## **Brief Description:**

1. According to the Notice of the State Council concerning the Implementation Proposal of Toll-free Traffic for Small Passenger Vehicles during Major Festivals and Public Holidays approval by the Ministry of Transport and other ministerial departments (《國務院關於批轉交通運輸部等部門重大節假日免收小型客車通行費實施方案的通知》), during the “1 May” Labour Day holiday period in 2015 (from 1 to 3 May), all projects operated and invested by the Group have implemented the toll-free policy for small passenger vehicles with 7 seats and below.
2. GNSR Expressway: Benefiting from the favourable factors, including increase in car ownership volume and toll-by-weight, both toll traffic volume and toll revenue in May increased year-on-year.
3. Xian Expressway: In accordance with the expressway development planning of Shaanxi Province, the reconstruction and expansion project is currently implemented to change the existing four lanes to eight lanes for Xian Expressway. Pursuant to the agreement with the parties involved in the renovation and expansion project, toll revenue for 2015 will be calculated based on the actual revenue for 2014 and increase progressively by an annual average of 3.5%.
4. Jinbao Expressway: Due to the continuous impact of the implementation of the policy of restriction on motor vehicles in Tianjin, both toll traffic volume and toll revenue decreased year-on-year in May. The larger decrement of toll revenue year-on-year and month-on-month in May to the fact that the revenue from ETC hasn't been fully split.
5. Cangyu Expressway: Benefiting from the Guiwu Expressway, which is connected with this section, being opened to traffic on 20 April 2015 after completion of construction, and the traffic control measures (restriction of large-size trucks) as a result of the transformation and construction of the Cangwu section of 321 National Highway from 15 April 2015, the toll traffic volume for the month and the toll revenue increased year-on-year. Cumulative toll revenue decreased year-on-year, which was mainly due to the diversion effect of traffic to Yunluo Expressway and Guanghe Expressway.
6. Han-Xiao Expressway: Toll revenue decreased year-on-year in May, which was affected by the traffic control measures due to closure of neighbouring road sections for construction (construction work period for connection between Dai-Huang Expressway and Liudian: 9 June 2014 to 30 June 2016, construction work period for Tianhe Airport North Road in Wuhan: 24 May 2014 to 30 May 2017).

7. Changzhu Expressway: Benefiting from the economic development, further improvement of road networks of surrounding regions, and the effect of reconstruction of the Lituo section of the G4 Expressway from 10 April 2015, a double-digit year-on-year increase in the toll traffic volume and toll revenue was maintained in the month.
8. Weixu Expressway: Toll traffic volume and the first split toll revenue decreased year-on-year in May, mainly due to the enhanced efforts of the industry regulatory authority on overload control which caused a decrease in overload trucks. First split cumulative toll revenue decreased year-on-year, which was mainly due to the influence of the Hebei section of the G4 Expressway being opened to traffic on 21 December 2014 after completion of transformation. Pursuant to the requirements of the relevant industry regulatory authority in Henan Province, the second split was uniformly implemented for toll revenue. As the second split result takes time to confirm, first split was used uniformly for toll revenue. As a reference, the effect of the second split from January to April 2015 has reduced the first split revenue by approximately 15.7%.
9. Humen Bridge: Benefiting from the increase in car ownership volume, the toll traffic volume and toll revenue in May maintained a year-on-year growth.
10. Northern Ring Road: Benefiting from the increase in car ownership volume, the toll traffic volume and toll revenue in May maintained year-on-year growth.
11. GWSR Expressway: Benefiting from the increase in car ownership volume, both traffic volume and toll revenue in May maintained growth year-on-year. The slowdown in growth was mainly due to the implementation of the policy on restriction of trucks with a capacity of 5 tons or above by the neighbouring Guangzhou Airport Expressway during certain hours (7:00 to 22:00 each day) starting from 15 March 2015.
12. Shantou Bay Bridge: As a result of the traffic control measures (restriction of the trucks with a capacity of 30 tons or above, and single-lane dual carriage approach) for the repair of the Shantou Bay Bridge starting from 7 April 2015, the toll revenue decreased year-on-year in May.
13. Qinglian Expressway: Toll traffic volume and toll revenue in May decreased year-on-year, which was mainly due to the diversion impact of traffic upon the opening of the Guangle Expressway on 27 September 2014 and the Erguang Expressway on 31 December 2014.

14. The above toll revenue figures are rounded to the nearest RMB1,000.
15. For details of the percentage of interest held by the Company in each of the projects, please refer to page 24 of the Company's 2014 Annual Report.

By Order of the Board  
**Yuexiu Transport Infrastructure Limited**
