**FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2022**

**CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED**  
**(THE “STOCK EXCHANGE”)**

**GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.**

**Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.**

*This announcement, for which the directors (the “**Directors**” and each, a “**Director**”) of SuperRobotics Holdings Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) collectively and individually accept responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquires, confirm that to the best of their knowledge and belief the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.*

*This announcement, containing the full text of the 2022 Third Quarterly Report of the Company, complies with the relevant requirements of the GEM Listing Rules in relation to information to accompany preliminary announcement of quarterly results. Printed version of the Company’s 2022 Third Quarterly Report will be delivered to the shareholders of the Company and available for viewing on the GEM website at <http://www.hkgem.com> and the Company’s website at <http://www.superrobotics.com.hk> on 14 November 2022.*

### THIRD QUARTERLY RESULTS (UNAUDITED)

The board of Directors of the Company (the “**Board**”) is pleased to present the unaudited condensed consolidated results of the Group for the three months and nine months ended 30 September 2022 together with the comparative figures for the corresponding period in 2021 as follows:

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

## 1. GENERAL INFORMATION

The Company was incorporated in the Cayman Islands and with effect from 22 April 2014, the Company was deregistered in the Cayman Islands and continued in Bermuda as an exempted company with limited liability and its shares are listed on GEM of the Stock Exchange. The Company's addresses of the registered office and the principal place of business in Hong Kong are Clarendon House, 2 Church Street, Hamilton HM 11, Bermuda and Room 1405, 14/F., China Merchants Tower, Shun Tak Centre, 168-200 Connaught Road Central, Hong Kong respectively.

The unaudited condensed consolidated financial statements are presented in units of thousands of Hong Kong dollars (HK\$'000), unless otherwise stated, which is the same as the functional currency of the Company.

The Company's principal activity is investment holding and the principal activities of its principal subsidiaries are the provision of engineering products and related services (the "**Engineering Business**").

The beauty products and provision of therapy services (the "**Beauty Business**") was discontinued with effect from 30 June 2021. Accordingly, the results of the operation for the three months and nine months ended 30 September 2022 have been separately presented as a discontinued operation in the unaudited condensed consolidated statement of profit or loss and other comprehensive income. The comparative figures in the unaudited condensed consolidated statement of profit or loss and other comprehensive income have been restated to re-present the Beauty Business as a discontinued operation.

## 2. BASIS OF PREPARATION

The unaudited condensed consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards ("**HKFRSs**"), which is a collective term that includes all applicable HKFRSs, Hong Kong Accounting Standards ("**HKASs**") and Interpretations ("**Int**") issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**"), and accounting principles generally accepted in Hong Kong. In addition, the unaudited condensed consolidated financial statements include applicable disclosures required by the GEM Listing Rules and the disclosure requirements of the Companies Ordinance (Chapter 622 of the Laws of Hong Kong).

The unaudited condensed consolidated financial statements have been prepared on the historical cost basis. The accounting policies and basis of preparation adopted in the preparation of the unaudited condensed consolidated financial statements are consistent with those adopted in the audited consolidated financial statements for the year ended 31 December 2021, except for the adoption of new and amendments to HKFRSs that affect the Group and has adopted the first time for the current period's unaudited condensed consolidated third quarterly results.

The HKICPA has issued a number of new and revised standards, amendments to standards and Int (collectively referred to as "**new and revised HKFRSs**"). The Group has adopted the new and revised HKFRSs which are relevant to the Group's operations and are mandatory for the financial year beginning on 1 January 2022. The adoption of these new and revised HKFRSs does not have any significant financial effect on the Group's unaudited results of operations and financial position.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Business review

On 30 June 2021, China Honest Enterprise Limited (the “CHEL”), an indirect non-wholly owned subsidiary of the Company entered into the Deed of Assignment and Novation (the “Novation”), to transfer of all the obligations and liabilities under the contracts (the “Contracts”) with the customers in the sales of beauty products and provision of therapy services segments (the “Beauty Business”) to an independent third party, Collagen Plus Company Limited (the “CPCL”). CHEL also agreed to assign all its rights, benefits and interests (including the prepayments) in the Contracts to CPCL. After completion of the Novation, the Beauty Business has been discontinued with effect from 30 June 2021 (the “Discontinued Operations”). Details of transaction were set out in the Company’s announcement dated 30 June 2021. As a result, no revenue was derived from the Beauty Business in the current period.

