1. ABOUT THIS REPORT

1.1 OVERVIEW OF OUR BUSINESS

National Electronics Holdings Limited (“the Company”) is an investment holding company. The Company, along with its subsidiaries (“the Group”), is mainly engaged in the manufacturing, assembly and sale of electronic watches and watch parts; trading of watch movements and watch parts; property development and investment; and hotel operation.

1.2 SCOPE OF THIS REPORT

This Environmental, Social and Governance (“ESG”) Report covers the Group’s initiatives and progress for the reporting period from 1 April 2021 to 31 March 2022. The scope covers the three main operating segments of the Group – manufacturing, assembly and sale of electronic watches and watch parts, and trading of watch movements and watch parts; property development and investment; and hotel operation.

The reported environmental key performance indicators (“KPIs”) cover the Group’s principal operations in the three major business segments, including our five offices and four hotels (The Putman, 99 Bonham, The Jervois and One96) in Hong Kong, two offices in Canada, and our watch manufacturing facility in Shenzhen. We also report on the environmental KPIs of investment properties with activities or active construction activities performed by our contractors as listed below:

Project	Location	Nature	ESG data included
1 South Bay Close	Hong Kong	Residential	Y
House No. 1 and House No. 6, 45 Tai Tam Road	Hong Kong	Residential	Y
House No. 8, 39 Deep Water Bay Road	Hong Kong	Residential	Y
House No. 26, Le Palais, 8 Pak Pat Shan Road	Hong Kong	Residential	Y
Two parcels of land located at Yinkai Industrial Park, Nanning City	China	Industrial	N
Properties located at No. 2-1 and No. 2-2, Herfeng 3 rd Road, New Taipei City	Taiwan	Residential	Y
Phase III of 88 Queen Street East, Toronto	Canada	Commercial and residential	Y
77 Shuter Street, Toronto	Canada	Commercial and residential	Y ¹
Apartment 306, Burlington Gate, London, U.K.	United Kingdom	Residential	Y
Apartment 503, Burlington Gate, London, U.K.	United Kingdom	Residential	Y

¹ Since the Group completed the sold units sales of the development project during the previous year, its ESG data during this reporting period is excluded.

1.3 REPORTING PRINCIPLES

In the preparation of this ESG report, the Group follows the four reporting principles as set out in the ESG Guide:

Reporting Principles	The Group's Application
Materiality	The Group focuses on matters that impact business growth and are of importance to our stakeholders. For more details, please refer to section "Our Approach".
Quantitative	Information is presented with quantitative measure, whenever feasible, including information on the standards, methodologies and assumptions used.
Balance	Information is disclosed as objectively as possible to provide stakeholders with an unbiased picture of our overall ESG performance.
Consistency	All KPIs' calculations and assumptions are consistent with previous years to allow meaningful comparisons. Reasons will be provided for any restating of information published in this report.

1.4 REPORTING REFERENCE

This ESG report is prepared in accordance with the "comply or explain" provisions of the Environmental, Social and Governance Reporting Guide ("ESG Reporting Guide") in Appendix 27 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("Exchange"). For corporate governance provisions, please refer to the Annual Report 2022 of the Group.

1.5 SOURCE OF INFORMATION AND CONTACT

The information disclosed in this report has been sourced from the Group's internal records and information collected from the construction contractors of our property development projects. The Group's management and the respective departments have confirmed all information in this report. If you have any questions or comments regarding any part of this report, please contact us at info@nationalholdings.com.hk.

2. OUR APPROACH

2.1 THE BOARD STATEMENT

The Group adopts a top-down approach to ensure the effective implementation of ESG management measures. The Board facilitates the establishment of the Group's ESG objectives, priorities, and strategies with consideration of the ESG-related risks and opportunities.

The Board formulates the Group's ESG direction and management approach based on the importance of ESG issues to our operation and stakeholders. We have appointed an independent consultant to conduct a materiality assessment on our ESG issues. For details of the material assessment, please refer to the section "Materiality Review" in this report.

For effective leadership of our ESG progress, the Board will continue to monitor the ESG-related work and ensure that all departments work closely together to identify and manage ESG-related issues and collect quantitative and qualitative information to share our ESG progress with different stakeholders through the ESG report. Furthermore, the Board will regularly review the Group's ESG progress and goals to ensure they can meet and deal with the ever-changing business environment.

2.2 GOVERNANCE ON ESG MATTERS

The national of ESG governance is embedded in our daily operation and management. Currently, ESG matters are managed by each business division, where each division is responsible for identifying, assessing, and mitigating current and potential ESG risks to seize opportunities for improvement. Business divisions report back to the head office on their ESG progress and performance annually, where dedicated personnel gather quantitative and qualitative information for the preparation of the ESG report with the help of a third-party consultant. Through this practice, the Board and management receive updates and provide feedback on the Group's ESG risks and opportunities, performance, and progress towards any target set.

