As the YoY decreased in the government subsidies for the pandemic, share of profit of Yantian Terminals Related Companies amounted to US\$31,356,000 (1H2021: US\$33,937,000), decreased by 7.6% YoY. With the disposal of Tianjin Euroasia Terminal and the acquisition of additional equity interests in Tianjin Container Terminal to make it a subsidiary in 2021, the Group no longer shared their profits as joint ventures and associates of the Group in the first half of 2022 (1H2021: totalled US\$3,777,000). Furthermore, due to the reemergence of the pandemic, throughput of Shanghai Mingdong Terminal and Shanghai Pudong Terminal decreased by 30.7% and 1.6% YoY, and profit for the period amounted to US\$2,530,000 and US\$7,994,000 (1H2021: US\$5,780,000 and US\$9,158,000), decreased by 56.2% and 12.7% YoY, while throughput of Yingkou Container Terminal and Yingkou New Century Terminal decreased by 30.0% and 29.1%, and profit for the period amounted to US\$1,638,000 and US\$1,375,000 (1H2021: US\$3,016,000 and US\$2,000,000), decreased by 45.7% and 31.3% YoY.

TAXATION

Taxation for the period amounted to US\$30,654,000 (1H2021: US\$32,236,000), decreased by 4.9% YoY. The decrease was mainly attributable to the reversal of tax on the completed projects in prior years of US\$5,981,000, which led to the decrease in the tax expenses. On the other hand, the decrease was partially offset by the increase in income tax and the withholding income tax as a result of the YoY increase in profit from terminals in which the Group has controlling stakes.

The functional currency of the Group's terminals business is mainly either Euro or Renminbi, the same currency of its borrowings, revenues and expenses, so as to provide a natural hedge against the foreign exchange volatility.

Interest rate swap contracts with financial institutions are used to achieve the optimum ratio between fixed and floating rates and to manage the related interest rate exposure. As at 30 June 2022, 29.9% (31 December 2021: 29.2%) of the Group's borrowings were at fixed rates. In light of market conditions, the Group will continue to monitor and regulate its fixed and floating-rate debt portfolio, with a view to minimising its potential interest rate exposure.

2 Basis of preparation and significant accounting policies (Continued)**ADOPTION OF NEW HKFRSs (CONTINUED)****Annual Improvements 2018-2020 Cycle**

HKAS 41 Amendment	Taxation in Fair Value Measurements
HKFRS 1 Amendment	Subsidiary as a First-time Adopter
HKFRS 9 Amendment	Fees in the '10 per cent' Test for Derecognition of Financial Liabilities
HKFRS 16 Amendment	Lease Incentives

The adoption of the above new HKFRSs in the current period did not have any significant effect on the Unaudited Condensed Consolidated Interim Financial Information or result in any substantial changes in the Group's significant accounting policies.

The HKICPA has issued certain new standard, interpretation and amendments to existing standards which are not yet effective for the year ending 31 December 2022 and have not been early adopted by the Group. The Group will apply these new standard, interpretation and amendments to existing standards as and when they become effective. The Group has already commenced an assessment of the related impact to the Group, certain of which may give rise to change in presentation, disclosure and measurements of certain items in the consolidated financial statements.

3 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below.

(a) IMPAIRMENT OF TERMINAL ASSETS, INVESTMENTS IN JOINT VENTURES AND ASSOCIATES

Management determines whether terminal assets, investments in joint ventures and associates have suffered any impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, according to their recoverable amounts determined by the cash-generating units based on value-in-use or fair value less costs of disposal calculations. The determination of impairment indication requires significant judgement and the calculations require the use of estimates which are subject to change of economic environment in future.

(b) ASSESSMENT OF GOODWILL IMPAIRMENT

The Group tests annually whether goodwill have suffered any impairment and when there is indication that they may be impaired, in accordance with the accounting policy. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations which require the use of assumptions. These calculations require the use of estimates.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION

3 Critical accounting estimates and judgements (Continued)

(c) TAXATION

Deferred tax liabilities have not been established for the withholding taxation that would be payable on the undistributed profits of certain subsidiaries which were under certain jurisdictions as the directors consider that the timing of the reversal of related temporary differences can be controlled (note 14).

