# Chairman's Statement

Dear Shareholders,

For the six months ended 30 June 2015, Beijing Enterprises Clean Energy Group Limited (the "Company", together with its subsidiaries, the "Group") generated revenue of approximately RMB90.2 million and gross profit of approximately RMB32 million. During the period, both revenue and gross profit were solely contributed by the business of the Group in the design, printing and sale of cigarette packages, which remains stable. With a view to achieving better growth potential and enhancing shareholders' return, the Group has diversified its business by investing into the photovoltaic power business during the first half year of 2015.

On 6 May 2015, the Company completed the issue of new shares and raised approximately HK\$1.1 billion in net proceeds for the development of photovoltaic power plants in the People's Republic of China ("PRC"). Investors with strong presence in the PRC were introduced to the Company as strategic investors, and such investors include Beijing Enterprises Water Group Limited ("BEWG") (Stock Code: 0371), the flagship company of Beijing Enterprises Holdings Limited ("BEHL") (Stock Code: 0392) operating in the water service industry, which has become the largest controlling shareholder of the Company, and private equity funds managed by CITIC Private Equity Funds Management Co., Ltd ("Citic PE Funds"), which have become the second largest controlling shareholder of the Company. In addition to the initial capital raised on 6 May 2015, BEWG and Citic PE Funds, together with other investors, have agreed to contribute additional capital of approximately HK\$2.6 billion for development of photovoltaic power generation business through a series of share subscriptions in the share capital of the Company over the course of the next two years. During the period, the name of the Company was changed to reflect the strategic expansion of the Company's business into the photovoltaic power generation business, which is one of the core focuses of the Group in the coming years.

The Group has established a first-class professional technical team to develop its photovoltaic power generation business. Core members of the technical team have worked for a renowned photovoltaic power generation company and have extensive relevant experiences. They possess strong capabilities in the areas of development, investment, construction and operation of photovoltaic power plants and have developed more than 30 photovoltaic power plants with an aggregate installed capacity of 700MW.

In recent years, the global photovoltaic power industry continued to grow, and is currently undergoing large-scale development. The government of the PRC has been actively promoting renewable energy over the years by introducing a series of policies and measures to support the photovoltaic power industry. The PRC has been leading the world in the area of construction of photovoltaic power plants since 2013. According to the Notice of Implementation Plan on Photovoltaic Power Generation Construction for 2015\* (關於下達2015年光伏發電建設實施方案的通知) issued by the National Energy Administration of the PRC, there are plans to increase the photovoltaic power generation capacity in the PRC by an additional 17.8GW for 2015, which is far higher than that in Japan, Europe and United States of America. According to the Strategic Action Plan for Energy Development (2014-2020)\* (能源發展戰略行動計劃(2014-2020)) released by the General Office of the State Council of PRC in 2014, photovoltaic power generation capacity in the PRC will reach 100GW by 2020. It is expected that the PRC will continue to be the largest photovoltaic power market in the coming years, and its photovoltaic power industry has huge potential for growth.

\* For identification purpose only

# Chairman's Statement

Given the capital strength of the Group and strong capabilities of the members of its technical team, projects undertaken by the Group are mainly developed on its own or jointly developed with other parties or that other existing photovoltaic power plants are acquired by the Group. The Group plans to develop photovoltaic power generation business in different regions of the PRC, covering Shandong, Inner Mongolia, Hebei, Henan, Shanxi, Yunnan, Tibet and Guangxi. As at the date of this report, the Group has entered into regional framework agreements with a number of municipal or district governments, and strategic cooperation agreements with a group of companies within the industry. The construction of the 50MW photovoltaic power plant, phase one of the project, in Yuxian, Hebei, which is to be solely developed by the Group, has commenced. The Group intends to develop photovoltaic power plants with an aggregate installed capacity of approximately 500MW in 2015.