2.3 STAKEHOLDER ENGAGEMENT

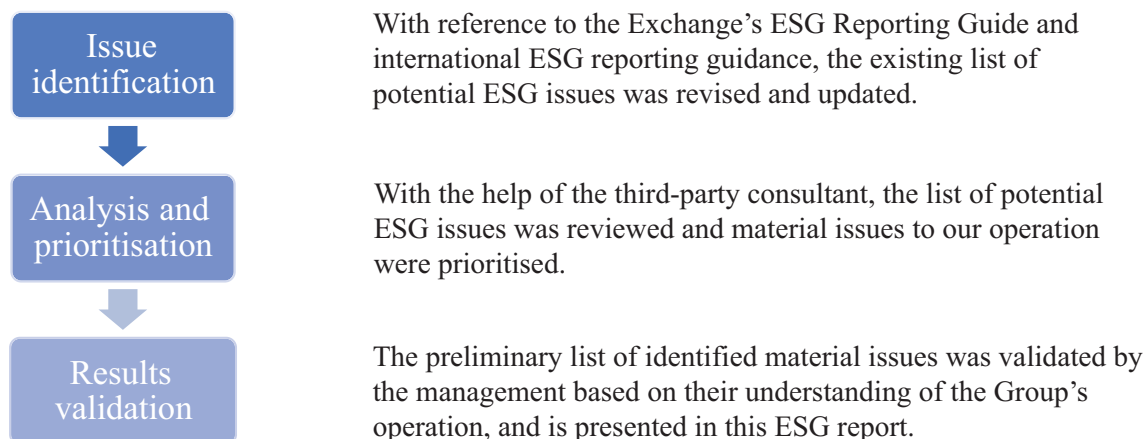

The Group endeavours to communicate openly and transparently with our stakeholders to ensure our ESG strategies and reporting meet their expectations. We believe encouraging sustainable practices with our stakeholders is vital to our community and business. This includes effective planning and management of ESG matters for all our stakeholders.

Our key stakeholders are our clients, employees, suppliers, contractors, and professionals engaged in our diverse business segments. We closely communicate with these stakeholders through various channels to understand their concerns and to determine how best to implement our ESG commitments into our policies and processes. We believe that our stakeholders play a crucial role in sustaining our business success and positive impacts on the community and the environment.

As we progress through our ESG journey, we will continue to actively work with our stakeholders to inform, include them in key decisions and seek their feedback that relates to our sustainability initiatives and policies. This extends to periodically reviewing our materiality issues as needed.

2.4 MATERIALITY REVIEW

We previously reviewed our list of important ESG issues and prioritised them according to their importance for a strategic and focused report with the help of a third-party consultant. The following are the specific steps in the materiality assessment:

The material sustainability issues identified from the materiality review process were:

Environmental issues

Energy use

Water use

Social issues

Health and safety

Labour practices

Supply chain management

Product responsibility

Anti-corruption

3. ENVIRONMENT

The Group recognises the importance of good environmental stewardship and is firmly committed to protecting the environment. We integrate environmental consideration into our business operations and implement various initiatives to mitigate the direct environmental impact arising from our business operations.

Watch Manufacturing

In our watch manufacturing practice, we mainly source watch components and assemble them to create our final products. We do our best to reduce our impact on the environment through our process line, and have concluded that our major source of chemical wastes is the use of lubricants within our production line, as well as the air emissions generated from soldering. We have established an environmental management system, which assists us in managing our manufacturing procedures in an environmentally sustainable manner.

To mitigate adverse environmental impacts, we have implemented various mechanisms into our watch manufacturing business. We have both specific and broad targets for our watch business to ensure that environmental concerns are considered in our manufacturing process. We have introduced more eco-friendly product designs and processes, and we seek to understand and reduce our existing environmental footprint.

Property Development

Engaging closely with our contractors, vendors and other stakeholders is a key aspect of our property development business. Although it can sometimes be challenging to incorporate sustainable practices in construction, we are firmly committed to minimising any adverse impacts on the environment. For example, beginning with the design phase, we employ green building guidelines, such as BEAM² and LEED³, for all new buildings. In all, we emphasize green features in every step of our property development process to demonstrate our commitment to sustainability and explore different opportunities such as increasing the property's asset value by encouraging the adoption of good social and environmental practices.

For instance, double insulated glass window panels are installed in our building structures, which reduce the amount of heat that can pass through the window.

Hotel Operations

The nature of the hotel and hospitality industry can present some challenges when considering sustainable alternatives. This is especially prevalent when taking into account that hotels offer 24-hour service to guests. The two key areas of challenge in the operation of hotels are the use of resources and waste management.

Offices

Our offices make the same commitment to minimising negative environmental impacts as every other business segment of the Group. This is demonstrated by strict waste management and efficient resource use. To continue positively impacting the society, we also encourage our staff to follow the model of "Reuse, Reduce, and Recycle" in their daily lives.

² Building Environmental Assessment Method (BEAM) is the Hong Kong rating tool for green buildings.

³ Leadership in Energy and Environmental Design (LEED) is a rating system devised by the United States Green Building Council (USGBC) to evaluate the environmental performance of a building and encourage market transformation towards sustainable design.

