

Characteristics of the Growth Enterprise Market (“GEM”) of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

The Directors collectively and individually accept full responsibility for this report which is given in compliance with the requirements (Rules Governing the Listing of Securities on the Growth Enterprise Market) of the Stock Exchange. The Directors confirm, having made all reasonable enquires, that to the best of their knowledge and belief, (i) the information contained in the report are accurate and complete in all material aspects and not misleading; (ii) there are no other facts the omission of which would make any statement herein misleading; and (iii) opinions expressed in this report have been arrived at after due and careful consideration on the basis and assumptions of reasonableness and fairness.

CHAIRMAN'S STATEMENT

SUNeVision continued to be profitable net of one-off costs as it began a new financial year, recording a net profit of HK\$14.4 million for the quarter ended 30 September 2003.

Turnover in the first quarter of the financial year 2003/04 was HK\$56.9 million, HK\$4.4 million lower than the first quarter of the last financial year. Factors contributing to the decline included lower revenues from the Group's last-mile connectivity businesses as a result of lower number of projects, and longer payment cycles by customers of the Group's property-related on-line business. Compared to the first quarter of last financial year, gross margin improved 4% to 32% largely as a result of continuous improvement in operations.

Operating expenditures declined for the thirteenth consecutive quarter, to HK\$14.8 million compared to HK\$18.7 million in the first quarter of the last financial year. Other revenue for the quarter under review was HK\$11.2 million, a substantial decrease from the first quarter of last financial year, which benefited from a one-time gain on bond disposal as well as higher interest income which was no longer applicable after the Group repaid its shareholder loan in February 2003. Net profit for the quarter was HK\$14.4 million.

The Group's financial position remained strong with approximately HK\$1.2 billion of cash and interest-bearing securities on hand.

During the quarter, iAdvantage continued to win quality customers. Several multinational customers were added in Hong Kong and Shanghai, while the Beijing data centre secured a licensed, value-added telecom service provider as anchor tenant and business partner. Overall occupancy was approximately 60%. During the quarter, SuperStreets, SuperHome, Red-Dots, Super e-Network, and Super e-Technology continued to expand their offerings and trim costs.

In the year ahead, iAdvantage will work hard to further increase occupancy of its data centres in Hong Kong and China. Further, the Group will actively seek opportunities to grow from its core data centre business. SUNeVision will strive to achieve full-year profitability so that the payment of dividend to shareholders may be considered.

I would like to close by thanking the board, management, and every member of staff for their ongoing dedication and hard work in support of SUNeVision.

MANAGING DIRECTOR'S REPORT

OVERVIEW

During the quarter ended 30 September 2003, SUNeVision continued to be profitable net of one-off costs as it started a new financial year, recording a net profit of \$14.4 million. There were no one-off costs incurred in the quarter.

In comparison to the first quarter of the last financial year, turnover fell by HK\$4.4 million, from HK\$61.3 million to HK\$56.9 million. Contributing factors included lower revenues from business units involved in last-mile connectivity construction and installation, as a result of lower number of projects, and deferred income from the Group's property-related on-line business. On the other hand, gross profit improved by HK\$1.1 million, from HK\$16.9 million to HK\$18 million, and gross margin also improved by 4% to 32% due to continuous improvements in operations and a better business mix. Operating expenditures dropped HK\$3.9 million to HK\$14.8 million compared to HK\$18.7 million in the first quarter of the last financial year, representing a continuous decline for 13 consecutive quarters.

Other revenue amounted to HK\$11.2 million, a substantial decrease compared to the first quarter of the last financial year, which included contributions from a one-time capital gain on bonds of HK\$5.5 million and higher interest income generated by larger cash reserves before the Group repaid its shareholder loan of HK\$730 million in February 2003.

SUNeVision remains financially strong with approximately HK\$1.2 billion in cash and interest-bearing securities on hand. The Group will continue its drive to improve business performance and maintain profitability in the coming quarters.

DATA INFRASTRUCTURE

iAdvantage

The focus at iAdvantage remains firmly on offering world-class data centre service to a full range of clients, including multinational corporations, telecommunications carriers and government. Quality clients have been secured in both Hong Kong and on the Mainland. In particular, the Beijing data centre has signed up a licensed, value-added telecom service provider as a client and partner. Economic improvements have induced many companies, especially multinationals, to show more interest in data centre and related infrastructure services, which has led to an increase in enquiries and commitments. iAdvantage continues to review its operations on a regular basis to ensure the optimal deployment of resources.

Super e-Technology

Super e-Technology signed an installation agreement with a major pay-TV operator during the period under review. It now serves more than 85,000 households, of which 60,000 are broadband enabled. The company also began to develop its 'Super e-Shooter', an electronic system for measuring the flow of traffic in venues such as shopping malls.

ENABLING SERVICES

SuperHome

SuperHome maintained its track record of providing attractive service and convenience to resident users during the quarter. It staged another of its regular sales promotions successfully and ran a special Mid-Autumn Festival promotion, offering residents delivery of moon cakes and other related products, so they could celebrate the occasion in style.

SuperStreets

Decoration referrals by SuperStreets continued apace during the quarter, helped along by its new bulk decoration package offerings.

Red-Dots

Red-Dots made steady progress on the financial front since the beginning of the year. The company also upgraded its systems and database to offer ever-improving levels of service to loyal users of Hong Kong's leading on-line auction site.

INVESTMENTS

Venture Capital

The venture capital group continued to look for investment opportunities in established high-technology companies during the period under review. The group takes a prudent and conservative approach to investments, committing new funds only where demonstrably attractive returns can be reasonably expected. No further provisions were made on the portfolio during the period under review.

Notes:

1. Basis of preparation

The principal accounting policies adopted in preparing the unaudited consolidated results conform with accounting principles generally accepted in Hong Kong and accounting standards issued by the Hong Kong Society of Accountants (“HKSA”).

2. Turnover

Turnover represents the aggregate of income from Internet services centers and information technology facilities, installation and maintenance of satellite master antenna television system, communal aerial broadcast distribution, structural cabling and security systems, property rentals and building management services, and enabling services, after elimination of all significant inter-company transactions between group companies.

3. Taxation

No Hong Kong profits tax has been provided as the Group has no assessable profit for the period (2002: Nil). Taxation arising in other jurisdictions is calculated at the rates prevailing in the relevant jurisdictions.

In the current period, the Group has adopted, for the first time, Statement of Standard Accounting Practice 12 (Revised) “Income Taxes” issued by the HKSA. The Group has not recorded deferred tax assets as they may not be recovered in the foreseeable future. There is no material deferred taxation effect on the results of the Group for the current or prior accounting periods.

4. Earnings per share

The calculation of the Group’s basic earnings per share for the three months ended 30 September 2003 is based on the Group’s unaudited profit attributable to shareholders of approximately HK\$14,392,000 (2002: approximately HK\$16,427,000) and the weighted average number of 2,026,197,500 (2002: 2,026,915,147) shares in issue during the period.

The computation of diluted earnings per share for the three months ended 30 September 2003 is based on the Group’s unaudited profit attributable to shareholders of approximately HK\$14,392,000 and the weighted average number of 2,026,712,999 shares, after adjusting for the effects of all dilutive potential ordinary shares during the period.

No diluted earnings per share is presented for the three months ended 30 September 2002 as the exercise price of the Company’s outstanding share options was higher than the average market price of the shares of the Company and the conversion of the Company’s outstanding convertible note would have an anti-dilutive effect.

5. Reserves
