Management Discussion and Analysis

(1) INTERIM RESULTS

For the half year ended 30 September 2014 (the "Period"), the Group recorded a turnover of approximately HK\$623,357,000, representing a 41% increase compared with approximately HK\$440,840,000 of the same period in 2013. During the Period, the Group recorded a gross loss of approximately HK\$11,298,000 (six months ended 30 September 2013: gross profit approximately HK\$18,312,000). The Group's turnover grew in Hong Kong, Macau and Singapore markets. The increase in turnover of the Group was mainly contributed by (i) the building construction segment and the property maintenance segment and (ii) a newly established commodities trading business segment. During the reporting period, construction projects in Singapore and Hong Kong have been operated in full swing resulting in increased revenue.

During the Period, the Group has recorded a gross loss of approximately HK\$11,298,000 as compared with gross profit of HK\$18,312,000 of the six months ended 30 September 2013. The change from gross profit of last reporting period to gross loss in the Period was attributable to (i) significant increase in construction costs including materials, staff and labour cost in building construction projects in Singapore during the Period as compared to the corresponding period in 2013; (ii) the progress of several newly-awarded sizable projects in alteration, renovation, upgrading and fitting-out works (collectively "A&A works") and a construction project in Hong Kong were still at an early stage and such revenue was not reflected in the Period; and (iii) turnover of a government property maintenance term contract was in full swing and contributed gross profit to property maintenance segment during the six months ended 30 September 2013. However, substantial gross loss in this segment was incurred in the Period as the progress of two newly-awarded property maintenance contracts were still at an early stage with less contribution in revenue during the Period.

During the Period, the Group had won fifteen new contracts with total contract value amounting to approximately HK\$688 million of which six contracts with total contract value of approximately HK\$178 million were of the building construction segment and nine contracts with total contract value of approximately HK\$510 million were of A&A works segment. As at 30 September 2014, the Group has projects in progress with total contract sum of approximately HK\$3,309 million.

Soon after the end of the reporting period up to date of this interim report of the Group, the Group has entered into a new contract of total contract value of approximately HK\$11 million.

Other income for the Period was approximately HK\$4,484,000 representing a slight decrease as compared with the last interim period.

For the Period under review, loss attributable to owners of the Company was approximately HK\$54,123,000 as compared with the loss of approximately HK\$5,660,000 of the corresponding period in last year.

The basic loss per share for the Period were HK18.04 cents compared to basic loss per share HK1.89 cents of the last interim period.

(2) REVIEW OF OPERATIONS

(i) Building Construction and Other Construction Related Business

Revenue for the building construction segment for the Period was approximately HK\$261,712,000 (six months ended 30 September 2013: approximately HK\$164,873,000) and segment loss was approximately HK\$11,990,000 (six months ended 30 September 2013: segment profit approximately HK\$3,217,000). The result for the Group in this segment during the Period was a change from segment profit to segment loss resulting from significant increase in construction costs in this segment including materials, staff and labour cost in Singapore.

Management Discussion and Analysis (Continued)

(2) REVIEW OF OPERATIONS (Continued)

(ii) Property Maintenance

Revenue for the property maintenance segment for the Period was approximately HK\$120,287,000 (six months ended 30 September 2013: approximately HK\$106,857,000) and segment loss was approximately HK\$6,658,000 (six months ended 30 September 2013: segment profit approximately HK\$6,644,000).

The overall result for the Group in this segment changed from segment profit of last interim period to segment loss of the Period. Segment loss was incurred in the Period as the progress of two newly awarded property maintenance contracts were still at an early stage with relatively small contribution in revenue during the six months ended 30 September 2014.

(iii) Alterations, renovation, upgrading and fitting-out works

Revenue for the A&A works segment for the Period was approximately HK\$153,464,000 (six months ended 30 September 2013: approximately HK\$169,110,000) and segment profit was approximately HK\$8,576,000 (six months ended 30 September 2013: approximately HK\$9,684,000). The overall result for the Group in this segment was slight decrease in revenue and segment profit as compared with the last interim period.

The segment profit of the Period was lower than that of the last reporting period because progress of several newly-awarded sizable projects during the Period were still at an early stage and such contribution was not reflected in the Period.