3.1 USE OF RESOURCES

As a responsible conglomerate, reducing energy consumption is a priority to the Group as they account for a significant proportion of our greenhouse gas (“GHG”) emissions. Upon reflecting on our use of resources, we have concluded that electricity is the most substantial resource used in our operations. As part of our effort to minimise our environmental impact, we closely monitor our monthly electricity, water and fuel consumption, and those data allow us to analyse the areas to be improved.

Watch Manufacturing

We continue to minimise waste and the use of unnecessary resources in the manufacturing process. We set aspirational targets to challenge ourselves to continuously improve. Every year, we aim to reduce our electricity and water consumption by 10% compared to the previous year. Additionally, we hope that by improving our employees’ environmental awareness, they will make best efforts to reduce waste in their daily tasks.

Property Development

The environmental impacts of buildings over their lifetimes are determined by several factors, including materials, design, construction, use, and demolition. With material comprising a significant proportion of the building’s environmental footprint, we are committed to reducing and reusing materials where practical. For example, we have implemented double insulated glass units as window panels to minimize heat permeation into our buildings, and therefore reducing air conditioning costs. Further, to reduce the use of electricity during its use phase, we prioritise the use of LED lights over other lightings during the design phase. In addition to optimising the resource consumption of the buildings, we also aim for a provision of at least 20% of greenery area for plants and trees in the common space of our property developments. Additionally, the Group is committed to reducing water consumption by implementing design features, such as water-saving fixtures and rainwater retention for flushing, together with various initiatives.

Hotel Operation

We are firmly committed to reducing the environmental footprint and have been launching environmental initiatives across our hotels. However, the nature of the hospitality industry means that our efforts depend significantly on the choices of our guests. Nevertheless, we encourage our guests to make use of the sustainable alternatives that we provide. We reduce the consumption of a substantial amount of resources by closing certain rooms and floors of our hotels when guest room utilisation is low. This policy assists in saving electricity, gas, and water. Similar to many hotels worldwide, we provide an “Environmental Friendly Card” in every room, and our guests may place it on their bed to indicate that they do not require the bedding to be changed. This significantly reduced the consumption of electricity and water for laundry. The second aspect of this initiative is requesting guests to hang their towels to show that they are not required for laundry. To enhance the energy efficiency, we are planning to replace all emergency lighting with LED tubes in some of our hotel properties.

Offices

We have implemented various green practices at our offices to enhance energy efficiency and reduce the production of general waste. These measures include the following:

- Keeping the air-conditioned room temperature at approximately 25°C;
- Switching off lights in unoccupied rooms and shutting down idle computers;
- Installing drinking water dispensers to reduce the use of bottled water;

3. ENVIRONMENT

- Switching to energy-saving mode for office equipment and electronic appliances after a period of inactivity;
- Recycling food wastage such as coffee grounds; and
- Adopting duplex printing and minimising the printing of documents by using electronic soft copies and communication channels whenever practicable.

3.2 EMISSIONS

Due to the nature of our operation, hazardous waste generation and air emissions have been identified as the two most significant environmental emissions in our business. In the following sections, we have provided a breakdown of these implications within each of our business segments.

3.2.1 Waste Management

Watch manufacturing

Our watch manufacturing division is mainly involved in the assembly of watch parts into final products. We do not manufacture the components ourselves but work closely with suppliers who produce the watch parts. The assembly process generates minimal waste and pollution, with only a small amount of chemical waste generated comprising of waste batteries, spent oils and extracts from the lubricants used for machinery. Improper disposal of the chemicals and heavy metals in these wastes, such as mercury, lead, cadmium and nickel, may result in environmental contamination. Besides the chemical wastes, paper and plastic packaging wastes are also generated in the process.

In managing the wastes generated, we appoint licensed contractors to properly collect and dispose of hazardous and non-hazardous wastes and recycle packaging materials. We also have a clear separation between chemical and non-chemical wastes. Furthermore, all our staff have received proper training in correct separation, treatment, and disposal of such chemical waste.

In order to reduce the amount of chemical waste produced, we have transformed our production process technologically, upgraded our machinery, and used environmentally friendly raw materials.

Property Development

The primary sources of waste generation in our property development projects are construction and demolition wastes. To reduce such wastes, we seek to reuse and recycle them wherever possible. To achieve a reduction in waste output, our contractors have implemented management plans to guide waste disposal through effectively avoiding and reducing waste generation.

In Hong Kong, we avoid abortive works with careful design and planning to reduce construction waste. Timber planks will be reused whenever possible to lessen the production of waste materials.

In Canada, each of our contractors will implement a construction waste management plan to reduce the amount of waste generated. The contractors are also responsible for the segregation of waste and planning for the recycling of materials.

Other than construction waste, chemical wastes such as paints and solvents are also generated during the construction process. The Group works closely with our contractors to ensure hazardous waste are properly managed and disposed of. The handling of such chemical waste follows a management plan that complies with the relevant industry guidance and regulatory requirements.

Hotel Operations

Food waste and domestic waste from our guests are the two main categories of waste produced in our hotel operation. By providing recycling bins, we encourage our guests to separate plastics, cans, and paper from the general waste to reduce landfill waste.

As the result of routine maintenance work, our hotels also generate a small amount of hazardous waste such as used paints and light tubes. To reduce the environmental impact, we use paints that comply with the Environmental Protection Department's standard and store any hazardous waste properly for collection by the authorised waste collector appointed.