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profits will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

The Group is subject to taxes in numerous jurisdictions. Significant judgement is required in determining the worldwide provision for taxation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises or writes back liabilities for anticipated tax issues based on estimates of whether additional taxes will be due or reversal to be made. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the taxation and deferred taxation provisions in the period in which such determination is made.

(d) FAIR VALUE OF FINANCIAL ASSETS AT FVOCI

If information on current or recent prices of financial assets at FVOCI is not available, the fair values of financial assets at FVOCI are determined using valuation techniques (market multiples derived from a set of comparable companies). The Group uses assumptions that are mainly based on market conditions existing at each balance sheet date.

4 Financial risk management

4.1 FINANCIAL RISK FACTORS

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, price risk and cash flow and fair value interest rate risk), credit risk and liquidity risk.

The Unaudited Condensed Consolidated Interim Financial Information does not include all financial risk management information and disclosures required in the annual financial statements, and should be read in conjunction with the 2021 Annual Financial Statements of the Group.

Compared to 31 December 2021, there was no material change in the contractual undiscounted cash out flows for financial liabilities.

There have been no material changes in the risk management policies of the Group since year end.

4.2 FAIR VALUE ESTIMATION

(a) Fair value hierarchy

The Group's financial instruments that are measured at fair value are disclosed by levels of the following fair value measurement hierarchy:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

4 Financial risk management (Continued)**4.2 FAIR VALUE ESTIMATION (CONTINUED)****(a) Fair value hierarchy (Continued)**

The following table presents the Group's financial instruments that are measured at fair value at 30 June 2022 and 31 December 2021:

	Level 1 US\$'000	Level 2 US\$'000	Level 3 US\$'000	Total US\$'000

(b) Valuation techniques used to determine fair value

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regular occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1. Instruments included in level 1 comprise primarily listed convertible bonds classified as financial asset at FVPL or listed equity investments classified as financial assets at FVOCI.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION

4 Financial risk management (Continued)**4.2 FAIR VALUE ESTIMATION (CONTINUED)****(b) Valuation techniques used to determine fair value (Continued)**

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

For interest rate swap, the present value of the estimated future cash flows based on observable yield curves is used to value financial instruments. The resulting fair value estimates are included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

There were no changes made to the valuation techniques applied as of 31 December 2021.

For the six months ended 30 June 2022, there were no significant changes in the business or economic circumstances that affect the fair value of the Group's financial assets and financial liabilities.

As at 30 June 2022, the fair value of unlisted financial assets at FVOCI is determined by the valuation performed by management using valuation techniques (market multiples derived from a set of comparable companies). A discount rate of 20% is applied to compute the fair value on top of market price/book multiples. These financial assets at FVOCI are included in level 3.

The price/book multiples are estimated by making reference to the historical net asset value of companies with similar business nature and having their operating activities in the PRC. The higher the price/book multiples, the higher the fair value. Whereas the discount rate is a common illiquidity rate applied in valuation of unlisted security. The higher the discount rate, the lower the fair value.

The movements in financial instruments included in level 3 are as follows:

Unlisted financial assets at FVOCI

	2022
	US\$'000
At 1 January	25,956
Translation differences	(1,320)
At 30 June	24,636

(c) Transfer between levels 1 and 3

The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer. There were no transfers between levels 1, 2 and 3 for recurring fair value measurements for the six months ended 30 June 2022.

(d) Fair value of financial assets and liabilities measured at amortised cost

The carrying amounts of financial assets and liabilities measured at amortised cost are assumed to approximate their fair values.

5 Segment information**5.1 OPERATING SEGMENTS**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is responsible for allocating resources and assessing performance of the operating segments. The operating segments were determined based on the reports reviewed by management. Terminals and related businesses were identified as the operating segments in accordance with the Group's business.

The performance of the operating segments was assessed based on their segment profit/loss attributable to equity holders of the Company and segment assets, which is measured in a manner consistent with that in the Unaudited Condensed Consolidated Interim Financial Information.

The segment of "Others" primarily includes corporate level activities. Assets under the segment of "Others" comprise property, plant and equipment, right-of-use assets, investment properties, intangible assets, inter-segment loans, other receivables and prepayments and cash and cash equivalents.

Additions to non-current assets comprise additions to property, plant and equipment, intangible assets and right-of-use assets.

Scope of Review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the Interim Financial Information of the Group is not prepared, in all material respects, in accordance with Hong Kong Accounting Standard 34 “Interim Financial Reporting”.