For the engineering products, the Group mainly offers robotic products. For the provision of engineering related services, the Group provides equipment installation, support and maintenance services for robotics and automation systems (collectively, the “Engineering Business”).

For the Engineering Business, during the nine months ended 30 September 2022, the Group continued to develop and improve its robotic products. The Group has also driven the commercialization of its products at steady pace through domestic platforms, upon which large-scale of civil application can be expected. For the period under review, the revenue of the Engineering Business has decreased by approximately 78.6% as compared to the corresponding period in 2021 and contributed a total revenue of approximately HK\$2.9 million to the total turnover of the Group.

The Omicron COVID-19 variant driven wave of the pandemic emerging in Hong Kong and the PRC in late March, The PRC unexpectedly announced the largest city-wide lockdown since the outbreak began. Shanghai had been locked down in two stages. There were also restrictions on internal movement in the PRC, which halted all activities. The lockdown and Omicron COVID-19 disruptions severely dented the Group’s marketing activities as well as our PRC client’s business operation. Some of the planned projects and marketing activities of the Group have been postponed as the Group’s clients are being affected. The performance of the Group has been temporarily impacted.

### Financial review

#### *Continuing Operations*

During the period under review, the Group recorded a turnover of approximately HK\$2.9 million, representing a decrease of approximately 78.6% as compared with the corresponding period in 2021, (2021: approximately HK\$13.6 million), which was generated from sale of robotic products.

Other income of approximately HK\$0.8 million (2021: approximately HK\$1.9 million) mainly consists of government grants received during the period.

The selling and distribution costs was approximately HK\$2.9 million for the nine months ended 30 September 2022 (2021: approximately HK\$5.1 million), representing a decrease of approximately 42.6% over the corresponding period in 2021. The decrease is mainly due to reduce in marketing expense of Engineering Business.

The administrative expenses was approximately HK\$15.3 million for the nine months ended 30 September 2022 (2021: approximately HK\$40.3 million), representing a decrease of approximately 62.5% over the corresponding period in 2021. Such decrease was mainly attributed to decrease in research and development expenses and staff cost.

Loss attributable to owners of the Company amounted to approximately HK\$30.3 million for the nine months ended 30 September 2022 (2021: approximately HK\$73.5 million). The decrease in loss was mainly contributed by the decrease in research and development cost incurred by the Engineering Business. The decrease are partially offset by the increase in finance costs.

### ***Discontinued Operations***

Loss for the nine months ended 30 September 2022 from discontinued operations amounted to HK\$Nil million (2021: loss of approximately HK\$3.4 million).

### **SHARE CAPITAL**

During the nine months ended 30 September 2022, there was no movement in the Company's issued share capital.

## OUTLOOK

In 2022, it is the norm for society to fight against the COVID-19 epidemic and thus the impact of it is diminishing gradually. Driven by the epidemic, more and more industries have begun to use intelligent robots, which has promoted the development of robot, and the structural divergence trend in terms of market demand is increasingly obvious. Firstly, the break out of new energy has become an important driving force for the development of industrial robots. Secondly, increasing investment in the electronics industry will provide continuous force for the growth of robots. Thirdly, affected by the COVID-19 epidemic, many industries have sped up the rate of replacing human labor with machines, such as industries of metal processing, medical supplies, food and beverage, household appliances, etc.. It is estimated that the annual sales growth rate of China's robot market is around 15%-20%, and the localization rate is steadily increasing, which is expected to exceed 41% in 2022.

In China, the robotics industry has gained strategic attention at the national level and it will achieve further development benefit by favorable policies. In December 2021, 15 departments including the Ministry of Industry and Information Technology, the national Development and Reform Commission, and the Ministry of Science and Technology officially issued the “Fourteenth Five-Year Plan for the Robotics Industry”, proposing that during the “Fourteenth Five-Year Plan” period, a number of core robot technologies and high-end products will be promoted to make breakthroughs, the comprehensive indicators of whole machines will reach international advanced levels, and the performance and reliability of key components will reach a level similar to international products. The annual average growth rate of the robotics industry operation income will exceed 20%. A batch of leading enterprises with international competitiveness and a large number of specialized and new “Small Technology Giants” enterprises with strong innovative abilities and good growth potential will stand out, to build three to five industrial clusters with international influence. The density of manufacturing robot doubled.