Since 2021, we have been collecting plastic water bottles for recycling through a third-party waste recycler. Besides collaborating with recyclers, we also managed to source environmentally friendly raw materials whenever possible. We will also start participating in light-tube recycling to lessen our environmental impact.

Main Office

The main office of the Group produces a minimal amount of waste considering the nature of its operation. It does, however, also endeavour to minimise and correctly dispose of any waste generated. This is achieved through adopting electronic methods for communication instead of paper-based methods, providing recycle bins to collect used paper, plastic bottles, packaging materials and ink cartridges, as well as using double-sided printing when hardcopies are necessary.

3.2.2 Air Emissions

Watch Manufacturing

In our watch manufacturing process, air emissions mainly come from soldering, volatile organic solvents and lube oil, and metal dust from cutting machinery. We have ensured air ventilation is adequate and have appointed a third-party agency to undertake routine inspections of our exhaust emissions. The testing parameters include lead, tin and non-methane hydrocarbons, which comply with the relevant provincial standards.

Property Development

The nature of construction works leads to some inevitable air pollution, particularly in the form of air and dust pollution. As we employ third-party contractors, we do not have direct control over the operation of the construction sites. However, to minimise the air emissions from our construction sites, we undertake routine checks and work closely with our contractors to ensure that they comply with all relevant environmental protection laws and regulations.

At our construction sites, regular inspections are conducted to ensure that plants and machinery are properly maintained to minimise air pollution. Dust suppression practices such as water spraying are also in place to lower the impact of dust emissions on the surrounding environment. Depending on the location of the development project, we comply with local air pollution requirements such as the Air Pollution Control Ordinance in Hong Kong or the Air Quality Regulation guidelines in Ontario, Canada.

3. ENVIRONMENT

3.2.3 Other Emissions

Watch Manufacturing

To effectively manage the noise emission in our watch manufacturing operation, the noise level is tested regularly to ensure it meets the environmental protection and industry-specific standards.

Property Development

Coupled with construction waste and air pollution are the noise emission and wastewater discharge at the construction sites, which could negatively impact the surrounding environment if not properly managed. While we do not perform the construction activities ourselves, we work closely with our contractors to properly manage the noise and wastewater discharge over the construction of our properties.

To mitigate the impact of construction noise on the surrounding environment, our contractors have followed the time and date specifications of noise permits or other local regulations on construction works. Our construction sites are inspected from time to time to maintain the machinery's optimal condition and minimize noise generation. We also maintain our plants on a regular basis to minimise the noise generated.

For wastewater discharge, our contractors have followed relevant local regulations and monitored the quality of wastewater discharge to avoid contamination of public drains. In Hong Kong, sedimentation tanks are used to treat the wastewater before discharge. In Canada, wastewater is pumped into a portable storage tank to prevent runoff into the municipal sewers.

3.2.4 Regulatory Compliance

During the reporting period, we were not aware of any material non-compliance with laws and regulations relating to environmental emissions for our manufacturing factories, construction sites and operating properties including hotels.

3.3 CLIMATE CHANGE

The Group is aware of the effects of climate change, and it is crucial for us to respond to the climate change risks that may impact our business operations. Physical climate risks, such as extreme weather events, have the potential to damage the integrity of the Group's property projects and assets, and could interrupt our capability in delivery goods and services to our customers. While transition climate risks, including policy changes and shifts in market preferences, could also potentially increase operational costs and legal risk due to changes in policies.

To ensure that the Group remains vigilant in managing climate-related factors and risks, we closely monitor our emissions and continuously review and implement various climate change risk management initiatives across our operations. Please refer to the previous chapters of "Use of resources" and "Emissions" for further information on the initiatives we undertook to reduce our GHG emissions and mitigate the impact of climate change.

3.4 ENVIRONMENTAL PERFORMANCE DATA TABLE

Group-level⁴	Unit	2022	2021
Total energy consumption ⁵	GJ	15,900	14,497
Use of electricity	kWh	3,516,718	3,223,696
Use of towngas	unit	62,575	53,407
Use of diesel	litre	892	2,244
Use of gasoline	litre	6,210	7,533
Scope 1 GHG emissions	tonnes CO ₂ e	179	163
Scope 2 GHG emissions	tonnes CO ₂ e	2,442	2,222
Use of water	m ³	23,890	26,840
Solid hazardous waste disposal	tonne	Negligible	Negligible
Liquid hazardous waste disposal	litre	Negligible	Negligible
Construction projects⁶	Unit	2022	2021
Total energy consumption ⁵	GJ	2,867	6,660
Use of electricity	kWh	296,562	272,366
Use of natural gas	m ³	35,421	107,777
Use of diesel	litre	11,011	39,146
Use of water	m ³	2,639	21,576

⁴ Excludes contractor consumptions at our property development sites, which is reported separately in the column “Construction projects”.

⁵ Energy conversion factors are extracted from the UK Government GHG Conversion Factors for Company Reporting 2022 published by the Department for Business, Energy & Industrial Strategy and the Towngas ESG Report 2021.

