Indemnities issued to banks and an insurance company for performance bonds in respect of contracts for management contracting services	1,254	1,401

Certain customers require the Group to procure performance bonds to be provided by a bank or an insurance company in favour of them as security for due performance and observance of the obligations under the contracts. In procuring such performance bonds, the Group is usually required to place a required amount of deposit to such bank or insurance company. If the Group fails to provide satisfactory services to the customers, the customers are entitled to seek compensation from the bank or insurance company for the amount of financial losses incurred not exceeding the amount of the performance bond. The Group will then become liable to compensate the bank or insurance company accordingly. During the six months ended 30 September 2020 and 2019, no customers called any performance bond. Typically, the estimated consideration is not constrained for revenue recognition.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Business Review and Outlook

The Group is a Hong Kong-based contractor specialised in design, procurement and installation services of water circulation systems, including swimming pools, water fountains and water curtains, etc. We provide services mainly to developers, main contractors and subcontractors in various private residential projects and hotel, casino, shopping and recreation complex projects in Hong Kong and Macau. Our services are mainly categorised as (i) management contracting services – design, procurement and installation of water circulation systems, (ii) consultancy services – provision of consultancy services on water circulation systems and (iii) maintenance services – provision of maintenance and repair services for water circulation systems.

During the Reporting Period, the Group's net loss increased from approximately HK\$3.6 million for the six months ended 30 September 2019 to approximately HK\$10.0 million for the six months ended 30 September 2020. As mentioned in the first quarterly results announcement of the Company dated 7 August 2020, the increase in net loss was mainly attributable to substantial drop of revenue recorded by the Group in respect of the Reporting Period during which Hong Kong continued to undergo a historic economic downturn spawned mainly by the persistent outbreak of coronavirus pandemic. Affected by the extremely weak business sentiment in both Hong Kong and Macau, the number of new construction or property development projects in the market had continuously decreased, which led to extreme competition in tendering for new projects for water circulation systems.

Looking forward, given the uncertainty of the duration of the coronavirus pandemic, it is expected that the pandemic may continue to affect the business environment in Hong Kong and Macau in the foreseeable future. The high labour cost and shortage of experienced labour caused by reduced labour mobility in light of the travel restrictions due to the coronavirus pandemic between Hong Kong, Macau and the mainland China are amongst the challenges which industry peers have faced. It is expected that the Group will continue to face such intense competition to secure projects amid the downturn of economy while we use our best efforts to manage the progress and costs of projects to enhance our competitiveness in sourcing projects. Although the Directors remain confident in the long term business outlook of Hong Kong and Macau and also the performance of the Group, the financial results of the Group in particular in the Financial Year 2020/2021 may potentially be affected as a result of the adversities.

Riding on our solid experience in design, procurement and installation services of water circulation system and our established business connections with various main contractors and property developers in the industry, the Group will continue to explore the opportunities to diversify or expand our businesses in Hong Kong, Macau and mainland China to maintain the continuous growth of the Group. The Directors will also keep close track of the economic environment and the development of the coronavirus pandemic and evaluate its business strategies from time to time to adapt the challenging market for the sustainable development of the Group and grasp any potential business opportunities to enhance the long-term potential growth in the future and generate the best returns to the shareholders.

## **Financial Review**

### ***Revenue***

Our total revenue decreased by approximately HK\$55.9 million or 76.4% from approximately HK\$73.1 million for the six months ended 30 September 2019 to approximately HK\$17.2 million for the six months ended 30 September 2020.

As previously disclosed, the magnitude in decrease in our total revenue in the fourth quarter for the Financial Year 2019/2020 became larger due to the economic downturn as impacted by the social unrest in Hong Kong in the second half of 2019 and the coronavirus pandemic. The continuous outbreak of the coronavirus pandemic further devastates the economy in both Hong Kong and Macau during the Reporting Period. Affected by the extremely weak business sentiment, the number of new construction or property development projects in our operating markets had decreased which led to extreme competition that the Group in tendering for new projects for water circulation systems. As a result, the amount of project works performed by the Group had decreased as compared to six months ended 30 September 2019, leading to a substantial drop in our revenue for the six months ended 30 September 2020.

Moreover, the decrease in revenue was also due to the completion of certain mega-size projects during the year ended 31 March 2020 and no new mega-size project has been awarded to the Group during the Reporting Period.

### ***Cost of services***

The Group's cost of services mainly consists of (i) consumables; (ii) sub-contracting fees; (iii) staff costs; (iv) consulting fees; (v) labour cost; and (vi) other expenses.

Our cost of services decreased by approximately HK\$51.0 million or 77.0% from approximately HK\$66.2 million for the six months ended 30 September 2019 to approximately HK\$15.2 million for the six months ended 30 September 2020. Such decrease was primarily driven by the decrease in cost of consumables of approximately HK\$8.2 million and the decrease in sub-contracting fees of approximately HK\$41.1 million, which were mainly due to the decrease in revenue as discussed above and as a result, less amount of parts and components were procured for the projects and less labour were required to execute the project work.

### ***Gross profit and gross profit margin***

Our gross profit decreased by approximately HK\$4.9 million or 71.5% from approximately HK\$6.9 million for the six months ended 30 September 2019 to approximately HK\$2.0 million for the six months ended 30 September 2020. Such decrease was primarily attributable to the decrease in revenue.