(iv) Trading of commodities

Revenue for the trading of commodities segment for the Period was approximately HK\$87,894,000 (six months ended 30 September 2013: Nil) and segment profit was approximately HK\$127,000 (six months ended 30 September 2013: Nil). The Group has newly established the commodities trading business during the Period. Although the prices of commodities have been falling during the Period, our management which has extensive experience in commodities markets, has continuously adopted a prudent approach to minimise the risk of price fluctuations in association with the trading business.

(3) PROSPECTS

Building construction, property maintenance and alterations, renovation, upgrading and fitting-out works services

Benefited from the increase in supply of subsidized Hong Kong government housing and the continuous on-going infrastructure projects, the construction market in Hong Kong is expected to keep booming in the coming years. However, the aggravated problem of construction costs will still be the most challenging risk on our operation. To manage the risks and with the aim to pursue reasonable return, we would exercise more cautious when tendering new projects.

In Singapore, overall demand in construction industry is relatively stable. The Group remains optimistic towards the Singapore market in spite of continuous rise in the cost of construction and severe competition in the industry. The Group also plans to provide property maintenance services and alterations, renovation, upgrading and fitting-out works services in both public and private sectors which are anticipated to make additional contribution to the Group.

Management Discussion and Analysis (Continued)

(3) PROSPECTS (Continued)

After several years of double-digit growth in economy, Macau's construction market is expected to reach its peak in the coming 2015. As the growth rate of the gambling segment has been dropping, we expect the economy would weaken further. When the expansion works of a number of the mega casinos approach completion, the demand for interior fitting out and high-end decoration services would surge and the Group is well poised for more job opportunities in these segments.

Resources related business development

Looking forward, the Group remains committed to exploring new business opportunities beyond the solid competence it has created with its core businesses. Leveraging its cumulative knowledge and experience, the Group's management has begun deploying resources to seize potential growth opportunities in the resources sector. In order to build up the relevant business network and trading platform in the resources sector, the Group has established the commodities trading business during the Period. The Group's management strongly believes that it enables the Group to broaden its capability for future growth opportunities in the relevant field.

(4) FINANCIAL POSITION

The Group mainly relies upon funds generated internally together with borrowings to finance its operations and expansion.

As at 30 September 2014, the Group's total cash in hand was approximately HK\$123.0 million (as at 31 March 2014: approximately HK\$311.8 million).

The Group has certain portion of bank balances and cash denominated in currencies other than the functional currency of the entity to which they relate. In addition, the Group's sales and purchases are mainly transacted in Hong Kong dollar, United States dollar and Singapore dollar. Given that the exchange rates of such foreign currencies against Hong Kong dollar, our reporting currency, are relatively stable, the management believes that the foreign currency exchange risk is insignificant to the Group. As such, during the Period, the Group currently does not have any financial instruments for currency hedging purpose but will consider hedging significant foreign currency exposure should the need arise.

Total interest-bearing borrowings have increased from 31 March 2014 of approximately HK\$181 million to 30 September 2014 of approximately HK\$189.6 million. All borrowings were denominated in Singapore Dollars and Hong Kong Dollars. The total amounts of bank borrowings as at 30 September 2014 were repayable within one year based on the scheduled repayment dates set out in the loan agreements. The Group's net cash balance has decreased from 31 March 2014 of approximately HK\$308 million to 30 September 2014 of approximately HK\$109 million.

Management Discussion and Analysis (Continued)

(4) FINANCIAL POSITION (Continued)

The bank borrowings are secured by the Group's certain bank deposits and benefits under certain construction contracts. At the end of the reporting period, the Group had pledged the following assets to banks and an insurance company to secure the banking facilities and performance bonds granted to the Group:

	30 September 2014 HK\$'000	31 March 2014 HK\$'000
Property, plant and equipment	—	7,740
Other receivables	13,972	13,817
Bank deposits	32,246	44,661
	46,218	66,218

Interest on bank loans are charged at floating rates. The Group currently does not have an interest rate hedging policy and the Group monitors interest risks continuously and considers hedging any excessive risk when necessary. As at 30 September 2014, the Group has been granted total banking facilities of approximately HK\$134.4 million (as at 31 March 2014: approximately HK\$202 million). An amount of approximately HK\$79.9 million (as at 31 March 2014: approximately HK\$106.4 million) remained unutilized.