⁶ Due to the difference in project phase and completion of projects during the period, the contractor consumptions are not directly comparable.

4. EMPLOYMENT AND LABOUR PRACTICE

We believe attracting and retaining talent is essential for the Group's long-term development. The Group abides by relevant laws and regulations throughout the recruitment and employment process and strives to provide a positive and safe work environment where our employees can grow. We also offer a competitive remuneration package and other additional benefits to reinforce our employees' sense of belonging.

4.1 RECRUITMENT AND EMPLOYEE BENEFITS

Talent Recruitment

The Group strives to create a fair and equal working environment for our employees. We are a proud equal opportunity employer, and we welcome people from diverse backgrounds and skills. We also ensure that our employees are not discriminated against or harassed due to their gender, age, ethnicity, nationality, marital status, or religion.

To retain and motivate talent, the Group provide competitive remuneration packages to our employees for their contributions to the Group's growth and profitability. We apply a robust and transparent annual review process to ensure our remuneration packages accurately reflect our employees' contributions and performance.

Remuneration Package and Benefits

As an additional measure to reinforce our employees' sense of belonging and commitment, we offer our employees additional leave entitlements, including paid annual leave, sick leave, maternity leave and paternity leave.

We proactively support our staff's professional growth and encourage internal transfer and promotions where appropriate. The Group invests time and resources in employees' training and development to ensure our employees will have the breadth and depth of skills and knowledge to achieve the Group's business goals. As a company, we are committed to keeping talent within the group and endeavour to promote within where we can. Promotion decisions would be made based on the merit, efficiency and ability of the respective employee to ensure fairness.

Building up an Atmosphere of Trust

In order to build a harmonic workplace, the Group encourages open, honest two-way communication within our internal systems with staff at all levels regularly.

We have undertaken many methods to obtain feedback from our employees, not only to understand their concerns but also to determine where and how the Group could improve. The primary form of communication we draw upon is through our line managers, whom we encourage to hold regular briefings with their teams. These regular briefings consist of not only counselling, performance reviews, and career guidance, but also provide a periodic platform in which both the team leader and the team can voice concerns, seek clarification, or share best practices. In addition to these meetings, employees can also directly express any questions or concerns to management or human resources should that be necessary.

We seek to protect our employees' well-being by encouraging a healthy work-life balance. A wide range of staff events, including but not limited to New Year and Christmas lunches, are organised to foster a happy working environment and facilitate a strong sense of comradery and teamwork.

Labour Standards

For employees' management, the Group strictly adheres to all local labour laws and regulations, including but not limited to the Labour Law of the People's Republic of China, Provisions on the Prohibition of Using Child Labour and the Employment Ordinance of Hong Kong. We will promptly correct such deficiencies upon discovering any irregularity or failure to comply with such rules and regulations.

4. EMPLOYMENT AND LABOUR PRACTICE

The Group abides by relevant laws and regulations prohibiting child and forced labour in all its operations. We perform stringent checking and control procedures in the onboarding process and have established mechanisms within the business structure to ensure that no underage labour is hired. For example, although we do not discriminate on age when processing perspective employees' applications, we ensure they are above the local legal employment age.

Furthermore, we respect human rights and ensure that all our employees are treated fairly and are not overworked. We encourage our staff to take regular breaks and rest days and enjoy all benefits and entitlements afforded to them through their employment agreements.

Employee composition (as at 31 March 2022)

Employee category		Number of employees	Turnover rate
By gender	Male	111	10%
	Female	135	16%
By age group	Below 30	15	40%
	30-50	136	15%
	Above 50	95	5%
By geographical region	Hong Kong	179	15%
	Mainland China	53	6%
	Canada	10	20%
	Others	4	Nil
By employment type	Full-time	206	12%
	Part-time	40	20%

Regulatory compliance

During the year under review, the Group was not aware of any material non-compliance with laws and regulations relating to employment and child or forced labour.

4.2 HEALTH AND SAFETY

Creating a safe and well-supervised working environment is of utmost importance in our business units' day-to-day operations. During the year, we continue to adopt various measures to protect our employees under the COVID-19 pandemic and prevent the spreading of diseases in our workplace.

Watch Manufacturing

Although the manufacturing industry can present additional health and safety challenges, we pledge to foster a safe and healthy working environment for our staff. We strictly comply with local laws, regulations, and standards, including but not limited to the "Occupational exposure limits for hazardous agents in the workplace" and "Standards for drinking water quality" imposed by the Chinese government.

We continue to improve the health and safety in our operation and have implemented internal policies and referenced relevant best practices to conduct our businesses safely and socially responsibly.

To ensure the air quality in our operation, we conducted periodic indoor air quality monitoring and tracked the levels of the various chemicals used in our watch manufacturing. These chemicals include benzene, toluene, xylene, acetone, butanone and ethyl acetate.

4. EMPLOYMENT AND LABOUR PRACTICE

Furthermore, we also conduct regular testing of our water to ensure that it is safe for consumption, and regularly monitor our machinery to ensure that there is an acceptable level of noise emission and ensure we do not cause excessive disturbance to our local community. We also provided earplugs to protect our employees' hearing on the job.