2015 will be a pivotal year for the Group. The strategic expansion into the photovoltaic power business has enabled further business growth opportunities for the Group. We are optimistic about our rapid development in the photovoltaic power market, and will strive to strengthen our capabilities in this industry, expand our business, maximise shareholders value and, at the same time, we will be dedicated to environmental sustainability by offering clean energy and contribute to the widespread use of renewable energy in the PRC.

Lastly, I would like to extend my sincere gratitude to all shareholders, customers, staff and business partners for their continuous support to the Group.

**Hu Xiaoyong**

# Management Discussion and Analysis

## BUSINESS REVIEW

During the period under review, the Group diversified its single line of business in design, printing and sale of cigarette packages in the PRC (the "Cigarette Packaging Business") to photovoltaic power business. On 6 May 2015, the Company raised approximately HK\$1,110.9 million in net proceeds by issuing 14,136,452,910 ordinary shares (the "Ordinary Shares") and 113,348,440 convertible preference shares (the "Convertible Preference Shares") of the Company through share subscriptions (the "Share Subscriptions"). The Company will apply the net proceeds to pursue investment opportunities for the investment, development, construction, operation and management of photovoltaic power plants and photovoltaic power-related businesses (the "Photovoltaic Power Business"). During the period, the Company changed its name such that it would be in line with the strategic expansion of the Company into the Photovoltaic Power Business, which will be one of the core focuses of the Group in coming years.

For the six months ended 30 June 2015, the Group achieved a profit attributable to the shareholders of the Company of approximately RMB3.2 million, representing a decrease of approximately 80.6% when compared with the corresponding period last year. The decrease is mainly attributable to the decrease in gross profit margin from the Cigarette Packaging Business, the increase in expenses as a result of the development of the Photovoltaic Power Business, the increase in staff costs and other administrative expenses.

## Photovoltaic Power Business

The Group will operate the Photovoltaic Power Business by undertaking projects that will either be developed on its own or jointly with other parties or that the Group may acquire other existing photovoltaic power plants. For projects jointly developed with other parties, the Group or its designated party may provide, among other things, technical support and consultancy services, funding and necessary assistance in procuring equipment, selection of service providers in respect of the design, construction, installation and testing of photovoltaic power plants to such other project companies and their respective project owners. As part of the joint development arrangement, the parties thereto may enter into arrangements whereby the Group may take security over the relevant assets of the project owners and/or the project companies. For example, such project owners may be required to pledge their respective equity interests of the relevant project companies and/or the respective project companies may be required to pledge their machinery and/or equipment and/or future income to the Group or its designated party.

The Group plans to develop the Photovoltaic Power Business in different regions of the PRC, covering Shandong, Inner Mongolia, Hebei, Henan, Shanxi, Yunnan, Tibet and Guangxi. As at the date of this report, the Group has entered into several memorandum of understanding, regional framework agreements with a number of municipal or district governments, and strategic cooperation agreements with a group of companies within the industry. The Group has commenced the construction of a 50MW photovoltaic power plant, phase one of the project, in Yuxian, Hebei. The Group plans to develop photovoltaic power plants and facilities with an aggregate installed capacity of 500MW over the course of 2015.

## Cigarette Packaging Business

Products of the Group in the Cigarette Packaging Business mainly consist of paper cigarette packages for three cigarette brands. The products are primarily sold to provincial tobacco industrial companies (省級中煙工業公司) which are state-owned cigarette manufacturers in the PRC. Cigarette Packaging Business remained stable when compared with the same period in 2014. For the six months ended 30 June 2015, the Group's revenue increased by approximately 1.7% to approximately RMB90.2 million.

# Management Discussion and Analysis

## FINANCIAL PERFORMANCE

### Segmental Information, Revenue and Gross Profit Margin

In previous years, the Group was principally engaged in the Cigarette Packaging Business. There was only one reportable segment for the Group for the six months ended 30 June 2014 and as at 31 December 2014. During the current period, the Group has expanded into the Photovoltaic Power Business which is identified as another reportable segment.

