信貸風險指因交易對方不履行其合約責任而導致本集團承受財務虧損的風險。本集團已採納一項政策,規定僅與信譽良好的交易對方進行交易及於適當時取得足夠的抵押品,作為減少違約財務虧損風險的手段。

企業管治報告

In respect of trade and other receivables and loan receivables, in order to minimise risk, the management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis. Credit evaluations of its customers' financial position and condition is performed on each and every major customer periodically. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. The Group does not require collateral in respect of its financial assets.

就貿易及其他應收款項及應收貸款而言,為將 風險降至最低,管理層已設定信貸政策,並持 續監察該等信貸風險。本集團定期對各個主要 客戶的財務狀況及情況進行信貸評估。該等 估主要針對客戶過往的到期付款記錄及當前支 付能力,並考慮客戶的特定資料及客戶營運所 在經濟環境的有關資料。本集團並未就其金融 資產要求給予抵押品。

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The default risk of the industry in which customers operate also has an influence on credit risk but to a lesser extent. At the end of reporting period, the Group has concentration of credit risk as 32% (2023: 31%) of the total trade receivables of the Company was due from the largest customer and 71% (2023: 76%) of the total trade receivables of the Group was due from the largest 5 customers. Taking into accounts the creditworthiness of the customers, the credit risk measures and the historical levels of bad debts, the directors consider that such concentration of credit risk would not result in significant credit default exposure to the Group.

本集團的信貸風險主要受各客戶的個別特性所影響。客戶營運所在行業的違約風險亦對信貸風險產生較低的影響。於報告期末,本集團有若干集中信貸風險,原因為本公司的貿易應收款項總額的32%(2023年:31%)來自最大客戶,而本集團貿易應收款項總額的71%(2023年:76%)來自五大客戶。考慮到客戶的信用可靠程度、信貸風險措施及過往壞賬水平,董事認為,該集中信貸風險不會對本集團造成重大信貸違約風險。

The credit risk on bank balances is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

由於交易對方均為獲國際信貸評級機構授予高信貸評級的銀行,故銀行結餘的信貸風險有限。

Liquidity risk

The Group's policy is to regularly monitor current and expected liquidity requirements and its compliance with lending covenants to ensure that it maintains sufficient amount of cash and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

The Board, through the Corporate Governance & Risk Management Committee, has conducted a review of the effectiveness of the Group's risk management and internal control systems for the year ended 31 December 2024 covering all material financial, operational and compliance functions, is of the view that the effectiveness of the risk management and internal control systems of the Group are considered as effective and adequate.

企業管治報告

The directors of the Company have prepared a cash flow forecast of the Group for a period covered not less than twelve months from the date of approval of the consolidated financial statements. Based on the cash flow forecast which has assumed the successful implementation of the above measures, the directors of the Company are of the opinion that the Group will have sufficient working capital to meet its financial obligations as and when they fall due in the next twelve months from the date of approval for the consolidated financial statements. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

本公司董事已就本集團自綜合財務報表通過日 起不少於十二個月期間編製現金流預測。基於 假設上述措施成功實行的現金流預測,本公司 董事認為本集團將有充足營運資金在綜合財務 報表通過後的未來十二個月內履行到期的財務 責任。因此,綜合財務報表已按持續經營基準 編製。

Notwithstanding the above, significant uncertainties exist as to whether management of the Company will be able to achieve its plans and measures as described above. Whether the Group will be able to continue as a going concern would depend upon the Group's ability to generate adequate financing and operating cash flows through the successful outcome of these measures.

儘管如此,本公司管理層能否實行其上述計劃 及措施存有重大不確定因素。本集團能否持續 經營將視乎本集團能否透過該等措施的成果產 生足夠融資及營運現金流。

Should the Group be unable to continue in business as a going concern, adjustments would have to be made to restate the value of assets to their recoverable amounts, to reclassify non-current assets and non-current liabilities as current assets and current liabilities respectively, and to provide for any further liabilities that may arise. The effects of these potential adjustments have not been reflected in these consolidated financial statements.

倘本集團無法持續經營其業務,本集團資產價 值將作出調整重列至可收回金額,並將非流動 資產及非流動負債分別重新分類為流動資產及 流動負債,以及就任何可能額外產生之負債計 提撥備。此等潛在調整之影響並無於綜合財務 報表反映。

The Audit Committee has reviewed the Disclaimer of Opinion relating to going concern, the management views on going concern and the action plan of the Group, and concurs with the Board's view.

審核委員會已審閱有關持續經營的無法發表意 見、管理層對持續經營的意見及本集團之行動 計劃,並同意董事會的觀點。

TO THE SHAREHOLDERS OF WINTO GROUP (HOLDINGS) LIMITED

(Incorporated in the Cayman Islands with limited liability)

DISCLAIMER OF OPINION

We were engaged to audit the consolidated financial statements of Winto Group (Holdings) Limited (the "Company") and its subsidiaries (hereinafter collectively referred to as the "Group"), set out on pages 52 to 163, which comprise the consolidated statement of financial position as at 31 December 2024, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

We do not express an opinion on the consolidated financial statements of the Group. Because of the significance of the matter described in the Basis for Disclaimer of Opinion section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these consolidated financial statements. In all other respects, in our opinion, the consolidated financial statements have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

(於開曼群島註冊成立的有限公司)

無法發表意見

我們參與審計列載於第52頁至第163頁惠陶集團(控股)有限公司(「貴公司」)及其附屬公司(統稱「貴集團」)的綜合財務報表,其包括於2024年12月31日的綜合財務狀況表與截至該日止年度的綜合損益及其他全面收益表、綜合權益變動表及綜合現金流量表,以及綜合財務報表附註(包括重大會計政策資料)。

我們無法對 貴集團的綜合財務報表發表意見。由於我們的報告中「無法發表意見的基礎」部分所述事項的重大性,我們未能就該等綜合財務報表獲取足夠適當的審核憑證為審核意見提供基礎。在所有其他方面,我們認為綜合財務報表已遵照香港公司條例的披露要求妥為編製。

BASIS FOR DISCLAIMER OF OPINION

As explained in note 3 to the consolidated financial statements, the Group incurred a loss of approximately HK\$20,367,000 for the year ended 31 December 2024, and as of that date, the Group's current liabilities exceeded its current assets by HK\$39,838,000 and its total liabilities exceeded its total assets by HK\$38,729,000.