To enhance our employees' health and safety awareness, we provide robust health and safety training to ensure that they are aware of the risks that exist and how to mitigate and respond to them. This training consists of environmental, health and safety at work, and first-aid training by the Red Cross. Additionally, we have first-aid kits placed throughout our workplace. We closely monitor the local laws and regulations regarding health and safety to ensure that we are always in compliance. We also provided annual physical examinations to our employees for timely diagnosis and treatment of occupational health issues.

We have no injuries to report from our watch manufacturing business during this reporting period.

Property Development

Similar to our watch manufacturing business, property development presents extra additional health and safety challenges and requirements that we are committed to meeting. As we outsource most aspects of our construction work, we actively communicate and collaborate with our vendors to develop and implement new initiatives to improve health and safety performance.

The Group only works with external vendors that align with our standards of good reputation and health and safety. We encourage our external vendors to strive for zero accident goals for all construction projects by facilitating regular meetings and inspections. We have also implemented a compulsory temperature check at the entrances of all our construction sites.

Hotel Operation

In order to effectively lower our risks and ensure the safety of our staff and guests in the hotel operation, we have captured all of our health and safety procedures and protocols in our Employee Handbook, which provides detailed guidance on how to approach any work-related injuries or health and safety-related challenges should they arise.

We ensure our staff receives robust and up-to-date health and safety training to maintain safety standards and encourage health and safety awareness in our hotel operations. One of the trainings we conducted is regarding fire safety to equip our staff with the skills to do in the unlikely event of a fire.

We have also established clear protocols for how our staff should respond to a health and safety emergency. For example, our employees are required to immediately notify the front desk of the exact location of the smoke and fire and attempt to extinguish the fire with the nearest available fire extinguisher, provided that such action does not endanger oneself or others. Emergency services will be contacted when our hotel operation cannot control an emergency.

During the reporting period, there was a total of 3 minor injuries which resulted in 20 lost days.

Occupational Health and Safety Statistic in 2022

Work-related fatality in the past three years (from FY2020 – FY2022)	0 person
Work-related injuries in 2022	3 persons
Lost days due to work-related injuries in 2022	20 days

4. EMPLOYMENT AND LABOUR PRACTICE

Protecting our employees throughout the COVID-19 period

The ongoing COVID-19 pandemic has continued to affect the community significantly. As a caring company, we remain committed to protecting our employees and implemented a series of measures such as temperature testing, provision of surgical masks, gloves, disinfectant sanitisers and COVID-19 Rapid Antigen Test kits (RAT) throughout our workplace.

Similar to the previous year, we continue to provide our staff with flexible work arrangements where necessary. However, the nature of some of our businesses means that some of our staff cannot work from home, therefore we have established a team rotation system to protect our staff by reducing the chance of cross-infection.

We also follow the general guidelines from the Centre for Health Protection for our hotel operation, which include:

- All staff must be tested negative using COVID-19 RAT before going to the office each day;
- Wearing surgical masks and maintaining good personal hygiene;
- Enhancing cleaning and disinfection of the premises, where commonly touched areas (e.g. lift buttons) are disinfected at least once every two hours during daytime;
- Maintaining good ventilation of the premises by maximizing fresh air intake and changing/cleaning the ventilation system filter regularly;
- Ensuring the drainage systems (U-traps) are in proper function;
- Measuring body temperature for all in-house and check-in guests;
- Requiring all guests to fill out health declaration form during check-in; and
- Providing 70-80% alcohol-based hand sanitisers to guests in public areas and preparing an adequate amount of surgical masks for use.

Regulatory compliance

During the year under review, the Company was not aware of any non-compliance with laws and regulations relating to occupational health and safety.

4.3 DEVELOPMENT AND TRAINING

The Group strongly believes our people's professional growth is essential to our business's growth. We continue to provide quality training for our employees to develop and advance their careers in the Group.

Our onboarding process for new staff includes a comprehensive understanding of the Group's structure and policies. To ensure our skilled staff members are professionally trained and suitably qualified, we have formulated training courses tailored to different business operations. For example, employees who work at our watch manufacturing business will receive the relevant safety training relating to the role (such as machinery safety). At the same time, the staff in our hotel operations receive English language, communication and grooming training.

4. EMPLOYMENT AND LABOUR PRACTICE

Besides internal training programs, we also encourage our staff to attend external training to strengthen their job performance. We facilitate this support through an Educational Assistance Scheme, which offers sponsorship to our hotel associates and encourages those who have served more than 2 years of service to pursue external training to further their professional development and growth.

For our watch manufacturing business, we continued to provide the environmental and safety health training course. All our watch manufacturing business employees need to participate in the training, which covers guidance and knowledge in the production process, such as electrical safety, machinery operations, fire safety, environmental protection, hazardous chemicals management, and personal protection. In 2022, each watch manufacturing division staff received 36 hours of training on environmental health and safety.

