Notes :

1. Basis of preparation and accounting policies

These unaudited condensed consolidated interim accounts (“Condensed Interim Accounts”) have been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants.

These Condensed Interim Accounts should be read in conjunction with the 2004 annual accounts.

The accounting policies and methods of computation used in the preparation of these Condensed Interim Accounts are consistent with those used in the annual accounts for the year ended 31st December 2004 except that the Group has changed certain of its accounting policies following its adoption of new/revised Hong Kong Financial Reporting Standards and Hong Kong Accounting Standards (“new HKFRS”) which are effective for accounting periods commencing on or after 1st January 2005.

These Condensed Interim Accounts have been prepared in accordance with those HKFRS standards and interpretations issued and effective as at the time of preparing this information. The HKFRS standards and interpretations that will be applicable at 31st December 2005, including those that will be applicable on an optional basis, are not known with certainty at the time of preparing these Condensed Interim Accounts.

The changes to the Group’s accounting policies and the effect of adopting these new policies are set out in note 2 below.

2 Changes in accounting policies

(a) Effect of adopting new HKFRS

In 2005, the Group adopted the new/revised standards of HKFRS below, which are relevant to its operations. The 2004 comparatives have been amended as required, in accordance with the relevant requirements.

HKAS 1	Presentation of Financial Statements
HKAS 2	Inventories
HKAS 7	Cash Flow Statements
HKAS 8	Accounting Policies, Changes in Accounting Estimates and Errors
HKAS 10	Events after the Balance Sheet Date
HKAS 12	Income Taxes
HKAS 14	Segment Reporting
HKAS 16	Property, Plant and Equipment
HKAS 17	Leases
HKAS 18	Revenue
HKAS 19	Employee Benefits
HKAS 21	The Effects of Changes in Foreign Exchange Rates
HKAS 23	Borrowing Costs
HKAS 24	Related Party Disclosures
HKAS 27	Consolidated and Separate Financial Statements
HKAS 32	Financial Instruments: Disclosures and Presentation
HKAS 33	Earnings per Share
HKAS 36	Impairment of Assets
HKAS 39	Financial Instruments: Recognition and Measurement
HKFRS 2	Share-based Payments
HKFRS 3	Business Combinations

The adoption of new/revised HKASs 1, 2, 7, 8, 10, 12, 14, 16, 17, 18, 19, 21, 23, 24, 27, 33, 36 and HKFRS 3 did not result in substantial changes to the Group's accounting policies. In summary:

- HKASs 1, 2, 7, 8, 10, 12, 14, 16, 17, 18, 19, 21, 23, 27, 33, 36 and HKFRS 3 had no material effect on the Group's policies; and
- HKAS 24 has affected the identification of related parties and some other related-party disclosures.

The adoption of HKASs 32 and 39 has resulted in a change in the accounting policy relating to the classification of financial assets at fair value through profit or loss and available-for-sale financial assets. It has also resulted in the recognition of derivative financial instruments at fair value and the change in the recognition and measurement of hedging activities.

The adoption of HKFRS 2 has resulted in a change in the accounting policy for share-based payments. Until 31st December 2004, the provision of share options to employees did not result in an expense in the income statement. Effective on 1st January 2005, the Group expenses the cost of share options in the income statement. As a transitional provision, the cost of share options granted after 7th November 2002 and had not yet vested on 1st January 2005 was expensed retrospectively in the income statement of the respective periods.

All changes in the accounting policies have been made in accordance with the transition provisions in the respective standards. All standards adopted by the Group require retrospective application other than:

- HKAS 39 – does not permit to recognise, derecognise and measure financial assets and liabilities in accordance with this standard on a retrospective basis. The Group applied the previous SSAP 24 "Accounting for investments in securities" to investments in securities and also to hedge relationships for the 2004 comparative information. The adjustments required for the accounting differences between SSAP 24 and HKAS 39 are determined and recognised at 1st January 2005; and
- HKFRS 2 – only retrospective application for all equity instruments granted after 7th November 2002 and not vested at 1st January 2005.