These conditions indicate the existence of material uncertainties which may cast significant doubt about the Group's ability to continue as a going concern and therefore it may be unable to realise its assets and discharge its liabilities in the normal course of business.

The directors of the Company have been undertaking a number of measures to improve the Group's liquidity and financial position, to meet its liabilities as and when they fall due, which are set out in note 3 to the consolidated financial statements. The consolidated financial statements have been prepared on a going concern basis, the validity of which depends on the successful realisation of these measures, to finance the working capital of the Group as and when needed, which is subject to multiple uncertainties.

Due to the significance of the uncertainties relating to the ongoing availability of finance to the Group, we disclaim our opinion in respect of the material uncertainties relating to the going concern basis.

無法發表意見的基礎

如綜合財務報表附註3所闡釋, 貴集團於截至 2024年12月31日止年度產生虧損約20,367,000 港元,及截至該日期, 貴集團之流動負債超出 其流動資產39,838,000港元,及其負債總額超 出其資產總值38,729,000港元。

該等情況表明存在重大不確定因素,可能 使 貴集團之持續經營能力受到嚴重質疑,並 因此或未能於日常營運中變現其資產及償還其 負債。

貴公司董事已採取多項措施,以改善貴集團流動資金及財務狀況,務求在負債到期時償還其負債,該等措施載列於綜合財務報表附註3。 綜合財務報表以持續經營為基礎編製,其有效性取決於該等措施能否成功實現,以便在需要時,為 貴集團提供營運資金,而這受到多重不確定性的影響。

由於有關 貴集團持續獲取資金的不確定性實 屬重大,我們無法就有關持續經營基準的重大 不確定性發表意見。

3. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

Basis of preparation (Continued)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of HKFRS 2 Share-based Payment, leasing transactions that are accounted for in accordance with HKFRS 16 and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 Inventories or value in use in HKAS 36 Impairment of Assets.

For financial instruments which are transacted at fair value and a valuation technique that unobservable inputs is to be used to measure fair value in subsequent periods, the valuation technique is calibrated so that the results of the valuation technique equals the transaction price.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

3. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

Basis of preparation (Continued)

The preparation of consolidated financial statements in conformity with HKFRSs requires the use of certain key assumptions and estimates. It also requires the directors to exercise its judgments in the process of applying the accounting policies. The areas involving critical judgements and areas where assumptions and estimates are significant to these financial statements, are disclosed in note 4 to the consolidated financial statements.

The significant accounting policies applied in the preparation of these consolidated financial statements are set out below.

Going concern basis

The Group incurred a loss of approximately HK\$20,367,000 for the year ended 31 December 2024, and as of that date, the Group's current liabilities exceeded its current assets by HK\$39,838,000 and its total liabilities exceeded its total assets by HK\$38,729,000.

The above conditions indicate the existence of material uncertainties which may cast significant doubt on the Group's ability to continue as a going concern.

In view of the circumstances and conditions mentioned above, the directors have given careful consideration to the future liquidity and performance of the Group and its available sources of finance in assessing whether the Group will have sufficient financial resources to continue as a going concern. Certain measures have been taken by the Group to mitigate the liquidity pressure and to improve its financial position, which include, but not limited to, the following:

(i) As detailed in note 26 to the consolidated financial statements, the Group is negotiating with its contracting party (the "Prime Contractor") for a favorable term in settling the Group's obligations of approximately HK\$37,489,000 arising from the early termination of a subcontracting agreement ("Subcontracting Agreement");

3. 重大會計政策資料(續)

編製基準(續)

編製符合香港財務報告準則的綜合財務報表須運用若干關鍵假設及估計。董事於應用會計政策時亦須行使其判斷。涉及關鍵判斷的範圍以及假設及估計對該等財務報表而言屬重大的範圍於綜合財務報表附註4中披露。

編製該等綜合財務報表時應用的重大會計政策載於下文。

持續經營基準

截至2024年12月31日止年度,本集團產生虧損約20,367,000港元,及於該日期本集團之流動負債超出其流動資產39,838,000港元,及其負債總額超出其資產總值38,729,000港元。

上述情況表明存在或會對本集團持續經營 能力構成重大疑問的重大不確定因素。

鑑於上述情形及情況,董事會已仔細考慮本集團未來流動資金及業績,以及融資來源以評估本集團有否充足財政資源以持續經營。本集團已採取若干措施以減輕流動資金壓力,及改善其財務狀況,包括但不限於下列:

(i) 誠如綜合財務報表附註26所詳述, 本集團正與其合約方(「主分包商」)磋商有利條款,以結清本集團因提早 終止分包協議(「分包協議」)而產生約 37,489,000港元的責任:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS 綜合財務報表附註

For the year ended 31 December 2024 截至2024年12月31日止年度

3. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

Going concern basis (Continued)

- (ii) The Group is negotiating with its lenders in seeking for the extension of repayments of its borrowings, including principals and interests; and
- (iii) The Group is actively negotiating with external parties to obtain new sources of funding to finance the Group's working capital and improve the liquidity position.