For the six months ended 30 June 2015, the Group's revenue of approximately RMB90.2 million and gross profit of approximately RMB32 million were solely contributed by the Cigarette Packaging Business, as the Photovoltaic Power Business is at its initial development stage. The Group's revenue experienced a slight increase of approximately 1.7% when compared with the corresponding period last year because of the increase in orders for cigarette packages placed during the period. Gross profit margin was approximately 35.5%, representing a decrease of approximately 3.6% when compared with the corresponding period last year because of keen price competition and increase in staff costs.

### Other income and gains

Other income and gains of the Group mainly comprise interest income and government grants. Other income and gains of the Group increased by approximately RMB259,000 when compared with the corresponding period last year, which was primarily attributable to a government grant of RMB240,000 obtained by the Group during the six months ended 30 June 2015. No such government grant was received by the Group in the corresponding period last year.

### Selling and distribution expenses

Selling and distribution expenses of the Group mainly comprise delivery expenses, staff costs and travelling expenses. Selling and distribution expenses of the Group decreased by approximately RMB164,000 when compared to the corresponding period last year. This was mainly attributable to the decrease in delivery expenses and travelling expenses.

### Administrative expenses

Administrative expenses of the Group increased by approximately RMB12.4 million when compared with the corresponding period last year. The increase was mainly attributable to increase in expenses as a result of the development of the Photovoltaic Power Business and increase in staff costs and other administrative expenses.

### Finance costs

Finance costs of the Group decreased by approximately RMB37,000 when compared with the corresponding period last year. The decrease was due to decrease in the average balances of bank borrowings of the Group during the period.

### Income tax

The income tax of the Group decreased by approximately RMB1.4 million when compared with the corresponding period last year. The decrease in income tax of the Group was mainly due to the decrease in taxable profit from the Cigarette Packaging Business.

## LIQUIDITY AND FINANCIAL RESOURCES

The Group recorded net current assets of approximately RMB992.4 million as at 30 June 2015, compared with net current assets of approximately RMB112.4 million as at 31 December 2014. The increase in net current assets was primarily due to increase in cash and cash equivalents.

# Management Discussion and Analysis

## **LIQUIDITY AND FINANCIAL RESOURCES** *(Continued)*

As at 30 June 2015, the cash and cash equivalents of the Group amounted to approximately RMB935 million which are denominated in Hong Kong Dollars (“HK\$”), United States dollar (“US\$”) and Renminbi (“RMB”), compared with approximately RMB101.4 million as at 31 December 2014. The increase was mainly due to cash inflow from the net proceeds of approximately HK\$1,110.9 million received from the issuance of Ordinary Shares and Convertible Preference Shares through the Share Subscriptions.

As at 30 June 2015, the liquidity ratio of the Group, represented by a ratio of current assets over current liabilities, was approximately 14:1 (as at 31 December 2014: approximately 2:1), reflecting a healthy liquidity position of the Company.

The Group’s operations have been principally financed by internal resources and bank borrowings. During the period under review, the Group repaid all of its bank borrowings. As at 30 June 2015, the Group did not have any outstanding borrowings and long-term debts, whereas as at 31 December 2014, the Group had outstanding borrowings and long term debts in an aggregate amount of approximately RMB24 million. As at 30 June 2015, the Group did not have any unutilised banking facilities because all the banking facilities have expired during the period, whereas as at 31 December 2014, the Group had unutilised banking facilities in an aggregate amount of approximately RMB35.3 million.

The Group’s gearing ratio, derived by dividing total bank borrowings by the sum of total bank borrowings and total equity at the end of the year/period and multiplied by 100%, decreased from approximately 10.6% as at 31 December 2014 to nil as at 30 June 2015.

Development of the Photovoltaic Power Business requires material investments, which the Group plans to fund by means of internal resources of the Group (mainly from the net proceeds received from the issuance of shares as detailed in the paragraph headed “Share Subscriptions” under the section “Capital Structure” below) and debt financing.