Employee training statistics (as at 31 March 2022)

Employee category		Average hours trained	Percentage of employees trained
By gender	Male	8	30%
	Female	9	28%
By employee rank	Management	11	52%
	Non-management	8	26%

4.4 ANTI-CORRUPTION

The Group is committed to achieving and maintaining the highest possible standards of openness, integrity and accountability. We attached great importance to anti-corruption and strictly complying with relevant jurisdiction laws and regulations.

We have a zero-tolerance policy against any form of bribery or corruption and require our staff to follow and adopt our high standards of integrity and ethics in both the internal and external aspects of their roles. In addition, our Code of Conduct (“Code”) and Staff Handbook also set out the professional and ethical standards, such as the importance of avoiding conflict of interest and safeguarding confidential information, for our employees to observe in all business dealings. During the year, 32 hours of training were offered to our employees to refresh their understanding on anti-corruption and bribery.

All directors and employees of the Company are required to avoid any situation that may involve a conflict between their personal interests and the Company’s best interests. They are always obliged to promote the Company’s best interest. If a conflict of interest arises or is likely to arise, the staff involved must promptly report to his or her supervisor or the Company’s Audit and Risk Management Committee.

Directors and employees are responsible for safeguarding any confidential information they can access. No confidential information regarding the Company should be discussed with anyone outside the Company except where disclosure is needed to enable the Company to carry on its business.

Any employee contravening the Company’s Code is liable to disciplinary action. Depending on the nature of the incident, misconduct may result in a verbal warning, written warning, or dismissal. We will report the offence to the appropriate authorities in certain situations. In addition, anti-corruption training is provided to management and general staff to raise their awareness regarding anti-corruption topics and build a culture of integrity.

4. EMPLOYMENT AND LABOUR PRACTICE

Regulatory compliance

During the year under review, the Group was not aware of any material breach of laws and regulations relating to bribery, extortion, fraud, and money laundering.

5. PRODUCT RESPONSIBILITY

The Group aims to deliver quality products and services that bring value to our customers. We have formulated various policies and quality control initiatives to manage and monitor our product quality and safety.

5.1 SECURING PRODUCTS AND SERVICES QUALITY

Watch Manufacturing

The Group is rigorously managing the quality specifications and quality assurance in our production processes. We are also committed to creating quality products and have obtained the ISO9001 certification for our watch manufacturing business.

Our projects are subjected to the following quality control testing:

- A series of inspections from parts to final products, regarding their appearance, packaging, specification and brand logo, etc., are conducted on a sampling basis; and
- If any defects are identified, the relevant product will be returned to the production house for assessments, with the reason for the defect investigated and recorded.

Customer feedback is crucial in helping us to understand their needs and enabling us to continue improving the quality of our products and services.

Property Development

We seek consultations from experts in all stages of all our property development projects. We approach each property design by considering the perspectives of those who will be the users at the end of the project. This point of view allows us to consider the practical outcomes of the designs we make during the construction process.

We simultaneously strive for supreme quality in the building of our properties as well as adhering to local health and safety laws and regulation guides. We encourage a company-wide culture in which everyone is responsible for making every workday healthy and safe.

The Group place high importance in managing the marketing and business development phase. We strictly abide by relevant regulations and guidelines such as the “Residential Properties (First-hand Sales) Ordinance” and the self-regulatory regime of the Real Estate Developers Association of Hong Kong. We employ third party external property agents to assist in our properties’ marketing and business development phase. Although we outsource this aspect of the process, we work closely with these agents to ensure that their implementations align with our policy. For example, the communication methods and content used by these agents must adhere to our standards and provide an accurate illustration of our projects.

Hotel Operations

Our hotel operations apply a strict set of guidelines regarding the processing and protection of our guest’s data. We comply with applicable legal requirements relating to collecting, processing, disclosing, and using personal data to ensure that our guests’ data are kept safe and secure. The handling of guests’ data is an aspect of our employee training and is available in our Staff Handbook. Employees can refer back to it should they require any imminent clarification.

Furthermore, we have organised training for our new joiners to ensure that they have adequate knowledge of the Group’s data protection practices.

Regulatory compliance

During the year under review, the Company was not aware of any material non-compliance with laws and regulations relating to our products and services.

5.2 SUPPLY CHAIN MANAGEMENT

We use the services of many vendors and contractors through our different businesses, and it is very important to us that they also uphold high standards of safety, care and ethics. The Group regularly monitors and evaluates our suppliers' performance and implements different initiatives to enhance and manage our product quality. When selecting our suppliers, we consider price, quality, reputation, integrity and reliability amongst other factors, but we also analyse each supplier's ESG performance as well as their health and safety standards. We appoint suppliers and service providers based on strict ethical standards, which enhance the confidence of our customers. We hold our vendors to the same high ethical standards that we set for our staff.

During the reporting period, the Group has a total of 581 suppliers, with 87% of suppliers in Hong Kong and Mainland China.

Watch Manufacturing

Our watch manufacturing business relies on numerous suppliers to support our production and assembling of high-quality watches. To manage our supply chain effectively and efficiently, we have developed and implemented a number of policies to monitor and constantly improve our processes. Regular monitoring and evaluation are carried out to ensure the performance of our suppliers meets the Group's standards of ethics, health and safety and quality.