In April 2021, the “Fourteenth Five-Year Plan for Intelligent Manufacturing Development” also proposed to take actions to innovate and develop the intelligent manufacturing equipment and promote the development of innovative products such as intelligent mobile robots and semiconductor robots. As a result, the direction for Group's future development and its prospects are clearer.

Under the dual promotion of government capital and social capital, various AI technologies have been brought out from the labs to society. They penetrated in various fields of industries at a faster pace, and were widely applied in intelligent robot, finance, security, search, education and other fields. Driven by the new generation of artificial intelligence, venture capital into the AI investment market has grown steadily, and the investment value reached HK\$9.3 billion in 2018. In 2021, enterprises in the intelligent robotics industry are widely favored by the capital. In the past ten years, the investment and financing of the industry has exceeded HK\$100 billion. Financed by major investment institutions, a large number of robotics industry companies have greatly expanded their recruitment, increased R&D investment and marketing expenses, driving the continuous expansion of the robotics industry. It is estimated that the AI market will bring 14% additional increase in global GDP, representing HK\$1.57 billion. Due to the huge market potential, robot products have gained huge exposure and have widely penetrated in market. In addition, the corporate customers' understanding and awareness of the industry have been significantly improved, resulting in the emergence of many high-quality companies and independent brands in the industry. However, certain unreasonable venture capital activities have intensified the fierce competition in the industry and the expansion of the industry scale, resulting in a great waste of resources. The application of artificial intelligence and robot technology in daily life needs more comprehensive test, and the business model needs further exploration to prove the sustainability of the business. The Group calls on all market participants, including peer companies and investment institutions, to actively take responsibility for the market.

According to the Report on the Development of the Robotics Industry in China for 2021, China's intelligent robot market in 2021 was expected to reach RMB83.9 billion, among which, the industrial robot market reached RMB44.57 billion, and is expected to break through RMB58.9 billion by 2023. By 2023, the China industrial robot market will exceed HK\$10 billion. Currently, with the increasing demand for intelligent transformation and upgrades in production and manufacturing in China, the demand for industrial robots remains booming. China's industrial robot market, accounting for about one-third of the global market share and being the world's largest industrial robotics application market, has maintained positive development. With the development of traditional robots in vision, intelligent sensing and cloud technology, robots will be more intelligent and flexible in the future, and will be optimized from traditional robots to co-integration robots. The Group will also continue to insist on driving innovation, intelligent transformation, foundation enhancement, and green development, focusing on promoting the research and development and application of robot products, improving performance, quality and safety, developing and utilizing networked, digital and intelligent technologies, combining mobile Internet, cloud computing, big data and IoT, and actively promoting the high-end and intelligent development of products.

With the explosive growth of the robot market, the risks of the industry cannot be ignored. More and more enterprises are entering this area, and at the same time, the demand for robot products is affected by changes in the macro economy and industry cycles, which brings certain risks to the price of robot products or services as well as changes in supply and demand. Secondly, the adequacy, stability and price changes of the supply of raw materials and key components of robots will also pose market risks. In terms of suppliers, once the suppliers fail to provide the production factors required for the production and operation to robotics enterprises in a timely manner, the credit risks of suppliers may occur, which may result in the failure of the production and operation of enterprises to proceed normally. At the same time, the robotics industry is also vulnerable to the impact of national industrial policies, and changes in tax policies and interest rates may bring unexpected risks to enterprises at any time. In addition, the threat of potential entrants, the threat of competition from existing enterprises, and the threat of substitution of alternatives may also lead to market risks. Technological innovation is also a dynamic risk with its own complexity. The Group needs to be well prepared for a variety of scenarios. There will be no cold winter for AI in the future, however, we still need to take into account the intensity and duration of the impact on the service industry and intelligent manufacturing in the process of continuous technological advancement and business model improvement. The Group's business will also face significant challenges in the future as demand for AI is further released.
