

Glossary

coated duplex board	a type of duplex board with a glossy coated surface on one side for superior printability, including coated duplex board with grey back
containerboard	the paperboard components used to manufacture corrugated containers. Containerboard primarily includes linerboard and corrugating medium and can also include coated duplex board
corrugating medium	a paperboard used to form the corrugated or fluted component sandwiched between the linerboard
DCS	Distributed Control System, typically a large-scale process control system characterized by a distributed network of equipment that encompass the functions of control, user interface, data collection, and system management
kraft pulp	pulp produced by the kraft or sulphate chemical process. The kraft process is the predominant chemical pulping process used globally, and involves cooking (digesting) wood chips in an alkaline solution for several hours during which time the chemicals attack the lignin in the wood. The dissolved lignin is later removed leaving behind the cellulose fibers (the primary constituent of pulp)
kraftlinerboard	a high grade of linerboard manufactured wholly or partially from kraft pulp
recovered paper	used paper and board separately collected for re-use as fiber raw material in containerboard manufacture
testlinerboard	linerboard made entirely from recovered paper
white top linerboard	a type of linerboard comprising a multiple-ply sheet composed of one bleached layer with the remaining layer(s) unbleached