The directors of the Company have prepared a cash flow forecast of the Group for a period covered not less than twelve months from the date of approval of the consolidated financial statements. Based on the cash flow forecast which has assumed the successful implementation of the above measures, the directors of the Company are of the opinion that the Group will have sufficient working capital to meet its financial obligations as and when they fall due in the next twelve months from the date of approval for the consolidated financial statements. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

Notwithstanding the above, significant uncertainties exist as to whether management of the Company will be able to achieve its plans and measures as described above. Whether the Group will be able to continue as a going concern would depend upon the Group's ability to generate adequate financing and operating cash flows through the successful outcome of these measures.

Should the Group be unable to continue in business as a going concern, adjustments would have to be made to restate the value of assets to their recoverable amounts, to reclassify non-current assets and non-current liabilities as current assets and current liabilities respectively, and to provide for any further liabilities that may arise. The effects of these potential adjustments have not been reflected in these consolidated financial statements.

3. 重大會計政策資料(續)

持續經營基準(續)

- (ii) 本集團正與其借款人就延長其借款還 款期限(包括本金及利息的還款期限) 進行磋商;及
- (iii) 本集團主動與外部各方談判,以獲取 新資金來源以作本集團營運資金及改 善其流動資金狀況。

本公司董事已就本集團自綜合財務報表通過日起不少於十二個月期間編製現金流預測。基於假設上述措施成功實行的現金流預測,本公司董事認為本集團將有充足營運資金在綜合財務報表通過日後的未來十二個月內履行到期的財務責任。因此,綜合財務報表已按持續經營基準編製。

儘管如此,本公司管理層能否實行其上述 計劃及措施存有重大不確定因素。本集團 能否持續經營將視乎本集團能否透過該等 措施的成果產生足夠融資及營運現金流。

倘本集團無法持續經營其業務,本集團資產價值將作出調整重列至可收回金額,並將非流動資產及非流動負債分別重新分類 為流動資產及流動負債,以就任何可能額 外產生之負債計提撥備。此等調整之影響 尚未反映在綜合財務報表。

3. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

3. 重大會計政策資料(續)

綜合基準

綜合財務報表包括本公司及本公司所控制 的主體及其附屬公司的財務報表。當本公 司滿足以下要素即擁有控制權:

- 對被投資公司擁有權力;
- 對參與被投資公司業務的浮動回報承 擔風險或享有權利;及
- 能透過其權力影響其回報。

倘事實及情況反映上述三項控制權要素其 中一項或多項有變,則本集團會重新評估 是否仍對被投資公司有控制權。

本集團於取得對附屬公司的控制權時開始 綜合附屬公司賬目,並於本集團失去對附 屬公司的控制權時終止。具體而言,於年 內收購或出售的附屬公司的收入及開支, 會由本集團取得控制權的日期直至本集團 失去附屬公司控制權的日期期間計入綜合 損益及其他全面收益表。

損益及其他全面收益各項目歸屬於本公司 擁有人及非控股權益。附屬公司的全面 收益總額歸屬於本公司擁有人及非控股權 益,即使此舉會引致非控股權益出現虧絀 結餘亦然。

3. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

Basis of consolidation (Continued)

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

 deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with HKAS 12 Income Taxes and HKAS 19 Employee Benefits respectively;

3. 重大會計政策資料(續)

綜合基準(續)

在必要情況下,本公司會對附屬公司的財 務報表作出調整,以使其會計政策與本集 團所用的會計政策保持一致。

與本集團成員公司交易有關的所有集團內 資產及負債、權益、收入、開支及現金流 量均於綜合時悉數對銷。

附屬公司的非控股權益與本集團於當中的 權益分開呈列,即現時擁有權權益於清盤 時賦予其持有人按比例分佔有關附屬公司 的資產淨值。

業務合併

收購業務採用收購法入賬。業務合併所轉 撥的代價按公平值計量,而計算方法為本 集團所轉讓的資產、本集團向被收購方原 擁有人產生的負債及本集團於交換被收購 方的控制權過程中發行的權益於收購日期 的公平值的總額。有關收購的成本通常於 產生時於損益確認。

於收購日期,所收購可識別資產及所承擔 負債按其公平值確認,惟以下各項除外:

• 遞延税項資產或負債及與僱員福利安排有關的資產或負債分別根據香港會計準則第12號所得稅及香港會計準則第19號僱員福利確認及計量;

3. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

Business combinations (Continued)

- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with HKFRS 2 Share-based Payment at the acquisition date; and
- assets (or disposal groups) that are classified as held for sale in accordance with HKFRS 5 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net amount of the identifiable assets acquired and the liabilities assumed as at acquisition date. If, after re-assessment, the net amount of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the relevant subsidiary's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets or at fair value. The choice of measurement basis is made on a transaction-by-transaction basis.

Goodwill

Goodwill arising on an acquisition of business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units ("CGUs") (or groups of CGUs) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A CGU (or group of CGUs) to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the CGU (or group of CGUs) to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit (or group of CGUs).

On disposal of the relevant CGU, the attributable amount of goodwill is included in the determination of the amount of the gain or loss on disposal.

Revenue from contracts with customers

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the Group performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

Revenue from contracts with customers (Continued)

The Group incurs costs to fulfill a contract in its exhibition and trade show contracts. The Group first assesses whether these costs qualify for recognition as an asset in terms of other relevant Standards, failing which it recognises an asset for these costs only if they meet all of the following criteria:

- the costs relate directly to a contract or to an anticipated contract that the Group can specifically identify;
- (b) the costs generate or enhance resources of the Group that will be used in satisfying (or in continuing to satisfy) performance obligations in the future; and
- (c) the costs are expected to be recovered.

The asset so recognised is subsequently amortised to profit or loss on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the assets relate. The asset is subject to impairment review.