Property Development

The Group only work with reputable suppliers and have long-term partnerships with major contractors in Hong Kong to uphold our high standards of quality, ethics, environmental protection, and health and safety. For the year under review, we were not aware of any material violations regarding health and safety by our contractors.

Hotel Operations

Our hotel operations also employ a variety of contractors that are also measured against high standards of quality, ethics, environmental protection and health and safety. The Group adopts a comprehensive set of procurement and tender procedures to ensure that related activities are carried out in a fair and transparent manner. Our procurement policies and procedures adhere to the following principles:

- There should be a genuine need for the goods and services;
- At least 2-3 quotations should be considered unless the required item is classified as sole supply item;
- The procurement process should comply with relevant laws; and
- Adequate management controls should be undertaken to prevent and detect bribery, fraud or other malpractices in the process of procurement and tendering.

The Group will continue to develop and implement a range of initiatives to enhance the assessment and monitor the ESG performance of our suppliers across all business operations.

6. COMMUNITY INVESTMENT

The Group is committed to operating as a responsible citizen, actively supporting people in need and contributing to society. We encourage our employees to be active and generous members of our society through donations and participation in local events and programs. During the reporting period, a total of HK\$22,000 for charitable donations was made.

A THE EXCHANGE'S ESG REPORTING GUIDE INDEX

(I) Mandatory Disclosure Requirements		Sections/Remarks
Governance Structure	A statement from the board containing the following elements: <ul style="list-style-type: none">(i) a disclosure of the board's oversight of ESG issues;(ii) the board's ESG management approach and strategy, including the process used to evaluate, prioritise and manage material ESG-related issues (including risks to the issuer's businesses); and(iii) how the board reviews progress made against ESG-related goals and targets with an explanation of how they relate to the issuer's businesses.	2.1
Reporting Principles	A description of, or an explanation on, the application of the following Reporting Principles in the preparation of the ESG report: Materiality: The ESG report should disclose: <ul style="list-style-type: none">(i) the process to identify and the criteria for the selection of material ESG factors;(ii) if a stakeholder engagement is conducted, a description of significant stakeholders identified, and the process and results of the issuer's stakeholder engagement. Quantitative: Information on the standards, methodologies, assumptions and/or calculation tools used, and source of conversion factors used, for the reporting of emissions/energy consumption (where applicable) should be disclosed.	1.3
	Consistency: The issuer should disclose in the ESG report any changes to the methods or KPIs used, or any other relevant factors affecting a meaningful comparison.	1.3
Reporting Boundary	A narrative explaining the reporting boundaries of the ESG report and describing the process used to identify which entities or operations are included in the ESG report. If there is a change in the scope, the issuer should explain the difference and reason for the change.	1.2

(II) "Comply or explain" Provisions

Subject Areas, Aspects, General Disclosures and KPIs

Sections/Remarks

A. Environmental

Aspect A1: Emissions

General Disclosure	Information on: a) the policies; and b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste.	3.2
KPI A1.1	The types of emissions and respective emissions data.	While we are not able to directly measure the total air emission, we ensure compliance to the relevant air emission level limits set by regulatory bodies.
KPI A1.2	Direct (Scope 1) and energy indirect (Scope 2) greenhouse gas emissions (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	3.4
KPI A1.3	Total hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Only a negligible amount of hazardous waste was generated and disposed of during the reporting period.
KPI A1.4	Total non-hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Non-hazardous waste is not a material ESG aspect of the Group.
KPI A1.5	Description of emission target(s) set and steps taken to achieve them.	3.2 We have not set a direct target for GHG reduction but instead have set an electricity consumption target for our watch manufacturing business.
KPI A1.6	Description of how hazardous and non-hazardous wastes are handled, and a description of reduction target(s) set and steps taken to achieve them.	3.2 Currently hazardous and non-hazardous wastes are not considered material to the Group and we have yet to collect and consolidate relevant information. We will continue to review and disclose further information as appropriate in the future.

A THE EXCHANGE'S ESG REPORTING GUIDE INDEX

Subject Areas, Aspects, General Disclosures and KPIs		Sections/Remarks
Aspect A2: Use of Resources		
General Disclosure	Policies on the efficient use of resources, including energy, water and other raw materials.	3.1
KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in '000s) and intensity (e.g. per unit of production volume, per facility).	3.4
KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	3.4
KPI A2.3	Description of energy use efficiency target(s) set and steps taken to achieve them.	3.1
KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency target(s) set and steps taken to achieve them.	3.1 There is no issue in sourcing water that is fit for purpose.
KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	Packaging material is not a material ESG aspect of the Group.
Aspect A3: The Environment and Natural Resources		
General Disclosure	Policies on minimising the issuer's significant impacts on the environment and natural resources.	3.1-3.2
KPI A3.1	Description of the significant impacts of activities on the environment and natural resources and the actions taken to manage them.	3.1-3.2
Aspect A4: Climate Change		
General Disclosure	Policies on identification and mitigation of significant climate-related issues which have impacted, and those which may impact, the issuer.	3.3
KPI A4.1	Description of the significant climate-related issues which have impacted, and those which may impact, the issuer, and the actions taken to manage them.	3.3