(b) *New accounting policies*

The accounting policies used for the Condensed Interim Accounts for the six months ended 30th June 2005 are the same as those set out in note 1 to the 2004 annual accounts except for the following:

2.1 Share-based compensation

The Group operates an equity-settled, share-based compensation plan. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted, excluding the impact of any non-market vesting conditions (for example, profitability and sales growth targets). Non-market vesting conditions are included in assumptions about the number of options that are expected to become exercisable. At each balance sheet date, the entity revises its estimates of the number of options that are expected to become exercisable. It recognises the impact of the revision of original estimates, if any, in the income statement, and a corresponding adjustment to equity over the remaining vesting period.

The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

2.2 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability, including fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

The fair value of the liability portion of convertible preference shares is determined using a market interest rate for an equivalent non-convertible preference share. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or maturity of the convertible preference shares, where appropriate. The remainder of the proceeds is allocated to the conversion option. This is recognised and included in shareholders' equity, net of income tax effects.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

3. Segment reporting

The Group is organised into four main business segments:

- (a) Financial solutions, services and related products – provision of customised information system consultancy and integration services and sales of designed information technology products to financial institutions and banks;
- (b) Telecommunication solutions, services and related products – provision of customised information system consultancy and integration services and sales of designed information technology products to the telecommunication industries;
- (c) Information technology value-added services – provision of Interactive Voice Response (“IVR”) services; and
- (d) Electronic payment products and services – sales of electronic fund transfer point-of-sale (“EFT-POS”) terminals.

In determining the Group’s geographical segments, revenues and results are attributed to the segments based on the location of the customers.

- (a) Hong Kong profits tax has not been provided as the Group has no estimated assessable profit for the period (six months ended 30th June 2004: Nil).
- (b) The People's Republic of China (the "PRC") taxation has been provided on the profit of the Group's subsidiaries in the PRC and calculated at the applicable rates (six months ended 30th June 2004: Nil).

7. Earnings/(loss) per share

Basic

Basic earnings/(loss) per share is calculated by dividing the profit/(loss) attributable to equity holders of the Company by the number of ordinary shares in issue during the period.

	Unaudited	
	Six months ended	
	30th June	
	2005	2004
	<i>HK\$'000</i>	<i>HK\$'000</i>
Profit/(loss) attributable to equity holders of the Company	38,568	(28,185)
Number of ordinary shares in issue (thousands)	333,054	333,054
Basic earnings/(loss) per share (HK\$ per share)	0.12	(0.08)

Diluted

Diluted earnings per share for the six months ended 30th June 2005 is calculated by adjusting the number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Company has two categories of dilutive potential ordinary shares: convertible preference shares issued by a subsidiary and share options. The convertible preference shares issued by a subsidiary are assumed to have been converted into ordinary shares and the net profit is adjusted to eliminate the interest expense less the

tax effect. For the share options, a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Company's shares) based on the monetary value of the subscription rights attached to outstanding share options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options.

	Unaudited Six months ended 30th June 2005 <i>HK\$'000</i>
Profit attributable to equity holders of the Company	38,568
Interest expense on convertible preference shares issued by a subsidiary (net of tax)	85
	<hr/>
Profit used to determine diluted earnings per share	38,653
	<hr style="border-top: 1px dashed black;"/>
Number of ordinary shares in issue (thousands)	333,054
Adjustments for	
– assumed conversion of convertible preference shares issued by a subsidiary (thousands)	8,667
– share options (thousands)	587
	<hr/>
Number of ordinary shares for diluted earnings per share (thousands)	342,308
	<hr style="border-top: 1px dashed black;"/>
Diluted earnings per share (HK\$ per share)	0.11

Diluted loss per share for the six months ended 30th June 2004 has not been presented as the conversion of potential ordinary shares would have anti-dilutive effect to the basic loss per share.