Our gross profit margin increased from approximately 9.4% for the six months ended 30 September 2019 to approximately 11.4% for the six months ended 30 September 2020. The increase was mainly because for the six months ended 30 September 2019, certain works performed under variation orders carried a relatively lower gross profit margin, while for the six months ended 30 September 2020, there was no such variation orders.

### ***Other income***

Our other income increased from approximately HK\$0.2 million for the six months ended 30 September 2019 to approximately HK\$1.5 million for the six months ended 30 September 2020, primarily due to the subsidies received from the HKSAR Government under the Employment Support Scheme during the six months ended 30 September 2020.

### ***Administrative expenses***

Our administrative expenses increased by approximately HK\$2.9 million or 31.9% from approximately HK\$9.1 million for the six months ended 30 September 2019 to approximately HK\$12.0 million for the six months ended 30 September 2020, primarily due to the recognition of legal costs of approximately HK\$5.3 million incurred in connection with the arbitration award involving the project located at Kennedy Town as mentioned in the first quarterly results announcement of the Company dated 7 August 2020.

If the aforesaid one-off legal cost was excluded, the administrative expenses of the Group in respect of the Reporting Period decreased by approximately HK\$2.3 million or 25.9% from approximately HK\$9.1 million for the six months ended 30 September 2019 to approximately HK\$6.8 million for the six months ended 30 September 2020. It signified the efforts made by the Group in controlling the costs incurred in its ordinary business operation.

### ***Finance costs***

Our finance costs slightly decreased by approximately HK\$0.1 million or 7.0% from approximately HK\$1.5 million for the six months ended 30 September 2019 to approximately HK\$1.4 million for the six months ended 30 September 2020, primarily due to the decrease in the average level of bank borrowings during the Reporting Period.

### ***Income tax expenses***

For the six months ended 30 September 2020 and 2019, there was no assessable profits in Hong Kong and Macau and as a result, no income tax expense was provided.

### ***Net Loss***

As a result of the foregoing, our net loss increased from approximately HK\$3.6 million for the six months ended 30 September 2019 to approximately HK\$10.0 million for the six months ended 30 September 2020.

### ***Dividends***

No dividend was declared or proposed by the Board for the six months ended 30 September 2020 and 2019.

### ***Event after the Reporting Period***

The Group's borrowings and bank balances are mainly denominated in Hong Kong dollars and there was no significant exposure to foreign exchange rate fluctuations during the Reporting Period.

The Group's gearing ratio, which is calculated by total borrowings and bank overdrafts divided by total equity, increased from approximately 55.6% as at 31 March 2020 to approximately 84.5% as at 30 September 2020, primarily due to the increase in the level of bank borrowings and the decrease in the total equity. The increase in the level of bank borrowings was primarily due to the new bank loan raised during the Reporting Period. The decrease in the total equity was due to the net loss during the Reporting Period.

## **PRINCIPAL RISK AND UNCERTAINTIES**

Other than the potential impact of the coronavirus pandemic on the local and global economy and the operation and financial performance of the Group as mentioned under the paragraph headed "Management Discussion and Analysis – Business Review and Outlook" above, the management considers that the following are the principal risks and uncertainties faced by the Group:

The Group's business is project-based. The Group mainly derive revenue from projects which are nonrecurrent in nature. Fee collection and profit margin significantly depend on various factors of each project such as the terms of contracts, duration of project, variation orders, efficiency of implementation of contract work and the general market condition. In general, variation orders usually carry higher profit margin as compared with the works under original contracts. Therefore, revenue generated from the Group's business is irregular and is subject to the availability of projects, variation orders and other factors beyond the Group's control;

The number and size of the projects the Group can undertake depends on the Group's human and other resources. Due to the size of the Group, a mega-sized project will occupy a substantial part of the Group's resources and inevitably resulted in the Group not being able to deploy resources to other projects and as a result the Group have to rely on a single project or otherwise a small number of projects during the project period. Any decrease in the number of sizable projects in terms of revenue recognised may affect the Group's operations and financial results;

For the Group's management contracting business, the Group normally receive progress payments from the customers with reference to the percentage of completion of the contract works done by the Group during the relevant month in accordance with the rates and prices based on the agreed tender price. Any failure by the customers to make any payment on time or in full may have a material adverse effect on the Group's liquidity position. Any failure by the customers to eventually pay the amount to the Group's may have a material adverse effect on the Group's financial position and operating results; and

Most of the Group's contracts are awarded to the Group through tendering process. The Group have to determine the tender price and service fee of each project based on the information available to the Group at the time of submitting the tender. The tender price is determined by factors including the scope of works, the estimated duration of the project period, the total time cost and estimated cost involved. The Group determine the price of all the projects at fixed costs based on an agreed scope of works and the estimation of time cost and estimated cost involved. Error or inaccurate estimation of project duration and costs when determining the tender price or increase in construction costs may adversely affect the Group's profitability or result in substantial loss.

Mr. Nam Ho Kwan is currently the Chairman of the Board and the Chief Executive Officer, responsible for formulating the overall business development strategy and planning of the Group. In view of that, Mr. Nam has been responsible for the overall management of the Group since its inception, the Board believes that it is in the best interest of the Group to have Mr. Nam taking up both roles for effective management and business development.