Revenue is measured based on the consideration specified in a contract with a customer. The Group recognises revenue from the following major sources. The Group's revenue recognition policies on each of these revenue sources are as follows:

(i) Publications and advertising income

The Group generates advertising income from the publications that are point and online media platform. The customers simultaneously receive and consume the benefits when the advertisements are released on the designated publications and online media platform. Revenue from publications and advertising recognised over time using the output method, which is to recognise revenue on the basis of direct measurements of the value of the services transferred to the customer to date relative to the remaining services promised under the contract.

(iv) Sales of luxury products

Revenue from sales of luxury products is recognised when control of the products has transferred, being when the products are delivered and the customers have inspected and accepted the products. Payment of the transaction price is due immediately when the customers purchase the goods and takes delivery in store. A receivable is recognised by the Group when the goods are delivered to the buyer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.

(v) Online sales of beauty and cosmetics products

Revenue from the online sales of beauty and cosmetics products is recognised at a point in time when a product is delivered to the customer and the Group receives sales and acceptance confirmations, and there is no unfulfilled obligation that affects the customer's acceptance of the products. Payment of the transaction price is due immediately when the customer purchases the goods. Under the Group's standard contract terms, customers have a right of return within 30 days. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. At the same time, the Group has a right to recover the product when customers exercise their right of return so consequently recognises a right to returned goods asset and a corresponding adjustment to cost of sales.

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional. Contract assets are subject to impairment assessment, details of which are included in the accounting policies for impairment of financial assets.

Contract liabilities

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e. transfers control of the related goods or services to the customer).

Contract costs

Other than the costs which are capitalised as inventories, property, plant and equipment and intangible assets, costs incurred to fulfil a contract with a customer are capitalised as an asset if all of the following criteria are met:

- (b) The costs generate or enhance resources of the entity that will be used in satisfying (or in continuing to satisfy) performance obligations in the future.
- (c) The costs are expected to be recovered.

The capitalised contract costs are amortised and charged to the statement of profit or loss on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates. Other contract costs are expensed as incurred.

Leases

Definition of a lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

For contracts entered into or modified or arising from business combinations on or after the date of initial application, the Group assesses whether a contract is or contains a lease based on the definition under HKFRS 16 at inception, modification date or acquisition date, as appropriate. Such contract will not be reassessed unless the terms and conditions of the contract are subsequently changed.

The Group as a lessee

Allocation of consideration to components of a contract

For a contract that contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exception to leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the recognition exemption for lease of low-value assets. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Right-of-use assets

Except for short-term leases and leases of low value assets, the Group recognises right-of-use assets at the commencement date of the lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.

The cost of right-of-use asset includes:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date, less any lease incentives received:
- any initial direct costs incurred by the Group; and
- an estimate of costs to be incurred by the Group in dismantling and removing the underlying assets, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Right-of-use assets in which the Group is reasonably certain to obtain ownership of the underlying leased assets at the end of the lease term is depreciated from commencement date to the end of the useful life. Otherwise, right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

The lease payments include:

Lease modifications

The Group accounts for a lease modification as a separate lease if:

- the modification increases the scope of the lease by adding the right to use one or more underlying assets;
 and
- the consideration for the leases increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

For a lease modification that is not accounted for as a separate lease, the Group remeasures the lease liability based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Group accounts for the remeasurement of lease liabilities by making corresponding adjustments to the relevant right-of-use asset. When the modified contract contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the modified contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

When the Group is an intermediate lessor, a sublease is classified as a finance lease or operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Group applies the on-balance sheet recognition exemption, the Group classifies the sublease as an operating lease.

- 調增租賃的代價,增加的金額相當於 範圍擴大對應的單獨價格,加上按照 特定合約的實際情況對單獨價格進行 的任何適當調整。

就未作為一項單獨租賃入賬的租賃修訂而 言,本集團基於透過使用修訂生效日期的 經修訂貼現率貼現經修訂租賃付款的經修 訂租賃的租賃期重新計量租賃負債。

本集團透過對相關使用權資產進行相應調整,對租賃負債的重新計量進行會計處理。當修改後的合約包含租賃組成部分和一個或多個其他租赁或非租賃組成部分時,本集團會根據租賃組成部分的相對獨立價格及非租賃組成部分的總獨立價格將修改後的合約中的代價分配至各個租賃組成部分。

當本集團為中間出租人時,分租乃參照總租賃的使用權資產劃分為融資租賃或經營租賃。若總租賃屬本集團應用資產負債表內確認豁免的短期租賃,本集團將分租劃分為經營租賃。

Leases (Continued)

The Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. Rental income is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases that transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee are accounted for as finance leases.

At the commencement date, the cost of the leased asset is capitalised at the present value of the lease payments and related payments (including the initial direct costs), and presented as a receivable at an amount equal to the net investment in the lease. The finance income on the net investment in the lease is recognised in the statement of profit or loss so as to provide a constant periodic rate of charge return over the lease terms.

When the Group is an intermediate lessor, a sublease is classified as a finance lease or operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Group applies the on-balance sheet recognition exemption, the Group classifies the sublease as an operating lease.

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. Hong Kong dollars) using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case, the exchange rates prevailing at the dates of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of "exchange reserve" (attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (that is, a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

Retirement benefit obligations

The Group operates the Mandatory Provident Fund Scheme (the "MPF Scheme") under the Hong Kong Mandatory Provident Fund Schemes Ordinance for those employees employed under the jurisdiction of the Hong Kong Employment Ordinance. The MPF Scheme is a defined contribution scheme, the assets of which are held in separate trustee-administered funds.