8. Trade receivables

The Group's credit terms to trade receivables ranges from 0 to 180 days. An aged analysis of the Group's trade receivables is as follows:

MANAGEMENT DISCUSSION AND ANALYSIS

Financial and business review

The Group achieved remarkable results for the six months ended 30th June 2005. For the first half of 2005, the Group's turnover amounted to HK\$178.97 million, as compared to the turnover of HK\$66.65 million for the corresponding period last year. The management is pleased to report a significant turnaround, recording net profit attributable to shareholders of HK\$38.57 million, while the loss for the corresponding period of the previous year was HK\$28.19 million.

The turnaround was mainly due to the take off of the telecommunication value-added services and the improvement in the result of the financial solutions division.

Financial solutions, services and related products

During the period under review, this business segment recorded a turnover of HK\$49.10 million (2004 interim: HK\$20.56 million) and a profit of HK\$0.76 million (2004 interim: loss of HK\$18.50 million).

Consultancy and IT services accounted for 56% of the turnover of this business segment, as compared to the 50% in the corresponding period of the last year.

System integration and hardware products business accounted for 44% of the turnover of this business segment, as compared to the 50% in the corresponding period of the last year.

The implementation of the integrated banking systems for the ICBC (Asia) in Hong Kong and Bank of Communication in China were on schedule. New contracts were also executed for the ICBC (Asia) – Belgian Bank integration and certain projects for Bank of Communication, Hong Kong branch. The systems implementation were smooth and well received by our clients. During the period under review, services delivery were all on schedule and there was no such delay we experienced in last year. Following the retrenchment measures we carried out in the last quarter of year 2004, we recorded a saving of expenses of approximately HK\$7 million compared to that of last period. It is encouraging to see the benefits as a result of the measures we pursued over the last few months.

Electronic payment products and services

This business segment recorded a turnover of HK\$48.10 million (2004 interim: HK\$40.12 million) and a profit of HK\$5.70 million (2004 interim: HK\$3.97 million). The robust growth in demand of EFT-POS terminals, in particular the speeding up of launching of machines for China Union Pay, brought about a shipment growth of 38%. During the period under review, the shipment percentage contribution of Mainland China market was 83%. Due to the deferral in the implementation of Europay Mastercard Visa (“EMV”) standard migration of certain clients in Hong Kong and overseas, the contribution outside Mainland China only accounted for 17% of the total shipment.

The management commenced a comprehensive review of the financial, logistic and procurement controls, market strategy and product development. The review is an ongoing process, creating a plan to improve profitability and sustain our growth momentum. Thanks to our special task force team for their effort towards control in procurement and logistic process, the cost of sales was significantly reduced. As a result, despite of the price pressure, we managed to maintain a reasonable gross profit margin which is comparable with that of the same period last year.

Overall expenses increased due to our additional investment in research and development and sale and marketing efforts and these are expected to grow in the second half year. However, we believe that the investment will earn rewards soon in view of the drastic growth in the Mainland China market and the huge potential of the European and American markets.

Telecommunication solutions, services, information technology value-added services and related products

During the period under review, a turnover of HK\$81.67 million (2004 interim: HK\$5.87 million) and a profit of HK\$50.50 million (2004 interim: loss of HK\$7.08 million) were recorded.

During the period under review, there was a slight decrease of HK\$2.62 million in the turnover from traditional integrated applications services, while the turnover from IVR value-added business was significantly increased by HK\$78.42 million.

It is clear that the SMS content market is maturing while other wireless internet value-added services including IVR appeared to be taking its place. Capitalised on our focused and dedicated services in IVR platform development and the strong and leading technology we maintained, we have experienced strong profit growth in the period under review. Over the past several quarters, we have upgraded our service platform and support system. The capacity has been expanded to cater for the rapid growing mobile telecommunication subscribers and their demand for new services.

The increase in investment is inevitable in order to maintain a platform providing stable and reliable services as well as to develop new products and to enter into new markets. The increases in the expenses and investment were well under control and the management will endeavour to keep cost competitive.

