the formal agreement (the “**Definitive Agreement**”) by 4 December 2024 (the “**Expiration Date**”).

Termination

Save for the provisions in relation to confidentiality, costs, governing law and jurisdiction and non-binding effects, if the Parties (or their respective designated affiliates) fail to enter into the Definitive Agreement by the Expiration Date, unless otherwise agreed in writing by the Parties, the MOU shall automatically terminate on the day after the Expiration Date. The MOU may also be terminated upon execution of written agreement by the Parties.

Non-binding Effects

Save for the provisions in relation to definitive agreement, termination, confidentiality, costs, governing law and jurisdiction, the MOU is not legally binding on the Parties.

Information about the Strategic Partner

The Strategic Partner is a company incorporated in Hong Kong with limited liability and is wholly owned by Mr. Fong Sze Chun (“**Mr. Fong**”). Mr. Fong is a shareholder of Flex Fuel Energy Development SAS (“**FFED**”) and he is the founder of Flex Fuel Hydrogen Development Limited which was incorporated in Hong Kong. Flex Fuel Hydrogen Development Limited holds the exclusive right from FFED to distribute, manufacture and provide hydrogen engine cleaning service in Greater China including Hong Kong, Macau and Taiwan.

FFED, incorporated in France, developed the hydrogen cleaning technology under the brand of Flex Fuel to provide engine cleaning services by hydrogen injection. With increased legislation limiting carbon emission, carbon trapping devices such as catalytic converters, particle filters and exhaust gas recirculation valve are required to be installed into machines and engines. While reducing carbon and pollutants emissions, the above-mentioned carbon trapping devices are prone to clogging which would deteriorate their effectiveness. The hydrogen cleaning technology of FFED utilises an engine carbon cleaning process by hydrogen injection into the engine and improving a natural phenomenon of enriching the air-fuel mixture in the combustion engine which is considered to be efficient, non-aggressive and it does not introduce any chemical or corrosive products into the engine. Such technology can be used for carbon clog cleaning in engine and the restoration of engine performance. In 2021, FFED was selected by the French government as one of the French Tech 120 Index companies and is considered one of the most promising hydrogen companies in the market.

Reasons for and Benefits of the Entering into of the MOU

The Group is principally engaged in (a) manufacturing and distribution of leather products; (b) retail of fashion apparel, footwear and leather accessories; and (c) the industrial hemp planting and production of hemp fabric products.

The Strategic Partner is incorporated in Hong Kong and is principally engaged in investment holding. The Company has recently been engaging in discussions with the Strategic Partner to explore the possibility of the formation the JV Company with an aim to commence the business of hydrogen injection cleaning system for motor vehicle's engine in the PRC. With the collaboration of the resources and technology of FFED and the business connection of the Strategic Partner with FFED, the Company considers that the possible formation of the JV Company offers valuable opportunities for the Group to expand into the field of carbon neutrality and carbon reduction technology. The Board is of the view that the formation of the JV Company, if materialised, will expand the Group's revenue stream and maximise the return to the Company and its shareholders in the long run.

The Company wishes to emphasise that as at the date of this announcement, the Company has not entered into any formal or legally binding agreement regarding the formation of the JV Company. As the Company may or may not enter into the Definitive Agreement, the Company's shareholders and potential investors are advised to exercise caution when dealing in the securities of the Company. Further announcement(s) in relation to any update of the formation of the JV Company will be made by the Company as and when appropriate in accordance with the Listing Rules.

The Placing Price of the Placing was determined with reference to the prevailing market prices of the Shares and was negotiated on an arm's length basis between the Company and the Placing Agent. The Directors consider that the terms of the Placing are on normal commercial terms and are fair and reasonable based on the current market conditions. Hence, the Placing is in the interests of the Company and the Shareholders as a whole.

Subject to completion of the Placing, it is expected that the maximum gross proceeds and net proceeds (after deducting the placing commission, professional fees and all related expenses which were borne by the Company) from the Placing will be approximately HK\$40.8 million and HK\$39.6 million respectively. On such basis, the net issue price will be approximately HK\$0.99 per Placing Share.

Placing Period

The placing period under the Placing Agreement shall commence upon the execution of the Placing Agreement and shall expire at 5:00 p.m. on 13 November 2024, or on such later date as the Company and the Placing Agent may agree in writing.