Under the MPF Scheme, the employer and its employees are each required to make contributions to the scheme at 5% of the employees' relevant income, with the employees' contributions subject to a cap of monthly relevant income of HK\$30,000. The Group's contributions to the MPF Scheme are expensed as incurred. 5% of relevant income vests immediately upon the completion of service in the relevant service period, while the remaining portion vests in accordance with the MPF Scheme's vesting scales. Where employees leave the MPF Scheme prior to the full vesting of the employer's contributions, the amount of forfeited contributions is used to reduce the contributions payable by the Group.

Social security fund

Full-time employees of the Group's Macau subsidiaries are covered by a government-mandated defined contribution plan pursuant to which a fixed amount of retirement benefit would be determined and paid by the Macau government. Contributions are generally made by both employees and employers by paying a fixed amount on a monthly basis to the Social Security Fund Contribution managed by the Macau government.

根據強積金計劃,僱主及其僱員均須按僱員相關收入的5%向計劃作出供款,僱員供款的每月相關收入上限為30,000港元。本集團向強積金計劃之供款於產生時支銷。相關收入的5%在相關服務期內完成服務時立即歸屬,而其餘部分則按照強積金計劃的歸屬比例歸屬。倘僱員在僱主供款全數歸屬前退出強積金計劃,則沒收供款之金額將用作扣減本集團應付之供款。

Share options granted to employees

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value of the equity-settled share-based payments determined at the grant date without taking into consideration all non-market vesting conditions is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity (share options reserve). At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest based on assessment of all relevant nonmarket vesting conditions. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled share-based payment reserve. For share options that vest immediately at the date of grant, the fair value of the share options granted is expensed immediately to profit or loss.

When share options are exercised, the amount previously recognised in share options reserve will be transferred to share capital and share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share options reserve will be transferred to accumulated losses.

Share options granted to consultants

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service. The fair values of the goods or services received are recognised as expenses.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from "loss before tax" as reported in the consolidated statement of profit or loss because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit and at the time of transaction does not give rise to equal taxable and deductible temporary differences. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and interests in associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Taxation (Continued)

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred taxes for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when investment properties are depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale.

For the purposes of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies HKAS 12 *Income Taxes* requirements to right-of-use assets and lease liabilities separately. Temporary differences relating to right-of-use assets and lease liabilities are not recognised at initial recognition and over the lease terms due to application of the initial recognition exemption.

遞延稅項資產及負債乃按預期於償還負債 或變現資產期間適用的稅率計算。所根據 的稅率(及稅法)乃於報告期末已頒佈或實 質上已頒佈。

遞延税項負債及資產的計量反映本集團於 報告期末,預期將要收回或償付其資產及 負債的賬面值的方式所引致的税務後果。

就使用公平值模式計量之投資物業而言, 計量其遞延税項時,乃假設可透過銷售全 數收回有關物業之賬面值,除非有關假設 遭推翻。倘投資物業可予折舊,並以旨在 隨著時間消耗投資物業包含之絕大部份經 濟利益而非透過出售之商業模式持有,則 推翻此假設。

為計量本集團於其確認使用權資產及相關 租賃負債的租賃交易的遞延税項,本集團 會首先釐定税項扣減是否歸屬於使用權資 產或租賃負債。

就税項扣減歸因於租賃負債之租賃交易而言,本集團將香港會計準則第12號所得稅規定單獨應用於使用權資產及租賃負債。由於應用初步確認豁免,故於初步確認時及於租期內不予確認有關使用權資產及租賃負債的暫時差額。

Taxation (Continued)

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

In assessing any uncertainty over income tax treatments, the Group considers whether it is probable that the relevant tax authority will accept the uncertain tax treatment used, or proposed to be use by individual group entities in their income tax filings. If it is probable, the current and deferred taxes are determined consistently with the tax treatment in the income tax filings. If it is not probable that the relevant taxation authority will accept an uncertain tax treatment, the effect of each uncertainty is reflected by using either the most likely amount or the expected value.

Property, plant and equipment

Property, plant and equipment held for use in the production or supply of goods or services, or for administrative purpose are stated in the consolidated statement of financial position at cost, less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of assets other than construction in progress less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The principal annual rates are as follows:

| Advertising billboard | 7 years |
|------------------------|---------|
| Leasehold improvements | 33.33% |
| Office equipment | 20% |
| Furniture and fixtures | 20% |
| Motor vehicle | 20% |

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. Intangible assets acquired in a business combination are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognised in profit or loss when the asset is derecognised.

Impairment of property, plant and equipment, rightof-use assets, contract costs and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use assets and intangible assets with finite useful lives and contract cost to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any). Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that they may be impaired.

The recoverable amount of property, plant and equipment, right-of-use assets, and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Group estimates the recoverable amount of the CGU to which the asset belongs.

In addition, the Group assesses whether there is indication that corporate assets may be impaired. If such indication exists, corporate assets are also allocated to individual CGUs, when a reasonable and consistent basis of allocation can be identified, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be identified.

Before the Group recognises an impairment loss for assets capitalised as contract costs under HKFRS 15, the Group assesses and recognises any impairment loss on other assets related to the relevant contracts in accordance with applicable standards. Then, impairment loss, if any, for assets capitalised as contract costs is recognised to the extent the carrying amounts exceeds the remaining amount of consideration that the Group expects to receive in exchange for related goods or services less the costs which relate directly to providing those goods or services that have not been recognised as expenses. The assets capitalised as contract costs are then included in the carrying amount of the CGU to which they belong for the purpose of evaluating impairment of that CGU.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a CGU) for which the estimates of future cash flows have not been adjusted.