(5) CREDIT RISK

The Group's maximum exposure to credit risk in the event of the counterparties' failure to perform their obligations as at 30 September 2014 and 31 March 2014 in relation to each class of recognised financial assets is the carrying amounts of those assets as stated in the condensed consolidated statements of financial position. In minimising the credit risk, the management of the Group has delegated a team responsible for determination of monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade and other receivables regularly at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the Directors consider that the Group's credit risk is significantly reduced.

(6) LIQUIDITY AND FINANCIAL RESOURCES

As at 30 September 2014, the gearing ratio of the Group was approximately 29.8% (as at 31 March 2014: approximately 27.5%). The gearing ratio is calculated by dividing total interest-bearing borrowings with total assets as at the reporting date multiplied by 100%.

As at 30 September 2014, the current assets and current liabilities were stated at approximately HK\$584.4 million (as at 31 March 2014: approximately HK\$605.2 million) and approximately HK\$538.3 million (as at 31 March 2014: approximately HK\$333.3 million), respectively. The current ratio decreased from 1.82 times of 31 March 2014 to 1.09 times of 30 September 2014. The current ratio is calculated by dividing current assets with current liabilities as at the end of the respective period.

Management Discussion and Analysis (Continued)

(6) LIQUIDITY AND FINANCIAL RESOURCES (Continued)

The management and control of the Group's financial, capital management and external financing functions are monitored centrally by our Group's finance department in Hong Kong. The Group adheres to prudent principle financial management in order to control and minimize financial and operational risks. With available bank balances and cash and existing available bank credit facilities, the Group has sufficient liquidity and financial resources to satisfy its financial requirements.

(7) CONTINGENT LIABILITIES AND CAPITAL COMMITMENTS

At the end of the reporting period, approximately HK\$105,561,000 (as at 31 March 2014: approximately HK\$127,080,000) of performance bonds were given by banks or insurance companies in favour of some Group's customers. These performance bonds were issued as security for the due performance and observance of the Group's obligations under the construction contracts entered into between the Group and its customers. If the Group fails to provide satisfactory performance to its customers to whom performance bonds have been given, such customers may demand the banks or insurance companies to pay to them the sum or sums stipulated in such demand. The Group will then become liable to compensate such banks or insurance companies accordingly. The performance bonds will be released upon completion of the contract work for the relevant customers.

The Group did not have any significant capital commitment as at 30 September 2014 and 31 March 2014.

(8) AVAILABLE-FOR-SALE INVESTMENTS

As at 30 September 2014, the Group has available-for-sale investments of approximately HK\$7 million (as at 31 March 2014: approximately HK\$11.2 million), which comprised primarily investment in the listed shares of a listed company in Singapore, HLH Group Limited. As at 30 September 2014, the Group held 89,400,000 shares (as at 31 March 2014: held 89,400,000 shares). An impairment loss of HK\$2,943,000 is recorded in profit or loss in the Period as a result of the decline in the market value of the listed shares. The fair values of the above listed shares are determined based on the quoted bid prices available on the Singapore Exchange Limited.

Save as disclosed in the relevant announcements made by the Company, the Company has no plans for material investment or acquisition of material capital asset in the future.

Notes to the Condensed Consolidated Financial Statements

For the six months ended 30 September 2014

1. GENERAL

The Company is incorporated in the Cayman Islands as an exempted company with limited liability and its shares have been listed on The Stock Exchange of Hong Kong Limited with effect from 18 January 2012.

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard 34 Interim Financial Reporting issued by the Hong Kong Institutes of Certified Public Accountants ("HKICPA") as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values at the end of the reporting period.

Except as described below, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 September 2014 are the same as those followed in the preparation of the Group's annual financial statements for the year ended 31 March 2014.

Revenue recognition

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Property under development

Property under development is stated at the lower of cost and net realisable value. Net realisable value takes into account the price ultimately expected to be realised and the anticipated cost to completion.

In addition, the Group has applied, for the first time, a new Interpretation and certain amendments to Hong Kong Financial Reporting Statements ("HKFRSs") issued by the HKICPA that are mandatorily effective for the current interim period. The application of the new interpretation and amendments to the HKFRSs in the current interim period has had no material effect on the amounts reported in the condensed consolidated financial statements and/or disclosures set out in the condensed consolidated financial statements.