## 1.2 BASIS OF PREPARATION

The unaudited interim condensed consolidated financial statements for the six months ended 30 June 2015 have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to The Rules Governing the Listing of Securities (the "Listing Rules") of The Stock Exchange of Hong Kong Limited (the "Stock Exchange"), including compliance with Hong Kong Accounting Standard ("HKAS") 34 *Interim Financial Reporting* issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA"). The accounting policies and basis of preparation adopted in the preparation of these interim condensed financial statements are the same as those used in the annual financial statements for the year ended 31 December 2014 except for the change in functional currency adopted by the Company, and changes in accounting policies made thereafter in adopting the new and revised Hong Kong Financial Reporting Standards ("HKFRSs") issued by the HKICPA, which became effective for the first time for the current period's financial statements, as further detailed in note 1.3 below.

These interim condensed consolidated financial statements have not been audited, but have been reviewed by the Company's audit committee.

## 1.3 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

### (a) Impact of new and revised HKFRSs

The Group has adopted the following revised HKFRSs for the first time for the current period's condensed financial statements.

Amendments to HKAS 19

*Annual Improvements 2010-2012 Cycle*

*Annual Improvements 2011-2013 Cycle*

*Defined Benefit Plans: Employee Contributions*

Amendments to a number of HKFRSs

Amendments to a number of HKFRSs

Other than as further explained below, the adoption of these revised HKFRSs has had no significant financial effect on these condensed financial statements and there have been no significant changes to the accounting policies applied in these condensed financial statements.

The *Annual Improvements to HKFRSs 2010-2012 Cycle* issued in January 2014 sets out amendments to a number of HKFRSs. These amendments do not have any significant financial impact on the Group. Details of the amendment most applicable to the Group are as follows:

*HKFRS 8 Operating Segments*: Clarifies that an entity must disclose the judgments made by management in applying the aggregation criteria in HKFRS 8, including a brief description of operating segments that have been aggregated and the economic characteristics used to assess whether the segments are similar. The amendments also clarify that a reconciliation of segment assets to total assets is only required to be disclosed if the reconciliation is reported to the chief operating decision maker.

### (b) Change in functional currency of the Company

The Company changed its functional currency from Renminbi ("RMB") to Hong Kong dollar ("HK\$") during the period. The reason for the change in functional currency of the Company was after taking into consideration, inter alia, the share subscriptions on 6 May 2015 which was conducted in HK\$. The change in functional currency was prospectively applied.

## 2. OPERATING SEGMENT INFORMATION

For management purposes, the Group's operating businesses are structured and managed separately according to the nature of their operations and the products and services they provide. Each of the Group's operating segments represents a strategic business unit that offers products and services which are subject to risks and returns that are different from those of the other operating segments.

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit for the period attributable to shareholders of the Company, which is a measure of adjusted profit for the period attributable to shareholders of the Company. The adjusted profit for the period attributable to shareholders of the Company is measured consistently with the Group's profit attributable to shareholders of the Company except that head office and corporate income and expenses are excluded from such measurement.

## 2. OPERATING SEGMENT INFORMATION *(Continued)*

In previous years, the Group was principally engaged in the design, printing and sale of cigarette packages in the PRC (the "Cigarette Packaging Business"). There was only one reportable segment for the Group for the six months ended 30 June 2014 and as at 31 December 2014. During the current period, the Group expanded into the business of investment, development, construction, operation and management of photovoltaic power plants and photovoltaic power-related businesses (the "Photovoltaic Power Business") which is identified as another reportable segment.

For the six months ended 30 June 2015, the Group's revenue of approximately RMB90.2 million and gross profit of approximately RMB32 million were solely contributed by Cigarette Packaging Business as the Photovoltaic Power Business is at its initial development stage. Accordingly, in the opinion of the directors of the Company, the presentation of segment information by reportable segments would provide no additional useful information to the users of these financial statements.

As all of the Group's revenue is derived from customers located in the PRC and all of the Group's identifiable non-current assets are principally located in the PRC, no geographical segment information is presented.

## 3. REVENUE

Revenue, which is also the Group's turnover, represents revenue generated from the Cigarette Packaging Business in the PRC.