Intangible assets (Continued)

Impairment of property, plant and equipment, rightof-use assets, contract costs and intangible assets other than goodwill (Continued)

If the recoverable amount of an asset (or a CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or a CGU) is reduced to its recoverable amount. For corporate assets or portion of corporate assets which cannot be allocated on a reasonable and consistent basis to a CGU, the Group compares the carrying amount of a group of cash-generating units, including the carrying amounts of the corporate assets or portion of corporate assets allocated to that group of CGUs, with the recoverable amount of the group of CGUs. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of CGUs. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or CGU or a group of CGUs) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a CGU or a group of CGUs) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in, first-out method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. Costs necessary to make the sale include incremental costs directly attributable to the sale and non-incremental costs which the Group must incur to make the sale.

Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

存貨以成本與可變現淨值兩者中較低者列示。存貨成本依先進先出法釐定。可變現淨值即存貨估計售價減去完成和銷售所需的所有估計成本。銷售所需成本包括本集團為進行銷售產生的銷售的直接增量成本及非增量成本。

撥備

當本集團因過往事件而承擔現有責任(法定或推定),本集團可能將被要求履行該責任,及可以可靠地估算該責任金額,則會確認撥備。

確認為撥備之金額乃經考慮有關責任之風險及不確定性,於報告期末對履行現有責任所需代價作出之最佳估計。倘按履行現有責任估計所需之現金流量計算撥備,則其賬面金額為該等現金流量之現值(倘金錢的時間值影響重大)。

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred, and subsequently measured at amortised cost using the effective interest method. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Borrowing costs (Continued)

To the extent that funds are borrowed generally and used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate is the weighted average of the borrowing costs applicable to the borrowings of the Group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying assessment. Any specific borrowing that remains outstanding after the related asset is ready for its intended use or sale is included in the general borrowing pool for calculation of capitalisation rate on general borrowings.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Financial guarantee contracts

Financial guarantee contracts are recognised as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value and subsequently at the higher of:

- the amount determined in accordance with the ECL model under HKFRS 9, and
- the amount initially recognised less, where appropriate, the cumulative amount of income recognised in accordance with the principles of HKFRS 15.

The fair value of financial guarantees is determined based on the present value of the difference in cash flows between the contractual payments required under the debt instrument and the payments that would be required without the guarantee, or the estimated amount that would be payable to a third party for assuming the obligations.

所有其他借貸成本於其產生期間在損益內 確認。

財務擔保合約

財務擔保合約於簽發擔保時確認為金融負債。該負債初始以公平值計量,後續按以下兩者中的較高者計量:

- 按香港財務報告準則第9號項下預期 信貸虧損模型確定的金額,與
- 初始確認金額減去根據香港財務報告 準則第9號的原則確認的累計收入金 額(若適用)。

財務擔保的公平值是基於債務工具規定的 合約價款與不提供擔保時需支付價款之間 的現金流量差額的現值,或應向履行義務 的第三方支付的估計金額予以確定。

Where guarantees in relation to loans or other payables of associates are provided for no compensation, the fair values are accounted for as contributions and recognised as part of the cost of the investment.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date/settlement date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for trade receivables arising from contracts with customers which are initially measured in accordance with HKFRS 15. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets at FVTPL are recognised immediately in profit or loss.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application of HKFRS9/initial recognition of a financial asset the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which HKFRS 3 *Business Combinations* applies.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling in the near term; or
- on initial recognition it is a part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become creditimpaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the creditimpaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will continue to be held in the FVTOCI reserve.

Dividends from these investments in equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. Impairment of financial assets and contract assets

The Group recognises a loss allowance for expected credit loss ("ECL") on financial assets and contract assets which are subject to impairment under HKFRS 9 (including loan receivables, trade and other receivables, contract assets and bank balances). The amount of ECL is updated at the end of each reporting period to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessment are done based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the end of the reporting period as well as the forecast of future conditions.

The Group always recognises lifetime ECL for trade receivables, contract assets and lease receivables without significant financing component.

For all other instruments, the Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting period with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;

- (i) Significant increase in credit risk (Continued)
 - an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

(ii) Definition of default

For internal credit risk management, the Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above, the Group considers that default has occurred when (i) a trade receivable is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

(iv) Write-off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, for example, when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two years past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

計量預期信貸虧損乃指違約概率、違約損失率程度(即倘違約損失的程度)及違約風險的函數。評估違約概率及違約損失率程度根據歷史數據作出,並根據前瞻性資料調整。預期信貸虧損的估計反映無偏頗及概率加權的數額,其乃根據發生相關違約風險的加權數值而釐定。

一般而言,預期信貸虧損乃為本集團 根據合約應收所有合約現金流量與本 集團預期將收取的現金流量之間的差 額,並按初始確認時釐定的實際利率 貼現。

(v) Measurement and recognition of ECL (Continued)

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the past-due status basis.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments by adjusting their carrying amount, with the exception of trade and loan receivables where the corresponding adjustment is recognised through a loss allowance account.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognised its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognised the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to accumulated losses.

Derecognition of financial liabilities (Continued)

When the contractual terms of financial liability are modified such that the revised terms would result in a substantial modification from the original terms after considering qualitative factors (e.g. modifications of convertible instruments such as extending the tenure, change in exercise price of the underlying options). When the contractual terms of financial liability are modified such that the revised terms would result in a substantial modification from the original terms, after taking into account all relevant facts and circumstances including qualitative factors, such modification is accounted for as derecognition of the original financial liability and the recognition of new financial liability. The difference between the carrying amount of financial liability derecognised and the fair value of consideration paid or payable, including any liabilities assumed and derivative components recognised, is recognised in profit or loss.

For non-substantial modifications of financial liabilities that do not result in derecognition, at the point of modification, the carrying amount of the relevant financial liabilities is revised for directly attributable transaction costs and any consideration paid to or received from the counterparty. The effective interest rate is then adjusted to amortise the difference between the revised carrying amount and the expected cash flows over the life of the modified instrument.

Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. For the purpose of the statement of cash flows presentation, cash and cash equivalents include bank overdrafts which is repayable on demand and form an integral part of the Company's cash management.

Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably. A contingent liability is not recognised but is disclosed in the notes to the consolidated financial statements. When a change in the probability of an outflow occurs so that outflow is probable, they will then be recognised as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. A contingent asset is not recognised but is disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When inflow is virtually certain, an asset is recognised.

Events after the reporting period

Events after the reporting period that provide additional information about the Group's position at the end of the reporting period are adjusting events and are reflected in the consolidated financial statements. Events after the reporting period that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

4. CRITICAL JUDGEMENTS AND KEY ESTIMATES

In the application of the Group's accounting policies, which are described in note 3, directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

(a) Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

(i) Estimated impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the recoverable amount of the cash generating unit to which goodwill has been allocated, which is the higher of the value in use or fair value less costs of disposal. The value in use calculation requires the Group to estimate the future cash flows expected to arise from the cash-generating unit, a suitable discount rate, terminal rate and growth rates in order to calculate the present value. Details of the recoverable amount calculation are disclosed in note 17.

The carrying amount of goodwill at the end of the reporting period was approximately nil (2023: HK\$905,000) after an impairment loss of HK\$905,000 (2023: HK\$1,399,000) was recognised during the year.

4. 重大判斷及關鍵估計

於附註3所述應用本集團會計政策時,董事須就並非可從其他資料來源輕易獲取之資產及負債賬面值作出判斷、估計及假設。該等估計及相關假設乃基於過往經驗以及被視作相關之其他因素。實際結果或會有別於該等估計。

(a) 估計不確定性的主要來源

以下討論有關未來的主要假設,以及 報告期末會引致下個財政年度資產及 負債賬面值大幅調整的重大風險的估 計不確定性主要來源。

(i) 商譽的估計減值

於年內確認減值虧損905,000港元(2023年:1,399,000港元)後,於報告期末的商譽賬面值約為零(2023年:905,000港元)。

4. CRITICAL JUDGEMENTS AND KEY ESTIMATES 4. (Continued)

(a) Key sources of estimation uncertainty (Continued)

(ii) Provision of ECL for trade and other receivables and other deposits

The Group uses provision matrix to calculate ECL for trade receivables and other deposits. The provision rates are based on debtor's aging as groupings of various debtors with common credit risk characteristic. The provision matrix is based on the Group's historical default rates taking into consideration forward-looking information that is reasonable and supportable, and that is available without undue cost or effort. At every reporting date, the historical observed default rates are reassessed and changes in the forward-looking information are considered. In addition, trade receivables that are credit impaired are assessed for ECL individually.

In respect of other receivables, the Group assesses the expected credit losses individually by estimation based on historical credit loss experience, general economic conditions of the relevant industry in which the debtors operate, an assessment of both the current as well as the forecast direction of conditions at the reporting date.

The information about the Group's trade and other receivables and credit risk and impairment assessment are disclosed in notes 20 and 34 respectively. As at 31 December 2024, the carrying amount of the Group's trade and other receivables and other deposits, was approximately HK\$15,354,000 (2023; HK\$32,289,000), net of allowance for credit loss of HK\$31,578,000 (2023: HK\$15,770,000).

(ii) 貿易及其他應收款項以及其他 按金預期信貸虧損撥備

就其他應收款項而言,本集團 透過基於過往信貸虧損經驗、 債務人經營所在相關行業的整 體經濟狀況、及於報告日對目 前以及預測狀況方向的評估之 估計,單獨評估預期信貸虧損。

有關本集團貿易及其他應收款項以及信貸風險和減值評估的資料分別於附註 20及34中披露。於2024年12月31日,本集團貿易及其他應收款項以及其他按金(扣除信貸虧損撥備31,578,000港元(2023年:15,770,000港元))的賬面值為約15,354,000港元(2023年:32,289,000港元)。

Key sources of estimation uncertainty (Continued)

(iii) Provision for contract obligation

When accounting for provision for claims on contracts, the Group has taken internal and external advice in considering known claims and actions made by or against the Group. It carefully assesses the likelihood of success of a claim or actions. Provisions are made for certain contracts, claims or actions against the Group. Provision on possible obligations, if appropriate, are made based on management's best estimates and judgements. The information about the provision is disclosed in note 26 to the consolidated financial statements. As at 31 December 2024, the carrying amount of provision was approximately HK\$37,489,000 (2023: HK\$37,489,000).

(b) Critical judgement in applying accounting policies

In the process of applying the accounting policies, the directors have made the following judgements that have the most significant effect on the amounts recognised in the consolidated financial statements (apart from those involving estimations, which are dealt with above).

Going concern basis (i)

These consolidated financial statements have been prepared on a going concern basis, the validity of which depends upon the ongoing availability of finance the working capital requirements of the Group. Details are explained in note 3 to the consolidated financial statements.

4. CRITICAL JUDGEMENTS AND KEY ESTIMATES 4. (Continued)

(b) Critical judgement in applying accounting policies (Continued)

(ii) Significant increase in credit risk

As explained in note 3, ECL are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. HKFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Group takes into account qualitative and quantitative reasonable and supportable forward looking information.

(iii) Principal versus agent

When another party is involved in providing goods or services to a customer, the Group determines whether the nature of its promise is a performance obligation to provide the specified goods or services itself (i.e. the Group as a principal) or to arrange for those goods or services to be provided by the other party (i.e. the Group as an agent).

The Group is a principal if it controls the specified good or services before that good or services is transferred to a customer.