PROSPECTS

Finance

Our financial solutions team have strived to provide world class systems to our financial clients. Not only did we win the appreciation from our clients, we also won the recognition from the industrial practitioners. With the revolutionary changes in the regulations and market environment in the industry, resulting challenging operating environment which lead the financial institutions to carry out integration and consolidation plan and to execute cost saving programme through technology investment. These market forces are placing new demands on the financial institutions and drive them to change how services are delivered. Leveraged on our solid foundation laid and proven operational excellence, as well as our established alliances with global peers, we have made ourselves ready to reap these opportunities later on.

Our new outsourcing and consultancy strategy proposed has struck a chord with our client. This paved the way for our repositioning from a pure IT consultant and system integrator into a business process outsourcing services provider. Teaming up with global peers in this market is under discussion and we expected the collaboration will establish us as a leader in outsourcing businesses in the Mainland China.

Telecommunication

We realise that focusing on single IVR platform operating business line can be a double edged sword. Thus, besides constantly improve our existing platform and support system, we started to build up strategic alliances with several service providers in the areas of new products and new markets. We believe the wireless VAS market should have a double digit percentage growth rate on a year on year basis in the coming years. Our revenue and profit growth momentum will be maintained through new services and new markets offerings.

Electronic payment terminals

PAX's management believes quality of products, sale and marketing capabilities and management skills are critical to keep PAX competitive. The investments and efforts we made are designed to position us for a long-term growth in China and to vie for a presence in the global market. As one of the market leaders in Mainland China with presence in Asian market, PAX is better positioned than before to join forces with our potential partners in the lucrative American market. All of our fellow managers are committed to excellence and readily reacting to what our clients needed. Looking ahead, we are confident of our prospect and believe all these endeavours and investments will pay off in 2005 and beyond for our shareholders.

EXPOSURE TO FLUCTUATIONS IN EXCHANGE RATES AND RELATED HEDGES

The Group derives most of its revenue from the PRC and Hong Kong and makes purchase and incurs expenses denominated mainly in US dollar, Renminbi and Hong Kong dollar. The Group's exposure to the fluctuation of exchange rate is minimal. Currently, the Group has not entered into agreements or purchased instruments to hedge the Group's exchange rate risks.

PURCHASE, SALE OR REDEMPTION OF SHARES

The Company has not redeemed any of its shares during the period. Neither the Company nor any of its subsidiaries has purchased or sold any of the Company's shares during the period.

MODEL CODE FOR SECURITIES TRANSACTIONS BY DIRECTORS

The Company has adopted the Model Code for Securities Transactions by Directors of the Listed Issuers on terms no less exacting than the required standard set out in Appendix 10 of the Listing Rules (the "Model Code"). The Model Code sets a required standard against which directors and employees of the Company and its subsidiaries (the "Group") must measure their conduct regarding transactions in securities of the Company.

Having made specific enquiry, all Directors of the Company have confirmed that they have complied with the required standard set out in the Model Code throughout the six months ended 30th June 2005.

CORPORATE GOVERNANCE

The Company has complied with the code provisions of the Code on Corporate Governance Practices (the “CG Code”) as set out in Appendix 14 of the Listing Rules throughout the six months ended 30th June 2005, except for the deviation from code provision A.2.1, A.4.1 and E.1.2 of the CG Code.

Under code provision A.2.1 which stipulates that the roles of the chairman and chief executive officer should be separate and should not be performed by the same individual. The chairman of the board does not perform the duty of chief executive officer while the other executive directors of the Company assumes the role of chief executive officer. The present structure is more suitable to the Company and the practice is considered no less exacting than those in the CG Code.

Under code provision A.4.1 that none of the existing non-executive director (including independent non-executive director) of the Company is appointed for a specific term. However, in view of the fact that all directors of the Company (executive and non-executive director) are subject to the retirement by rotation at least once every three years in accordance with Bye-law 87 of the Bye-laws of the Company.