20. TRADE AND OTHER RECEIVABLES AND OTHER DEPOSITS (Continued)

Note: During the year ended 31 December 2020, the Group entered into a subcontracting agreement with the Prime Contractor who is an independent third party to the Group, whereby certain advertising spaces in the Hong Kong Boundary Crossing Facilities are subcontracted to the Group. Further details in relation to the Subcontracting Agreement are set out in the Management and Discussion Analysis to the 2020 annual report. The Group was required to pay a security deposit of HK\$10,500,000 (MOP10,815,000) ("Security Deposit") to secure the advertising spaces from 1 January 2020 to 31 May 2025. The effective interest rate of the non-current deposits is 2.4% per annum.

The Group classifies the Security Deposit as a financial asset at amortised cost and assessed the fair value of the Security Deposit as at settlement date discounted by the prevailing market interest rate. The difference between the fair value of the Security Deposit as at settlement date and the transaction price of HK\$10,500,000 (MOP10,815,000) is recorded as a contract cost, as disclosed in note 21 to these consolidated financial statements. During the year ended 31 December 2023, the Group did not record interest income on the Security Deposit amortised under the effective interest rate due to the early termination of the Subcontracting Agreement for the abolition of the right of using advertising spaces with effect from 30 April 2023 (the "Termination").

According to the terms of the Subcontracting Agreement, the Security Deposit amounting to HK\$9,889,000 as at 30 April 2023 paid to the Prime Contractor for securing advertising spaces will be forfeited by the Prime Contractor. As a result, it will be recorded as a forfeiture of the deposit paid and reflected under other losses, net in note 8 to these consolidated financial statements during the year ended 31 December 2023.

20. 貿易及其他應收款項及其他按金(續)

附註:於截至2020年12月31日止年度,本集團與身為本集團獨立第三方的主分包商訂立分包協議,據此將香港口岸的若干廣告位置分包予本集團。有關分包協議的進一步詳情載於2020年年報的管理層討論及分析。本集團須支付10,500,000港元(10,815,000澳門元)保證金(「保證金」)以取得2020年1月1日至2025年5月31日的廣告位置。非即期按金的實際利率為每年2.4%。

本集團將保證金分類為按攤銷成本計量的金融資產,並評估保證金於結算日按現行市場利率貼現的公平值。保證金於結算日的公平值與交易價10,500,000港元(10,815,000澳門元)之間的差額入賬列作合約成本,詳情於本綜合財務報表附註21披露。於截至2023年12月31日止年度,由於提前終止分包協議,自2023年4月30日起廢除廣告位置使用權(「終止」),本集團並無錄得按實際利率攤銷的保證金之利息收入。

根據分包協議條款,於2023年4月30日已付予主分包商以取得廣告位置的9,889,000港元保證金將被主分包商沒收。因此,其將被入賬列作沒收已付按金,並計入截至2023年12月31日止年度綜合財務報表附註8中的其他虧損淨額。

Financial risk management objectives and policies (Continued)

Market risk (Continued)

Interest rate risk

During the year, the Group was exposed to fair value interest rate risk in relation to fixed rate loans from a substantial shareholder and other borrowings (see notes 27 and 28 for details of the borrowings).

The Group is not exposed to any significant cash flow interest rate risk which may materially affect the Group's results of operations in 2024 and 2023.

Credit risk and impairment assessment

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collaterals, where appropriate as a means of mitigating the risk of financial loss from defaults.

In respect of trade and other receivables in order to minimise risk, the management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis. Credit evaluations of its customers' financial position and condition is performed on each and every major customer periodically. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. The Group does not require collateral in respect of its financial assets.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The default risk of the industry in which customers operate also has an influence on credit risk but to a lesser extent. At the end of reporting period, the Group has concentration of credit risk as 22% (2023: 22%) of the total trade receivables of the Company was due from the largest customer and 36% (2023: 70%) of the total trade receivables of the Group was due from the largest 5 customers. Taking into accounts the creditworthiness of the customers, the credit risk measures and the historical levels of bad debts, the directors consider that such concentration of credit risk would not result in significant credit default exposure to the Group.

於2024年及2023年,本集團並無面臨可能 嚴重影響本集團經營業績的任何重大現金 流量利率風險。

信貸風險及減值評估

就貿易及其他應收款項而言,為將風險降至最低,管理層已設定信貸政策,並持續監察該等信貸風險。本集團定期對各個主要緊該等信貸風險。本集團定期對各個法院等評估主要針對客戶過往的到期付款資錄及當前支付能力,並考慮客戶的特定資料及客戶營運所在經濟環境的有關資料本集團並未就其金融資產要求給予抵押品。

本集團的信貸風險主要受各客戶的個別特性所影響。客戶營運所在行業的違約風險亦對信貸風險產生影響,但影響程度較低。於報告期末,本集團有若干集中信貸風險,原因為本公司的貿易應收款項總額的22%(2023年:22%)來自最大客戶,而本集團貿易應收款項總額的36%(2023年:70%)來自五大客戶。考慮到客戶的信用可靠程度、信貸風險措施及過往壞賬水平,董事認為,該集中信貸風險不會對本集團造成重大信貸違約風險。

Financial risk management objectives and policies (Continued)

Credit risk and impairment assessment (Continued)

The carrying amount of the bank balances and cash, other receivables and deposits, amount due from a shareholder and amount due from a non-controlling shareholder of a subsidiary included in the consolidated statement of financial position represents the Group's maximum exposure to credit risk in relation to the Group's financial assets.

The credit risk on bank balances and cash is limited because the counterparties are financial institutions and banks with high credit-ratings assigned by international credit-rating agencies.

In determining the ECL of the Group's other receivables and deposits, amount due from a shareholder and amount due from a non-controlling shareholder of a subsidiary, the management assessed the expected losses individually by estimation based on historical credit loss experience, general economic conditions of the relevant industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. Based on the result of the foregoing, no impairment loss was recognised during the years ended 31 December 2024 and 2023 because the amount of ECL is immaterial.
